LEADing to a Better World and Customer Happiness

Toward the Shared Goal of Sustainability

As Korea's leading financial group,
we are committed to maximizing customer
value and pursuing sustainable growth with
all of our shareholders.

In 2019, KB Financial Group solidified its position as a leading financial group taking another step forward in establishing a truly One-Firm KB framework by leveraging the organic collaboration among its 12 subsidiaries to deliver more convenient financial services and greater customer satisfaction from the customer-centric perspective.

In 2019, KB Financial Group's total assets posted a KRW 38.9 trillion YoY growth to KRW 518.5 trillion, and its net income amounted to KRW 3,311.8 billion, which made the group the first in the domestic financial industry to exceed the KRW 3 trillion mark in net income for three consecutive years. With more than 34 million customers that we serve at the group-wide level, we are further consolidating our position as Korea's leading financial group.

Looking to 2020, KB Financial Group will remain true to its mission of 'Financial Services Delivering Changes – Happier Life & Better World' in order to maximize customer value as their lifelong financial partner and establish its status as an unrivaled leading financial group. To this end, we set forth 'L.E.A.D. 2020' as our strategic cue to guide our business directions and will conduct business accordingly.

The following represents our initiatives to be undertaken in accordance with L.E.A.D. 2020

Level up the Core Level up KB Financial Group's core competitive edge

Expansion of the Territory Expand the territory of our business operations

Active & Creative KB Create an active and creative KB culture

Digital Innovation Customer-Centric Pursue customer-centric digital innovation

This will surely enable KB Financial Group to seek bold customer-centric innovation to solidify the basis for sustainable growth in 2020.

L.E.A.D.2020

LEVEL UP THE CORE

CEO Message

KB Financial Group has been fully aligned across the board to drive financial innovation and broaden the scope of its business presence with an aim to secure sustainable future growth engines.

Dear esteemed customers, shareholders and investors!

I would like to begin by extending my heartfelt gratitude for the unwavering trust and support you have provided to KB Financial Group.

Throughout 2019 we have faced a difficult business environment that continues to be characterized by weak economic growth and lingering uncertainties in global financial markets. Despite such challenging conditions, we have channeled our group-wide resources to drive financial innovation and expand the scope of our businesses.

In the past year, we became the nation's first financial institution to launch an MVNO (Mobile Virtual Network Operator) service. In successfully launching our MVNO services, "Liiv M", we were able to strengthen our digital capabilities by creating a platform that combines finance with telecommunication technology. In addition, we have introduced new services and products to meet the challenges presented by Korea's rapidly aging society and the growing demand of our customers for services after retirement. For example, we have opened senior care and assisted living facilities in urban areas that offer premium services similar to those in advanced nations.

Our investment banking business has also been significantly enhanced with the acquisition of the Financial Services Commission's mega investment banking license, allowing us to issue promissory notes with greater leverage and thus improving our funding capabilities.

Behind our improved performance is the unfailing support of our customers and shareholders and the firm commitment of our employees. Each and every one of us at KB Financial Group will do our utmost to progress even further through sustained transformation and innovation.

On the global business front, we have expanded our network in Southeast Asia. Following our acquisition of shares in Bank Bukopin of Indonesia in 2018, we have acquired shares of PRASAC Microfinance Limited, a leading provider of microfinance and deposit—taking services in Cambodia. We have also acquired major stakes in PT. Finansia Multi Finance and Sunindo Primasura Finance in Indonesia. In established capital markets such as London, Hong Kong, and New York, we have made significant strides in solidifying our IB business network.

In our continuing efforts to reinvent our branch banking network we have successfully implemented a broad foundation for our "PG 2.0" project, our transformation to a branch network that is more optimized than ever before in meeting the demands of each local community. We have also improved the services of our digital channels by introducing new platforms in auto financing and unsecured loans. Internally, we have completed various projects such as implementing next–generation digital systems, introducing digital procedures to our traditional branch operations and developing new and efficient HR systems. In undertaking these digital initiatives, we are highly confident that we will remain a leading financial services provider in an everchanging and competitive environment.

Now I would like to briefly review our financial performance in 2019.

In 2019, KB Financial Group posted KRW 3,311.8 billion in net profits. This is an increase of KRW 250.6 billion from the previous year, primarily attributable to interest income from solid loan growth as well as improvements in non-interest income, increased operational efficiencies and good asset quality performance.

Total assets of the Group increased by KRW 39.0 trillion from the previous year to KRW 518.5 trillion. Loans showed well-balanced growth with increases in key household products and to prime customers in SOHO and SME. In our efforts to diversify our sources of income, we also expanded our investment portfolio in securities.

Our improved financial performance, highlighted by expansion in our net profit and total assets, is a result made possible by the unfailing support from our customers and shareholders, as well as the strong commitment shown by our employees. Each and every one of us at KB Financial Group will maintain our strong dedication to innovation and continue to deliver sustainable progress.

We continue to face mounting concerns over the global economy and growing volatility in global financial markets. As forecasted by many, we expect the Korean banking sector to be challenged by low interest rates, low growth and low inflation. There is also the ongoing competition from tech giants who are advancing into the financial industry on the back of their digital platforms.

In overcoming these challenges and emerging as a genuine leader in the financial services industry, we at KB Financial Group have created the acronym 'L.E.A.D.' as our strategic blueprint to guide our journey in 2020. As we aspire to be the life-long financial partner deeply trusted by our customers for our market leadership and unrivaled services, we vow to focus our group-wide capabilities on the following initiatives.

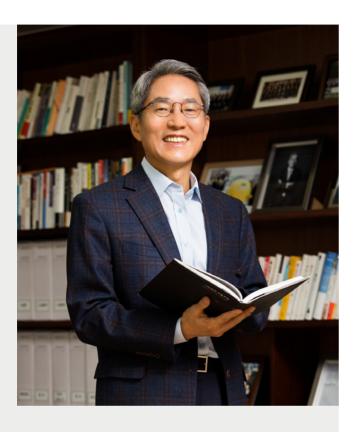

First, we will "level up" the core competitive edge of KB Financial Group to establish a more robust and efficient business model.

We will strengthen our core competitiveness to generate solid income contribution from our main subsidiaries and key business areas. In facing an economic environment that continues to be slow in growth, we will innovate our cost structure and reinforce our crisis management system to readily address potential crisis situations both in Korea and abroad.

Second, we will expand our business territory and markets through strategic M&As, both at home and abroad, to strengthen and diversify our business portfolio and secure new growth momentum.

Our 'Two Track' strategy of pursuing expansion in Southeast Asia and advanced markets will continue. In addition, we will continue our efforts to discover new opportunities, such as in My Data and MVNO, to promote sustainable future growth.

CEO Message 013

Third, we will expedite our pace of transformation and innovation to establish and reinforce an "active and creative" corporate culture.

We are continuing to create and internalize a corporate culture that encourages fast decision–making and execution and a culture that values creativity and openess. We also aim to establish an ESG management system that is on level with global standards to lead the way in fulfilling corporate social responsibility and creating sustainable social value.

KB Financial Group created the acronym – L.E.A.D – as our strategic blueprint to guide our journey in 2020 to become the life-long financial partner deeply trusted by customers for our dominant market leadership and unrivaled services.

Fourth, we will pursue customer-centric "digital innovation" to improve the customer experience in our digital channels.

As we continue to diversify and widen the reach of our digital platforms and channels through expanded digital marketing, we will build our seamless digital network by drawing on internal as well as external data to provide customized services to our customers.

Through KB Innovation Hub Center, we also plan to expand our strategic partnerships with start-ups and fintech companies to create KB's own digital ecosystem.

With many uncertainties surrounding the economy and our industry we are expecting many challenges in the year ahead. Even so, we at KB Financial Group are determined to collectively overcome these challenges, setting us apart from the competition and reinforcing our status as a leading financial group dedicated to Innovation driven growth.

We look forward to your continued support for KB Financial Group and we wish you and your loved ones good health and happiness.

Thank you.

Jong Kyoo Yoon Chairman & CEO KB Financial Group Inc.

Company Profile

As a leading financial group with the largest customer base and the most extensive branch network in Korea, KB Financial Group is committed to delivering one–stop comprehensive financial services that truly cater to a broad range of customer needs through organic cooperation among 12 subsidiaries. KB Financial Group and its subsidiaries are uniting with a relentless spirit of challenge to drive KB Financial Group's evolution into becoming a lifelong financial partner that its customers can count on. It will do so with its differentiated competitive edge that comes from its robust capital strength and extensive network as well as its operational and risk management expertise accumulated through years of experience. With our firm belief in customer–centric management and group mission of 'Financial Services Delivering Changes–Happier Life & Better World', we will ceaselessly pursue innovation while providing differentiated products and services through consistent innovation based on prompt decision–making and agile execution. KB Financial Group plans to continue to solidify our market position as korea's leading financial group.

Financial Highlights

In 2019, KB Financial Group posted KRW 3,311.8 billion in net income. This was mainly driven by the solid growth in net interest income and net fee & commission income maintaining robust fundamentals even amid the economic slowdown. KB Financial Group's top priority for 2019 was to focus on asset quality and profitability, which prompted our endeavors to pursue quality loan growth, manage our net interest margin, and improve performance in our non-interest income. This, in return, allowed us to maintain highly steadfast fundamentals in generating income. KB Financial Group's credit cost ratio recorded to 0.20% in 2019 which remained subnormal level attributable to quality-driven loan growth and preemptive risk management. As of the end of 2019, the group BIS ratio and CET1 ratio posted 14.5% and 13.6% respectively demonstrating the highest level of capital strength in the Korean financial industry.

By subsidiary, KB Kookmin Bank recorded KRW 2,439.1 billion in net income, KB Securities KRW 257.9 billion, KB Insurance KRW 234.3 billion, and KB Kookmin Card KRW 316.6 billion, which account for 98.1% of the group total income. Overall improvement in performance was witnessed in other subsidiaries as well, with KB Asset Management posting KRW 48.9 billion in net income, KB Capital KRW 117.0 billion, KB Life Insurance KRW 16.0 billion, KB Real Estate Trust KRW 61.7 billion, and KB Savings Bank KRW 16.3 billion.

As we move into 2020, KB Financial Group will further strengthen its core business competitive edge and pursue bold customer–centric innovation in order to solidify its basis for sustainable growth and take a renewed step forward to become leading financial group.

Vision & Strategy

Group Mission & Vision

KB Financial Group defined its mission as "Financial Services Delivering Changes – Happier Life & Better World" to embody its firm commitment to leveraging finance to assist customers in designing a more flourishing future and to bring greater convenience and progress to the world. Its vision "Driven by world-class talents and bold innovation, to become your trusted financial partner for a lifetime" will guide the group's endeavors to become a lifelong financial group by leading innovation that shifts the financial paradigm with best professionals. With prompt decision–making and agile executional capabilities, we relentlessly pursue innovation to provide differentiated products and services that will ultimately solidify our position as the most trusted and recognized leading financial group.

2019 Key Activities and Achievements

Business Unit System for organizational operation to increase group-wide collaborative synergy

Following the expansion of the Business Unit from the three units of WM, CIB, Capital Market to seven with the addition of Digital Transformation, Retail Customer, SME, and Insurance in 2019, Global Business Unit was newly created in 2020. This helped boost our execution of global business operations, thus increasing the number of units under this operational system to a total of eight. Our employees are also allowed to hold additional positions in related subsidiary organizations as a way to increase synergy from respective Business Units through the 'One–Firm' approach and improve management accountability. Going forward, KB Financial Group will reinforce the Business Unit System to maximize synergy among subsidiaries and promote efficiency in organizational operation.

Balanced growth and synergy generation between banking & non-banking business

Over the past four years, we have leveraged M&As in securities, insurance and capital operations, which were traditionally the weaker components of our business portfolio, to reinforce our non-banking business and realign our business portfolio. This brought our net income ratio between banking and non-banking business from 8:2 to 7:3. Our mid to long-term goal is to eventually reach 6:4 to secure sustainable growth momentum by enhancing the inherent competitiveness of respective subsidiaries and strengthening our non-banking business through M&As.

Broader global business presence and stronger competitiveness

Our global business approach takes into account a range of factors, from country–specific regulatory conditions, demographic structures, and financial industry infrastructure to developmental characteristics of respective financial sectors and the growing overseas investment needs of domestic investors, and is focused on the four areas of CIB, retail banking, digital business, and asset management. Our recent advancement into the digital banking, auto finance, MFI, and securities business in Cambodia, Laos, Myanmar, and Vietnam has allowed us to develop our understanding of and experience in these Southeast Asian markets. To effectively use our business resources, a limited number of countries will be selected as hub candidates and nurtured as new 'Mother Markets'.

As part of this strategy, we acquired a 70% stake in PRASAC Micro Finance, Cambodia's largest Microfinance Deposit–taking Institution (MDI), in December 2019. With a local business network of 11 locations, PRASAC has an unrivaled market dominance in the Cambodian market as the third largest lender in the local financial market while posting high profitability with KRW 90.7 billion in net income and 29.4% in ROE as of 2018. KB Financial Group's post–acquisition plan is to share its exceptional retail capabilities with PRASAC while retaining its core competitive edge at the maximum possible level and swiftly transform PRASAC into a commercial bank. PRASAC could then go on to become an unrivaled leading bank in Cambodia, which will surely lay the basis for KB Financial Group to expand its global business presence across the entire Southeast Asian region.

Management Strategy to Achieve Goals of 2020

In line with mounting concerns over the global economic recession and continued uncertainties in the global financial market, the domestic economy is expected to suffer low interest rates, low growth, and low inflation for an extended period of time. This is further aggravated by the emergence of new competitors and threats, ranging from the full-fledged implementation of open banking to tech giants advancing into the financial industry with their powerful platforms.

To evolve into a true "Leader" who reliably pioneers the market as Korea's top-notch financial group even in the most trying of times, KB Financial Group determined the management keyword "L.E.A.D." as the strategy direction to guide its journey in 2020, and will focus groupwide capabilities to become a trusted financial partner for a lifetime, known for its market leadership and unrivaled service.

Level Up the Core

First, we will "level-up" our core competitive edge to establish a robust and efficient business model,

Our core competitiveness will be strengthened to generate solid profits from main subsidiaries and key business areas. In preparation for an era of continued low growth, our cost structure will be strategically innovated and our response system will be reinforced to readily address any possible situation both in Korea and abroad.

Expansion of the Territory

Second, we will further complete our business portfolio through strategic M&As both at home and abroad, and secure growth momentum in line with changing business conditions.

A range of M&A opportunities will be actively reviewed and implemented to bolster our business portfolio while the 'Two-Track' strategy will be executed to advance into Southeast Asian and mature markets to broaden our global business presence. Furthermore, My Data, MVNO and other new business opportunities will be extensively explored to generate future sustainable growth.

A Active & Creative KB

Third, we will ramp up our pace of transformation and innovation to establish an organizational culture befitting the title of Active & Creative KB.

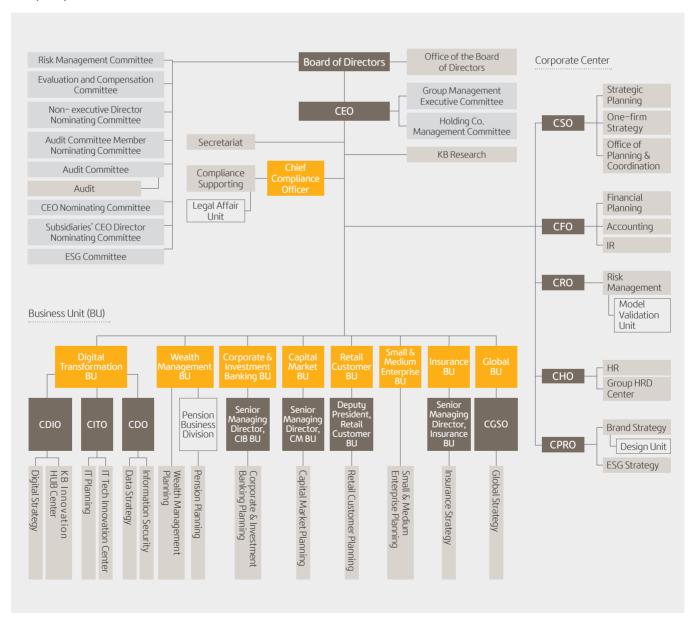

A corporate culture that values creativity and equality will be developed to enable prompt decision–making and execution. We will also establish an ESG management system on par with global standards to serve as a leader in fulfilling corporate social responsibility and creating future value.

D Digital Innovation Customer-Centric

Fourth, we will provide customer-centric digital innovation to deliver a differentiated user experience and value.

Our customer contact points will continue to strengthen through diversified channels and broader digital marketing activities. A wide array of channels will be aligned to reinforce our seamless service delivery system while refined analysis of internal/external data will be performed to offer personalized products and services. With the KB Innovation HUB Center playing a pivotal role, we will expand our strategic partnership with fintech companies to create a digital ecosystem where KB services are situated at the hub.

Group Corporate Structure (As of March.31, 2020)

Corporate Governance

Principles

The Board of Directors of KB Financial Group serves as the supreme decision–making body to deliberate and decide on major management issues of the Group and other subsidiaries. As of the end of 2019, the Board of Directors consisted of a total of nine directors – seven non–executive directors, one executive director and one non–standing director – with non–executive directors accounting for the majority, faithfully fulfilling their role to hold the management in check.

The Chairman and CEO of KB Financial Group is appointed at the general shareholder meeting as stipulated in the Articles of Incorporation. Candidates for this position are selected and their qualifications are examined in accordance with fair and rigorous procedures at the CEO Nominating Committee, which is composed solely of non–executive directors, prior to their nomination to the general shareholder meeting.

At KB Financial Group, the Board of Directors defined 'shareholder representation, professionalism, and diversity' as the core principles in appointing non-executive directors. As such, a pool of non-executive director candidates is managed year-round in the detailed segments of 'financial business, accounting, finance, law/regulation, risk management, HR, IT, and consumer protection'. Their nomination process consists of the three steps of candidate pooling, evaluation and nomination, which are operated in complete isolation to ensure the independence and fairness of this process. The candidate pool is regularly managed on a semi-annual basis and is created based on the recommendations from shareholders and external search firms. Notably, any shareholder who owns one or more shares of KB Financial Group can recommend candidates and KB Financial Group is the first in the financial industry to institute such a practice. Furthermore, external advisor panels participates in this process to ensure objectivity in assessing candidates, and the results are used, along with reference checks, to select the final candidates at the Non-Executive Director Nominating Committee. These candidates are evaluated for their qualifications at the committee meeting in accordance with the criteria set by relevant regulations and the Articles of Incorporation before they are nominated to the general shareholder meeting.

Corporate Governance Goal

In conformity with the Articles of Incorporation, the Chairman of the Board of Directors is appointed among non-executive directors: the chairman is mandated to preside over the board of directors meetings and ensure that the board of directors is operated in accordance with the principles of checks and balances.

Committees of the Board of Directors

Committees under the board are delegated to perform a portion of the board of directors functions as stipulated in governmental regulations and the Articles of Incorporation, and are composed of directors who bring their expertise in the relevant field to the table.

Audit Committee

The Audit Committee performs audits on the business operations and assets of the holding company and its subsidiaries while deliberating and deciding on related issues in order to audit the performance of directors.

Risk Management Committee

The Risk Management Committee serves as the top decision–making body to develop risk management strategies and policies in order to swiftly identify, measure, supervise and control overall risks that may occur across the entire business conduct of the holding company and its subsidiaries.

Evaluation & Compensation Committee

The Evaluation & Compensation Committee develops compensation policies for the holding company and its subsidiaries and supervises the planning and operation of their performance compensation systems.

Non-Executive Director Nominating Committee

The Non-Executive Director Nominating Committee regularly manages the pool of non-executive director candidates and nominates candidates to the general shareholder meeting.

Audit Committee Members Nominating Committee

The Audit Committee Members Nominating Committee nominates Audit Committee member candidates to be appointed at the general shareholder meeting.

Subsidiaries' CEO Director Nominating Committee

The Subsidiaries' CEO Director Nominating Committee regularly manages the pool of subsidiary CEO candidates while establishing and revising management succession plans concerning subsidiary CEOs.

CEO Nominating Committee

The CEO Nominating Committee regularly manages the pool of group CEO candidates, and is mandated to develop and revise management succession plans for the group CEO and implement the CEO succession process.

ESG Committee

The ESG Committee serves as the top decision–making body to develop and approve group–wide ESG–related strategies and policies and to monitor and supervise their implementation.

2019 The Board of Directors Meeting: Major Resolutions and Other Achievements

In 2019, the board of directors met 14 times to deliberate on 24 decision items and 33 reporting items. The board of directors decided on the 'Issuance of write-down contingent convertible bonds' as a hybrid instrument to improve the group's capital adequacy in March, and decided on the 'Retirement of treasury shares', for the first time as a bank holding company, to elevate shareholder & corporate value. Furthermore, another decision was made on 'Equity acquisition of Cambodia's microfinance deposit-taking institution by KB Kookmin Bank, which ultimately broadened the group's retail network in Southeast Asia.

At regular the board of directors meetings held on a quarterly basis, directors were briefed of business results and discussed the pending issues of the group. At the ad-hoc meeting hosted in December 2019, management plans and budgets for 2020 were finalized.

Plans for 2020

KB Financial Group aims to establish a stable corporate governance and lay the basis for quality–focused management over the mid to long term in order to promote sustainable growth, enhance corporate value, and protect the interests of shareholders and other stakeholders. In 2020, KB Financial Group vows to further elevate its corporate value and shareholder value through a reasonable and transparent decision—making.

Risk Management

KB Financial Group is focused on improving group risk transparency, preventing risk transfer among subsidiaries, and proactively responding to the rapidly-shifting financial landscape in an aim to efficiently support its mid to long-term strategy and business decision-making.

001 Introduction

Risk Governance

The Risk Management Committee is mandated to set risk management strategies, determine acceptable levels of risk appetite, review the status of group-wide risk management, and approve the application of risk management systems, methodologies and major improvements.

The Risk Management Council consists of Risk Management Officers from the holding company and subsidiaries, and is responsible for deliberating on the matters delegated by the Risk Management Committee and consulting on detailed risk management issues.

The Risk Management Department of the holding company monitors and manages the status of group–wide risk operations and the limits of internal capital by developing risk management policies and operating relevant processes.

Credit Risk Management

KB Financial Group defines credit risks as expected and unexpected losses that may occur due to the default or declining creditworthiness of the counterparty.

Credit Policy Direction

KB Financial Group develops credit policies in consideration of the economic outlook, business conditions, asset quality trends, and risk management capabilities, and operates sector–specific loan policies accordingly in household, corporate, and credit card sectors. The

primary goal of its credit policy is to maintain asset quality and minimize mid to long-term credit cost volatility in order to maximize the value of KB Financial Group.

Credit Risk Measurement & Management

To measure credit risks related to Capital at Risk or CaR concerning on/off balance sheet assets, KB Financial Group takes the Internal Ratings Based Approach developed in compliance with supervisory standards. CaR calculated as such refers to the maximum possible losses from business operations that may arise at a certain confidence level due to changes in creditworthiness of the borrower or counterparty. Our CaR calculations reflect any possibility of insolvency on the part of the borrower, possible losses and remaining maturity of exposure, and economic correlations. Furthermore, we identify, measure and monitor credit concentration risks that may additionally occur due to the disproportionate focus on specific borrowers or sectors within the group-level portfolio.

Total Exposure Limit Management

KB Financial Group's Total Exposure Limit Management System aims to prevent excessive risk exposure and risk concentration in specific sectors and optimize the credit portfolio through stable asset management. The Risk Management Department of the holding company is responsible for periodically monitoring our total exposure limit and reporting outcomes to the Risk Management Committee.

Market Risk Management

KB Financial Group defines market risks as possible losses from its trading positions in line with interest rates, exchange rates, stock prices and other market fluctuations, and identifies, measures, monitors, controls and reports such market risks inherent in bonds, foreign currencies, securities, and derivatives. Serving as an indicator to quantify the risks inherent in trading accounts, Market VaR(Value at Risk) refers to the maximum possible losses that may occur within a certain period of time at a certain confidence level. Our subsidiaries that operate trading accounts verify the adequacy of our VaR model through the daily comparative analyses performed on actual and virtual profits/losses and VaR calculations. For assets or subsidiaries to which this model is not applicable, KB Financial Group utilizes its standard methodology in compliance with supervisory regulations to manage market risks.

Interest Rate Risk Management

We defines interest rate risks as possible decreases in net asset value or Net Interest Income(NII) attributable to unfavorable fluctuations in market rates. The goal of interest rate risk management is to comprehensively manage our assets and liabilities to maximize our net interest income within the acceptable risk range while minimizing any losses in net interest margins that may occur due to changing interest rates.

Liquidity Risk Management

We defines liquidity risks as risks that may arise due to maturity mismatches or any failure to respond to unexpected demand and supply of funds. A systemic approach is taken to manage liquidity risks to meet the demand for cash outflows – deposit withdrawals, the pending maturity of financial bonds, and the repayment of borrowings – while securing liquidity for asset management including lending and bond investments.

Operational Risk Management

We defines operational risks as any and all financial and non-financial risks that may negatively impact its capital management through business operations. Our operational risk management aims to satisfy the regulatory purposes of supervising authorities and to disseminate a risk management culture across the board through strengthened internal controls and improved processes.

Internal Capital Management

Internal capital is required to prevent economic insolvency caused by unexpected losses at the target confidence level. KB Financial Group manages group—wide capital adequacy by measuring, allocating, and managing the internal capital of respective subsidiaries. The Risk Management Committee sets group—level risk appetite and then allocates internal capital by risk type and subsidiary while each subsidiary conducts business within the allocated capital limit.

Stress Testing

Stress tests are performed to analyze the potential vulnerabilities of our portfolio and develop countermeasures accordingly under possible scenarios created based on economic forecasts. KB Financial Group conducts such tests at least semi-annually and sometimes more frequently by reflecting economic cycles and prospects in order to analyze how its operations may be impacted by abrupt changes across the business landscape and to respond to them proactively. Test results are reported to the top management and the Risk Management Committee to help set group-wide risk appetite and limits and promote the decision-making process.

Basel III Internal Ratings Based Approach for Group Credit Risk Management

Following the introduction of the Basel III framework by the Korean Financial Services Commission, KB Financial Group fully prepared the development of the necessary human/physical infrastructure to address such regulatory changes and has adopted these Basel standards in calculating its risk-weighted assets and capital adequacy ratios since December of 2013.

To elevate the level of risk management across subsidiaries, we developed the group–level, single model–based Internal Ratings Based Approach approved by the Korean Financial Supervisory Services through rigorous assessments, which has been under operation since the end of 2016 to calculate group–wide BIS ratios.

This approach is expected to further advance KB Financial Group's risk management system spanning from risk management methodology and system development to data management and control structure, and establish a risk management culture in addition to improving its capital adequacy, which will in turn strengthen its risk management performance, increase global creditworthiness, and enhance the quality of its business operations across the board.

2020 Risk Management Directions

With escalating possibilities of a prolonged global economic slowdown, the domestic economy is also forecast to suffer a continued downturn cycle caused by structural factors that perpetuate low growth. Our awareness of these deteriorating conditions at home and abroad and their resulting potential risks that may threat our endeavors to improve soundness and profitability as a financial institution, helps our risk management focus on minimizing such risks.

As such, KB Financial Group will strengthen the monitoring of subsidiaries so that they maintain their asset quality at the highest possible level among industry peers while promoting proactive risk management of respective subsidiaries concerning volatility in interest rates, exchange rates, stock prices and other market factors to fully address uncertainties in the market. Our risk management will also be further enhanced through proactive response to and monitoring of subsidiaries advancing into the global market and launching new businesses

317 Appendix

Emerging Risk Management

KB Financial Group defines emerging risks as possible upcoming risks posed by economic, environmental, and social changes which may have a grave long-term impact on its business operations, and takes proactive countermeasures to reduce such risks. Primary emerging risks that we identified include "demographic changes caused by low birth rates and aging populations" and "changes in our way of conducting business driven by the innovation of digital finance". The following illustrates the detailed definition of these risks, their long-term impact on our business, and our countermeasures.

Population aging and other demographic changes are expected to cause decreases in savings rates and in income levels as elderly borrowers become economically inactive, which will ultimately deteriorate our asset quality.

While financial institutions may create innovation–driven growth opportunities through new technology and financial innovation, they may fail to swiftly respond to such changes or be left behind while facing increasing risks in relation to IT, information protection and fraud that may arise with emerging new technology and innovative finance.

The asset quality analyses performed on household credit loan borrowers by age group demonstrate that asset quality deteriorates with age.

New technology or new finance driven by digital financial innovation is widely penetrating the entire value chain of the traditional financial business to change the way we conduct business and create new business models, products and services.

Risk Reduction Countermeasures

As the average age of borrowers in our loan portfolio is forecast to increase to face a high probability of income reduction, we are proactively refining our risk management process in preparation for any decline in asset quality caused by the decreasing income levels of the elderly (e.g. operating credit guidelines that consider borrowers' income and debt burden levels by life cycle stage)

We are taking a stronger proactive risk management approach by intensively analyzing and identifying potential risks and developing countermeasures in preparation for the emergence of new risks from digital financial innovation while fully utilizing new technology from big data to machine learning in improving our risk management infrastructure in order to elevate our core competitive edge in risk management.

Synergy Creation

KB Financial Group is wholeheartedly committed to further improving the intrinsic competitive edge of respective subsidiaries, maximizing synergy through organic collaboration and delivering differentiated and unique comprehensive one-stop services. In 2019, we took a broad range of actions to efficiently create synergistic effects in order to practice customer-oriented management.

Group Synergy Strategy

KB Financial Group's synergy strategy aims to strengthen its competitive edge under the One–Firm philosophy to build a group structural competitive advantage. To this end, we are taking a multi–faceted approach to advancing our One–Firm culture by developing customercentric processes to enrich customer experiences, reinforcing integrated group–level marketing, and facilitating referral sales across subsidiaries. In 2020, we will identify new business areas on the basis of organic collaboration among subsidiaries, develop integrated group–wide services, and strengthen the seamless alignment between face–to–face and non–face–to–face channels to continue with our endeavors to build a stronger synergistic edge.

Building Customer-centric Processes to Enrich Customer Experience

KB Financial Group enabled customers to purchase the core services of multiple subsidiaries through connected non-face-to-face channels and developed one-stop processes to deliver its financial products, which ultimately improved customer convenience and their product purchase ratio. Our 'Star Banking' app allows customers to open their bank account and be issued credit and check cards simultaneously, and our 'Startable' app ensures that customers who open their securities account can also apply for card issuance at the same time. This has undoubtedly helped subsidiaries broaden their non-face-to-face product sales channels.

Furthermore, we opened the 'KB Easy Loan' service that allows customers to use the 'Liiv Mate' app to check their credit loan limits and interest rates simultaneously and even receive recommendations for tailored products and take out loans accordingly across the four banking, credit card, capital, and savings bank subsidiaries. This service diversified our product line—up to cater to wide—ranging customers from those with excellent credit scores to those with mid—to—low scores while streamlining the customer document submission process and adopting a user—centric UI/UX to improve customer convenience. The 'KB Car Easy Integrated Limit Check' service was also launched to assist customers in purchasing our products with greater convenience: using our used car trading platform 'KB Cha Cha Cha', customers can check their auto loan limits and interest rates, and apply for membership cards and car insurance plans across the three banking, credit card, and capital subsidiaries.

Launching Diverse Products and Services to Generate Synergy

Our wide-ranging package products aim to swiftly respond to the shifting domestic/global financial landscape represented by demographic shifts and financial consumer behaviors. These products also work to deliver financial products and services that cater to diversifying customer needs. By launching a total of four package products, including a package that emphasizes the social trends of 'women, retirees, and the environment' and 'BTS Collaboration' that targets youth customers, we strive to elevate KB Financial Group's One–Firm brand and strengthen customer relationships.

Notably, our Environmental Keeper Action package designed to reflect social concerns over increasing Micro dust issues exceeded 300,000 in the number of accounts sold for nine months, and donations were made to help with urban forestation. Our KBXBTS Package II (installment savings and check card), created through collaboration with the world–acclaimed boy band BTS to build our own youth customer base, posted nearly 100,000 in the number of purchases in

- 317 Appendix

just four months following its release. KB Financial Group intends to gather customer feedback through market research and KB Tribunus Plebis to develop group-level package products that meet financial needs in a more refined manner.

Strengthening Integrated Group-level Marketing

Since we became the first financial institution to establish a joint advertisement process among subsidiaries, we launched another joint mobile advertisement campaign through social network channels to continue with our efforts to strengthen integrated group-level marketing. TVs, digital windows and ATMs installed at our bank branches that are easily accessible by our customers will readily provide information on the products and services offered by our securities and insurance subsidiaries to further broaden synergistic activities undertaken among subsidiaries.

Furthermore, we became the first Korean financial holding company to create promotional contents that publicize the features provided by the major mobile apps of five of our subsidiaries – KB Kookmin Bank's Liiv Talk, KB Securities' M-able, KB Insurance's Mobile Direct, KB Kookmin Card's Liiv Mate, and KB Capital's KB ChaChaCha – in order to produce a joint video commercial available on social network channels. The commercial presented a single story that illustrated how to use the respective apps provided by five subsidiaries, and its script was written in a movie scenario format in order to increase viewer ratings. This video commercial received a total of 2.41 million views of Youtube, as of December 2019, and contributed to solidifying our corporate image as a youthful and vibrant business that is willing to pursue change and try something new.

Facilitating Referral Sales and Disseminating the One-Firm Culture

As a way to facilitate referral sales, we migrated subsidiary–specific synergy management systems into an online version to improve the convenience of field sales operations, and expanded employee exchange programs across subsidiaries to further disseminate our One–Firm culture. Notably, the recently renewed group–wide 'Synergy Performance Management System(2.0)' was customized with an aim to increase employee convenience: the system makes it easier to identify and manage employees' synergy activities and utilizes a digital window to streamline the process to request referral sales consent, laying the basis to promote referral sales among subsidiaries.

In addition, 'Department Head Community' and 'Synergy RM Workshop' are operated to promote interactions among employees across subsidiaries and share major issues related to synergy creation, paving the way for subsidiaries to collaborate on key group—wide initiatives.

Number of Active Cross-selling Customers

10,283 thousand

Reach 10,283 thousand of cross-subsidiary customers, up by 333 thousand from the previous year to significantly expand the customer base

Digital Finance

KB Financial Group takes a customer–centric approach in its pursuit of digital innovation. In November 2019, KB Financial Group became the first–ever financial institution to launch its hybrid service dubbed "Liiv M" that combines finance with telecommunication, demonstrating its full commitment to broadening KB's financial ecosystem and developing a differentiated competitive edge.

Delivering an innovative customer experience through nonface-to-face channels from the customer-centric standpoint

KB Financial Group continues to advance its major platform apps – KB Star Banking, Liiv, Liiv ON/Liiv Mate/KB Cha Cha Cha – by improving their UX/UI for increased customer convenience. Notably, the 'Open Banking' service, which allows customers to register their accounts at other banks for account checks, transfers and other financial transactions, was adopted for our Star Banking, internet banking, Liiv, and Liiv Talk Talk. The KB My Money was further upgraded to help respond to the shifting data industry landscape and to strengthen our competitive edge as an asset manager. Furthermore, our Al-based customer counseling chatbot service was launched to improve user experiences from financial business counseling to financial term explanations and product recommendations.

To deliver a fresh new and convenient user experience in mobile financial transactions, we unveiled the "KB Mobile Certificate" which enables customers to log in and use their e-signatures without cumbersome physical security measures such security cards or OTPs. The KB Mobile Certificate proved to be an extraordinary success, surpassing 2.5 million users in just six months following its release in July 2019. This new certificate system is set to extend its application from our banking to other subsidiaries in the insurance, card, and securities businesses.

Pursuing diverse financial innovation through deregulatory opportunities allowed within the financial regulatory sandbox

Fully utilizing the financial regulatory sandbox provided by the Korean government, we advanced into the telecommunications business last November, becoming the first Korean financial institution to make such a move, and launched an MVNO based hybrid service dubbed "Liiv M" that combines finance with telecommunications. This service is expected to create new added value through the abundant data generated both from telecommunications and financial industries.

In addition, KB Financial Group made 18 applications to create innovative financial services in accordance with the financial regulatory sandbox, and three of them were approved including KB Kookmin Card's 'online safe payment service based on credit card points'. In 2020, we plan to make 12 additional applications to continue our pursuit of financial innovation.

Laying the basis for a KB-driven digital ecosystem through proactive collaboration with external tech players

KB Financial Group is reinforcing the competitive edge of its digital platform through collaboration with wide–ranging tech players. More than 373 open APIs were developed to support the seamless alignment between our financial services and external platforms, and CLAYON, a cloud–based innovation platform, was further advanced to pave the way to create a wide array of financial services in the cloud. Specifically, CLAYON became the first in the financial industry to pass the safety test performed on cloud service businesses. This helped to showcase its achievement in building a stable financial cloud environment that will promote external collaboration. We also upgraded our nonface–to–face log collection system to strengthen our customer behavior analytics as a way to facilitate external collaboration and the development of data–enabled digital financial services.

In January 2019, KB Financial Group and LG Group signed an agreement to conduct joint business on the basis of new digital technology: KB's bank accounts were connected with the blockchain-based local currency pilot service launched within the LG Science Park in Magok, Seoul, to create a platform that allows for real-time charging, payment, and settlement through block sharing with KB blockchain. This was followed by the signing of MOUs with such diverse IT companies as SK C&C, Atomrigs Lab, and Microsoft to develop AI, blockchain and cloud technology.

Furthermore, KB Finnacial Group operates the 'KB Innovation HUB' to identify and support startups with high growth potential. Since its launch in March 2015, the KB Innovation HUB has selected high-tech startups as 'KB Starters' for their endeavors to create innovative services, and

Number of Mobile Certificate Users

intensively nurtured them by connecting these fintech businesses with KB Financial Group subsidiaries. As tangible outcomes were achieved through this initiative over the years, the number of KB Starters reached 76, the cumulative number of partnerships amounted to 113, and investments made through CVC funds and others were valued at nearly KRW 33 billion. In July 2019, the KB Starters became the first in the Korean financial industry to partner with the global accelerator PLUG & PLAY(PNP) to advance into the global market. As such, KB Financial Group continues to support innovative businesses so that promising high–tech startups in Korea can go global and evolve into unicorn companies.

Strengthening core capabilities to advance digital transformation

To swiftly reflect varying customer needs, KB Financial Group is pursuing innovation in the way it conducts business. Diverse devices

are used to digitalize teller operations while an AI-enabled chatbot counseling service was introduced to offer easily accessible and convenient 24/7 counseling in a bid to improve work efficiency and provide high-quality financial counseling to customers. Furthermore, the adoption of Robotics Process Automation(RPA) was expanded to address simple and repetitive processes within subsidiaries, which saved a total of 754,623 hours of work during 2019.

Wide–ranging training programs were provided to assist employees in strengthening their digital competency across all digital–related areas, from digital and IT to data and information protection. The 'KB Digital Finance ACE Academy', and 'Blockchain Expert Training Course' were operated to secure a core digital workforce, and the recruitment of professionals was increased in the areas of new technology(blockchain, AI, etc.) and app design & planning.

To improve external digital communication, we operated the 'KB D.N.A(Digital Native Alliance)' and 'KB Digital Customer Advisors'. The KB D.N.A program allowed us to partner with SOPT, an undergraduate IT startup club, to identify a total of 33 necessary improvements on our major mobile platforms and improve their UX/UI by taking into account the preferences and feedback from the Digital Native generation.

Undertaking the K Project to develop our next-generation computing system

The K Project was designed to develop a next-generation computing system and thus assist KB Financial Group in successfully pursuing digital transformation. Its ultimate goal is to create an innovative IT infrastructure that combines Artificial Intelligence and big data with the cloud and other latest technologies. This project is taking a phased-in approach across six areas – marketing hubs, mobile channel, call center system, data hub, and global platform redevelopment – along with 75 subprojects. Starting with a preliminary opening at all banking branches in Korea in February 2020, this project is set for completion by October 2020.

Work is currently underway to improve the function and design of integrated terminal screens across branches and increase their system stability, build an advanced platform that supports segmented marketing to meet diverse customer needs, and replace aging infrastructure to elevate the operational efficiency of the IT system. In addition, our big data platform is being upgraded to maximize data quality and the use of analytical data, and our global system is being renovated to establish a digital banking support system.

Building an integrated KB IT center

July 2019 marked the completion of KB Kookmin Bank's KB Integrated IT Center. This center represents the concentration of all IT infrastructure and technology that have been distributed across respective KB Financial Group subsidiaries in the banking, securities, insurance, and card business, and is expected to play a pivotal role in conducting core digital business at the group level. The KB Integrated IT Center is recognized as the financial industry's top-notch "Green Data Center" equipped with global-level safety, scalability, efficiency

KB Kookmin Card's Data Sales Performance

KRW 1.5 billion

Facilitate data open lab business to raise its sales performance from KRW 252 million in 2018 to KRW 1.5 billion in 2019

and security. Its safety was further improved with the adoption of an earthquake-resistant design; the center is powered by renewable energy including photovoltaics and fuel cells; and uninterrupted power supply, biometric access control, and purpose-specific network separation contributed to establishing a stable network system.

Refining marketing campaigns through big data analytics

In 2019, a total of 674 'Smart Offering Service' campaigns were launched and a total of 2.8 million cases of real-time marketing activities were undertaken on the basis of our refined big data generated through the latest data processing technology and our real-time analytics system. Moreover, personalized customer offerings were made available by increasing the use of such data as customer behavior logs and customer/product similarities and by elaborating on our product recommendation model through machine learning-based analytics/application.

Facilitating and advancing the "Data Open Lab" business

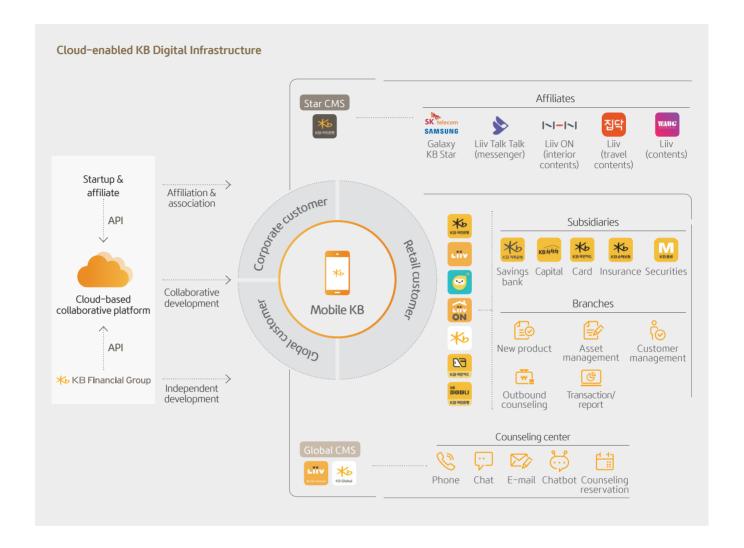

To facilitate KB Kookmin Card's Data Open Lab business, a target marketing and advertisement service business model was developed on the basis of payment data in order to diversify our efforts to identify corporate consumers of such data. This resulted in an increase of KRW 1.5 billion in data sales in 2019, from KRW 252 million in 2018. Intensive promotion of the card data business aligned with the Data Open Lab also helped increase the number of affiliated business partners from nine in December 2018 to 50 in 2019.

Plans in 2020

In 2020, the financial infrastructure will be fully open, in line with the expansion of open banking services and other financial technologies, and the introduction of 'My Data' business spurred by the passing of three major data regulations in Korea. The advancement of Naver, KaKao, Toss and other tech businesses into the financial industry is also set to further intensify competition. Amid such challenging conditions, KB Financial Group will leverage its solid customer base and unrivaled digital core competitiveness to deliver differentiated financial products and services and to pursue 'customer–centric digital finance'.

Efficiently responding to open banking, My Data, and other deregulatory trends

Our response to open banking will be to strengthen core services and streamline our UX/UI for customers. As to My Data business introduced as a result of the promulgation of three major data regulations in February 2020, we intend to take a subsidiary-specific customized strategy by offering tailor-made products and services and differentiating platform contents. As data utilization will constitute one of the key competitive components for any financial institution, KB Financial Group plans to help revitalize the data economy and improve its core competitive edge to strengthen the value chain. We will simultaneously pursue proactive convergence with data from other industries including retail, telecommunications, and healthcare to develop innovative products and services and build a comprehensive financial platform that supports customers in every area of their life.

317 Appendix

Leveraging big data to develop and sell products and services

We will further refine our customer targeting through the combination of our structured or non-structured data to broaden real-time tailormade customer marketing. To this end, we plan to build a data analytics platform and perform big data analyses through wide-ranging channels in order to create new added value. A data governance system will be developed to improve data user convenience, and the use of data assets will be upgraded through improved accessibility. Customer Mind Research that uses search data will be conducted to plan personalized contents and identify new contents based on the intention of potential customers, and a KB data collaborative platform will be created as a new type of data-enabled collaboration system. By fully implementing 'Liiv M', our MVNO-based finance-telecommunication hybrid service unveiled in the 2nd half of 2019, we plan to secure new customers and differentiate our platform service. Furthermore, we will strengthen the group-level alignment of financial products and services and leverage the KB Mobile Certificate and USIM to reinforce the connection of mobile platforms across subsidiaries.

Using digital technology to improve efficiency

We will continue to identify the new applications of RPA while combining RPA with wide-ranging digital technologies to improve work efficiency. The Integration of RPA with AI and other digital technologies will help extend the scope of RPA introduction and automate front office operations. Meanwhile, The K project will enable us to deliver an innovative experience to customers and efficient work conditions for employees. To flexibly respond to the rapidly-shifting financial landscape, we plan to establish a horizontal and efficient corporate culture and strengthen internal training to develop a professional IT technology workforce.

Furthermore, cloud, blockchain and other varying digital technologies will be combined to facilitate open innovation and push the boundary of financial services. CLAYON will be equipped with a multi-cloud architecture structure through our contract with AWS and other global cloud service providers to improve its performance while reinforcing its stability.

Global Business

KB Financial Group takes a multi-faceted approach to strengthen its global business capability and position. We leverage the assets owned by respective subsidiaries and the business capabilities we have developed in retail banking and other diverse areas while comprehensively considering new types of market entry made available with the development of digital technology in order to broaden our global business presence in a way that suits country-specific market conditions.

Over the years, KB Financial Group has advanced into digital banking, auto financing, MFI, and securities businesses in Cambodia, Laos, Myanmar, Vietnam, and Indonesia to further understand and experience these Southeast Asian markets. While we strike the right balance between organic growth based on our existing network and inorganic growth promoted through subsidiary-level M&As to effectively use our resources, we also focus on a limited number of hub candidates, rather than multiple countries, to transform these target countries into our 'Mother Markets'. In parallel, we also opened IB Units in Hong Kong, London and New York as our regional IB operation hub to broaden our business line-up in mature markets and explore diverse global market entry options. As such, we follow a two-track strategy to tap into both emerging and advanced markets.

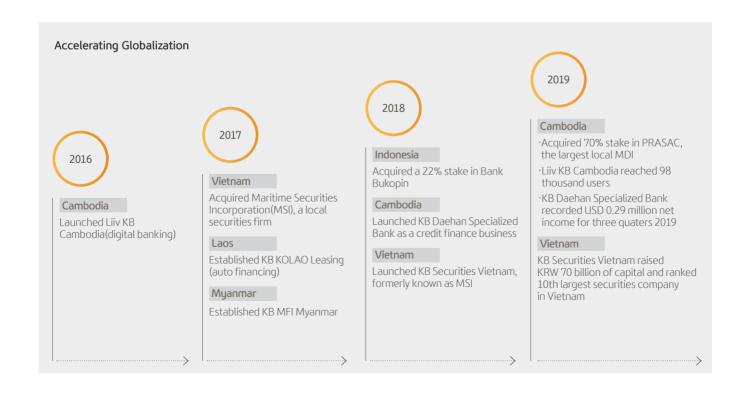

In October 2019, KB Financial Group signed an MOU to form a strategic alliance with Stifel Financial, a U.S.-based firm with multiple subsidiaries in the securities, banking, and asset management businesses, to promote mutual investment cooperation. This will serve to develop a close collaboration system in each other's business areas – CIB, WM,

and asset management – and jointly explore diverse collaborative and new business opportunities. Starting with U.S. stock brokerage and research that draws growing interest from domestic institutional and retail customers, our collaboration will extend its scope into other areas including but not limited to IB deals, financial investment product sourcing, and PI investments.

In January 2020, KB Kookmin Bank signed a stock purchase agreement to acquire a 70% stake in PRASAC Microfinance, Cambodia's largest Microfinance Deposit-taking Institution(MDI). With a local network of 117 locations, PRASAC represents the nation's largest MDI and is ranked third in loan market share. KB Kookmin Bank plans to transform PRASAC into a commercial bank to transfer its exceptional retail capabilities and help PRASAC evolve into a leading bank in Cambodia in order to broaden its business presence in Southeast Asia.

KB Kookmin Bank's Hanoi Office in Vietnam and its Gurugram Office in India were transformed into branches following the preliminary approval granted from the local financial authorities, and initiated their operation in February 2019. Specifically, we are keeping an eye on the Indian market as India is home to the world's second largest population, is posting continued high economic growth in the 7% range, and is rapidly growing its trade with Korea, and we plan to continuously expand our branch network in the country to accelerate our advancement into the Indian market.

KB Securities' local Vietnamese subsidiary KB Securities Vietnam(KBSV) opened its 4th Vietnamese branch in Saigon in January 2019, and

001 Introduction 026 Core Competency 048 Management's Discussion & Analysis 053 Operation Review 074 Financial Section 317 Appendix

increased its capital by nearly KRW 70 billion to join the top 10 local businesses based on the size of equity capital, KBSV plans to focus on its retail operations and strengthen IB capabilities and improve S&T profits as part of its growth strategy through collaboration with KB Securities head office in Korea.

In November 2019, KB Kookmin Card signed a stock purchase agreement to acquire an 80% stake in 'PT Finansia Multi Finance', a local Indonesian credit finance company conducting business in auto, motorbike, and durable goods installment financing in Jakarta, Indonesia. KB Kookmin Card plans to expand installment financing products that cater to local customer needs to focus on high-quality assets while partnering with local mobile platform operators to expand digitally-based non-face-to-face operational channels.

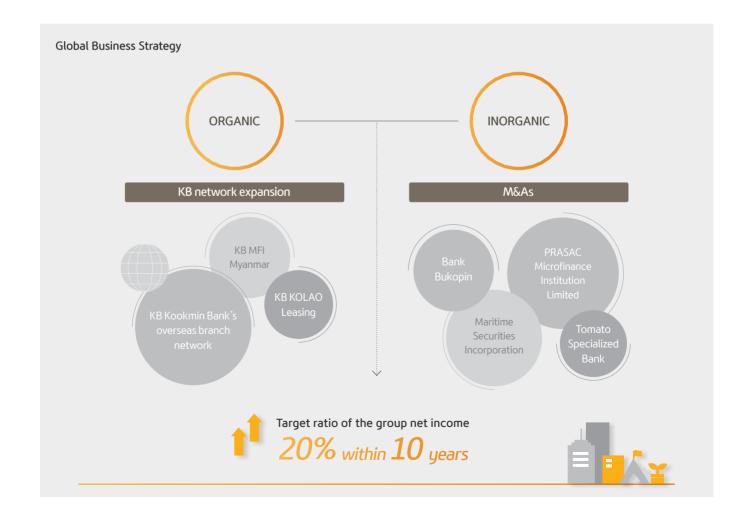

In February 2019, KB Capital signed an agreement to acquire an 85% stake in 'PT Sunindo Parama Finance' in Indonesia. This will enable KB Capital to expand its installment finance business from new car purchases into used cars and consumer goods as well as the car rental business.

Plans in 2020

To expand its global business presence, KB Financial Group will follow a two-track strategy to focus on 'Southeast Asia expected to achieve high growth' and 'U.S. and other advanced markets known for their high investment stability and favored by Korean customers as an overseas investment destination'.

In Southeast Asia, we will target Vietnam, a country posting rapid economic growth and attracting numerous Korean businesses, Indonesia, the region's largest market, and the three countries of Myanmar, Cambodia, and Laos situated along the Mekong River. To broaden our global business in these countries, we will continue with M&As on the subsidiary level and pursue the organic growth of the existing network.

In the U.S. and other mature markets, our market entry and expansion strategy will focus on 'securing stable growth drivers across the group portfolio' and 'developing global capabilities in the WM/CIB/asset management sectors'.

Global Network

KB Financial Group is accelerating its advancement into the global market to overcome the growth limits in the domestic financial market, pursue sustainable growth, and realize its value creation potential. Notably, these endeavors to expand our global presence are focused on CIB, retail banking, digitalization, and asset management, and a business-specific approach is taken in consideration of a full range of factors, from local regulatory environments and demographics to financial industry infrastructure and growing offshore investment demand among domestic investors.

ESG Management

In pursuit of responsible finance that cares for the environment and society, KB Financial Group adopted ESG standards across the entire business conduct to establish and operate a sustainability management system. We have set the three key strategic directions of promoting ESG-based innovative growth for sustainable finance, advancing our climate change strategy for the environment, and internalizing accountability management, and are committed to fulfilling our role as a financial leader in ESG management both in Korea and abroad.

Strengthening global ESG leadership by proactively endorsing international initiatives

KB Financial Group is committed to fulfilling its leading role in ESG by proactively joining global initiatives and international organizations. In September 2019, we signed up for 'The Principles for Responsible Banking' of the UNEP Finance Initiative (UNEP FI), which were presented to the banking industry to reach the social goals set under the UN Sustainable Development Goals and the Paris Agreement.

We are the only Korean financial business to join the 'UNEP Collective Commitment to Climate Action' which, as a follow-up implementation program for the signatories to the above-mentioned principles, was attended by 31 institutions to take climate-friendly actions by reducing carbon-intensive business in corporate operations while increasing the ratio of green business. In addition to the UNEP FI, we are also actively participating in the UN Global Compact, Carbon Disclosure Project, Task Force on Climate-related Financial Disclosures and other global initiatives on sustainability management. We have also recently assisted in the development of the UNEP FI and EU Taxonomy guidelines for banks designed to adopt a global green investment classification system in performing banking credit reviews.

Furthermore, we officially endorsed the Women's Empowerment Principles (WEPs) to create a corporate culture that respects gender equality, inclusiveness and diversity.

Pursuing sustainable finance by playing a leading role in the ESG financial market

KB Financial Group is an active player in undertaking renewable energy projects, and is working to make our society greener. Since 2007, we have served as a financial advisor and syndicated loan underwriter on wide-ranging renewable energy projects including photovoltaics, wind, and fuel cells. As a leading financial institution in the renewable energy sector, we were chosen as a financial advisor and lead arranger for such large-scale renewable power generation projects as Jeju Hanlim offshore wind, Solaseado photovoltaics, Yeongam PV Power Plant, and Incheon fuel cell power generation.

KB Securities created a blind fund with a Canadian investment and management company with expertise in the resource and energy sector and is conducting a PV power generation business following the acquisition of the required business license. KB Asset Management has increased its renewable energy investments since 2007 to surpass KRW 1 trillion in cumulative investments in the offshore PV, biogas and PV-connected energy storage system business while investing in the overseas PV power generation business and actively advancing into the global market to diversify its investment destinations.

As climate change, ranging from global warming to Microdust issues, is exerting an even greater impact on our life today, KB Financial Group is developing a range of green financial instruments.

001 Introduction 026 Core Competency 048 Management's Discussion & Analysis 053 Operation Review 074 Financial Section 317 Appendix

Included in the eco-friendly product portfolio provided by KB Kookmin Bank are the 'KB Clean Sky' package which consists of installment savings and trust to help resolve microdust issues, 'environmentallyresponsible investment fund offerings' that invest in companies with solid ESG performance to pursue long-term profits, 'KB Green Growth Loans' that benefit green growth companies through prime rates while donating a portion of the profits to green growth associations, green loan products such as energy use rationalization funds and environmental industry promotion funds, and 'Preferential Loans for PV Power Plant Businesses' eligible for green power generators.

KB Kookmin Card's Green Card allows consumers who purchase ecofriendly products to accumulate eco-money points as a way to pursue green finance. KB Life Insurance developed the Environmental Love Hospitalization Plan (non-participating term insurance) that covers hospitalization caused by diseases stemming from the environment. KB Insurance included special provisions that offer discounts on the use of public transportation, low mileage and the consumption of green automobile parts. KB Asset Management delivers diverse funds that support the growth of the domestic and international renewable energy industry to expand group-wide green business investments while practicing eco-friendly management by launching sustainable finance products, taking the lead in improving corporate competitiveness and fulfilling social responsibility.

KB Kookmin Bank established a sustainable finance management system to strengthen its support for eco-friendly and sociallyresponsible business. Not only does this system comply with the 'Sustainability Bond Guideline' developed by the International Capital Market Association, but also is recognized for its excellence as demonstrated by the evaluation report prepared by the worldrenowned ESG financial consulting firm 'Sustainalytics'. KB Kookmin Bank became the first-ever Korean commercial bank to issue sustainability bonds in October 2018, and then successfully priced a sustainability subordinated bond offering in February 2019.

This issuance garnered much attention from investors and overseas media outlets as the bank became Asia's first to offer such sustainability subordinated bonds. Their proceeds were used to finance qualified investment projects and extend loans designed to assist sociallyvulnerable groups and create jobs for these individuals, develop renewable energy, and support the environmental improvement business.

Elevating our reputation as a corporate leader through strategic response to international sustainability management assessments

KB Financial Group was included in the 'DJSI World Index', the globallevel index among the Dow Jones Sustainability Index family, for four consecutive years in recognition of its strong commitment to fulfilling ESG responsibility. The DJSI is globally accepted for its credibility in evaluating corporate sustainability management performance, and the

index family consists of DJSI World as the highest level index, DJSI Asia Pacific, DJSI Korea, and others.

Furthermore, we obtained 'leadership A-' in the 'Climate Change 2019' published by the Carbon Disclosure Project (CDP) known for its credibility in the environmental sector. Through sustained commitment to gender equality, we became the first Korean business to be listed on the Bloomberg Gender-Equality Index for two consecutive years for our efforts in building a corporate culture that promotes gender equality through female leadership and talent development.

In Korea, we were granted an overall A+ in the '2019 ESG Evaluation by the Korea Corporate Governance Service', which shows that our top-notch performance in sustainability management is widely acknowledged both internally and externally.

Publishing the 2018 KB Financial Group Sustainability Report

KB Financial Group ensures efficient communication on its sustainability management capabilities through the disclosure of key material issues and management data. KB Financial Group publishes sustainability reports by reflecting the outcomes of surveys conducted on internal/ external stakeholders concerning wide-ranging sustainability management issues as well as those material issues identified through the materiality test.

Notably, the 2018 KB Financial Group Sustainability Report illustrated material issues on customers, innovation, environment, social responsibility, and employees, its sustainability management system spanning governance, business ethics, integrated risk management, and human rights management, and its sustainability management achievements in relation to customers, local communities, environment, employees and economy. In so doing, we disclose our performance in the areas of management, environment, safety, and society to strengthen our communication with investors, shareholders, customers and other stakeholders and earn their trust.

Adopting the Stewardship Code to enhance our corporate value and investor benefits

KB Financial Group adopted the Stewardship Code as part of its fiduciary duty policy for the six major subsidiaries of KB Kookmin Bank, KB Securities, KB Insurance, KB Life Insurance, KB Asset Management, and KB Investment. This allows us to reflect non-financial ESG components as well as financial ones in measuring corporate value in order to strengthen our role as a fiduciary in inducing the growth of our investees and increasing mid to long-term returns on customer assets. Furthermore, we developed our conflicts of interest policy to prevent the occurrence of such conflicts in fulfilling our fiduciary duty while implementing internal control regulations and compliance manuals to uphold the principle that investor interests take precedence over the interests of KB Financial Group, its shareholders and employees and that the mutual interests of investors should be equally addressed. In faithfully performing our fiduciary duty as a shareholder, we make our voices heard in business conduct and facilitate the maximization of shareholder interests while ensuring the robust operation of market surveillance mechanisms. In so doing, we help change corporate governance for the better and increase corporate value, ultimately advancing the rights and interests of our customers.

ESG Strategy Directions in 2020

Pursuing ESG-driven innovative growth for sustainable finance

KB Financial Group aims to extend the application of its ESG factors in its products and services to drive sustainable finance. To continue our endeavors to promote innovative growth in the ESG sector, we will focus on the following initiatives: 1) expand ESG-based products, including green renewable energy investment instruments, 2) Pursue inclusive finance aimed at protecting financially underserved groups and providing them with stable financial services, 3) integrate advanced ESG factors to examination of loans and investments.

Advancing our climate change strategy for the environment

We will advance our climate change strategy to address continuously emerging environmental issues. We intend to take the lead in creating green finance ecosystem: 1) we will control carbon emissions by setting reduction targets, systematically managing data and monitoring reduction outcomes 2) we will manage environmental risk by identifying climate change–induced risk factors and opportunities and communicating with internal/external stakeholders 3) we will form partnerships to proactively respond to climate change.

Internalizing responsible management for better society

We continue to fulfill our social responsibility and create value by embedding responsible management into our day-to-day business operations. We plan to expand ESG-aligned social contribution programs to create social impact and to advance the business capabilities of SMEs, suppliers, innovators, and startups to ensure shared growth and co-prosperity with them. KB also makes a concerted effort to improve employee welfare, ensure safe working environment, and respect diversity, thereby implementing inclusivity and social responsibility.

Social Contribution

With the mission of "Financial Services Delivering Changes-Happier Life & Better World", KB Financial Group undertakes wideranging social contribution initiatives to fulfill its social responsibility and become a sustainable financial institution that grows hand-in-hand with society. Any and all social contribution initiatives of KB Financial Group are founded upon the CSR system illustrated below, and respective subsidiaries implement strategic social contribution programs on the basis of group-wide core business areas.

Fostering Future Generations

Supporting the growth base for youths and multicultural families

Since the establishment of the holding company in 2008, KB Financial Group has consistently launched social contribution programs to lay the basis for children and teens to grow into healthy members of society, and is taking the lead to support multicultural groups to bring inclusiveness and diversity to our society.

We signed a business agreement with the Ministry of Education in 2018 to help 'fill the void of care', a chronic and challenging social issue,

as one of our key focus areas in fostering future generations. Under this agreement, we will provide a total of KRW 75 billion by 2022 to establish and expand elementary afterschool care spaces and national kindergartens situated next to elementary school. Our assistance allowed numerous students to receive care services, and this is expected to bring positive ripple effects, from the early reinstatement of parents whose career was discontinued due to childcare burdens to the creation of new jobs at afterschool care facilities. As of last year, we helped create 976 afterschool care classrooms at 639 schools, and we will increase the number of these classrooms to 2,500 by 2022 to benefit more than 50,000 children.

We provide a range of educational programs to bring hope to future generations so that they can pursue their dreams. With 'mentoring' as the key agenda, KB Kookmin Bank is implementing a systemic CSR business portfolio: 'Mentoring for Learning' targets teens from low-income or multicultural families who often lack learning opportunities to provide one-on-two mentoring, English learning, and scholarships; 'Mentoring for Career Path' offers diverse career experience programs to help these teens make a suitable career choice; 'Mentoring for Digital Future' aims to nurture creative talent desired by the 4th Industrial Revolution era. KB Securities and KB Insurance help improve the learning and residential environment for children and teens from low-income families while KB Kookmin Card provides arts, music and sports educational programs to children with disabilities to help them stand on their own feet.

KB Financial Group offers continued support for 'Korean learning' as it constitutes an essential component in helping multicultural individuals adapt to Korean society, and assists them in obtaining the qualifications required for employment and receiving vocational training. Notably, our 'KB Rainbow Love Camp' and 'Multicultural Understanding Classroom' have been established as one of KB Financial Group's unique programs that allow these children to expand their horizons and increase mutual understanding and exchange. We also care for North Korean adolescent refugees by supporting their school facilities and offering education to help them gain personal identity, which will surely contribute to their becoming a healthy member of our society.

Our social contribution initiatives also include 'economic & financial education' that leverages our competency as a financial institution. Since the establishment of the 'KB Foundation' as a non-profit foundation, we have provided wide-ranging economic and financial education programs over the past decade to make these programs a major part of our social contribution activities and to present new directions for economic and financial education through different programs and teaching methods that cater to changing social needs. The foundation created a group of professional instructors for economic and financial education to visit elementary/middle/high schools, military units, and big supermarkets to offer education

and operate itinerant learning sessions and economic education camps. 'Liiv School' opened as an experience–based learning center in Suncheon, Jeollanam–do and has been under year–round operation, and the contents for social networks were created through collaboration with undergraduate students to deliver customized economic and financial education to future generations. As of last year, KB Financial Group's economic and financial education benefited more than 172,000 people.

Creating Greater Social Value

Supporting the resolution of social needs and shared growth with local communities

KB Financial Group makes use of the inherent characteristics of respective business areas based on its wide-ranging business portfolio that include banking, securities, and insurance with an aim to create greater social value. .

We formed a social investment fund with K–Growth to create a social financial ecosystem that nurtures social enterprises and promotes their self–reliance. Valued at KRW 100 billion, this fund invests in social enterprises capable of creating a positive impact in the areas of society and environment in compliance with the UN SDGs. These investments are made in social ventures that generate meaningful social impact as well as certified social enterprises to pursue both

Investment in KB Social Investment Funds in 10 companies Operate social venture funds to pursue both social benefits and financial profits "KB Good Job" hosted on 16 occasions with cumulative **317.100** visitors Serve as a venue for job matching by linking outstanding SMEs with job seekers

social and financial outcomes. As of 2019, the 'KB Social Investment Fund' invested in 10 enterprises and its investments amounted to KRW 10 billion. In August 2018, KB Investment which manages the venture capital business of KB Financial Group also created the 'KB Social Impact Fund' worth KRW 15 billion in conjunction with the Korea Fund of Funds to help promote social enterprises.

Our 'KB Good Job' program has been under operation since 2011 to help create high-quality jobs. The KB Good Job website contains a variety of employment information as well as consulting information regarding CV and interview preparation to offer substantial assistance to young job seekers. As of the end of 2019, nearly 59,000 cases of employment information were made available through KB Good Job. The annual 'KB Good Job Fair' has been hosted to bring together profitable small and medium sized businesses and job seekers: it has been held 16 occasions over the years, the cumulative number of visitors amounted to 317,100, and 10,800 cases of job placement have been recorded to make it the largest job fair supervised by a private business in Korea. In particular, businesses who hire during the job fair period and retain employment for a designated period of time are provided with grants to encourage their recruitment and guarantee stable employment. 'KB Good Job Academy' and 'KB Good Job School' are also operated to improve job seekers' employment capabilities and help resolve unemployment issues.

As recently emerging environmental issues require our concerted efforts among governments, people and businesses, KB Financial Group is taking the lead in fulfilling its social responsibility through varying eco-friendly social contribution programs. The 'KB Kookmin Bank Forest' was created in Mongolia, where yellow dust and microdust originate from, to lower microdust levels while air purifiers were installed at local children's centers as microdust poses higher risks to children. Educational books were also published in line with this initiative and environmental education was provided to teens to help them develop a sense of stewardship towards the environment. Furthermore, eco-friendly financial instruments are developed to engage customers in our social contribution initiatives. We've become the first in the financial industry to release the 'KB Clean Sky Financial Package' to encourage consumers to voluntarily help in resolving microdust issues: donations raised through its proceeds go to create forests in urban areas and provide eco-friendly condensing boilers to welfare facilities. In so doing, we conserve the environment for our future generations and create a sustainable society.

KB Financial Group also endeavors on diverse fronts to pursue shared growth with the global community. KB Kookmin Bank offers health care services to immigrant workers living in Korea and helps Cambodian children suffering from heart disease pay for their surgery, and since 2008, 527 undergraduates have joined its global volunteer group 'RaonAtti' to volunteer in less-developed countries. KB Securities initiated the Rainbow Classroom program to create a quality learning environment for teens in underdeveloped countries, and KB Insurance launched 'Lighting Children' as a green energy sharing campaign to encourage its employees to assemble photovoltaic lanterns and donate them to countries suffering energy shortages to help local children enjoy better living conditions. KB Daehan Specialized Bank, KB Kookmin Card's Cambodian subsidiary, signed a business agreement with the local social enterprise 'SmartCraft' to use its upcycling products as promotional gifts given to customers worth USD 10,000, taking a continued journey for shared growth with the international community.

Major Social Contribution Initiatives by Subsidiary

KB Kookmin Bank

KB Kookmin Bank's wide–ranging social contribution initiatives aims to encourage the healthy growth of teens and nurture future talent. Its leading social contribution program named 'KB–Mentoring youth!' consists of mentoring and support projects in the three areas of Learning, Career Path, and Digital Future: Mentoring for Learning provides learning support for teens from low–income/multicultural families who often lack educational opportunities; Mentoring for Career Path assists teens in attending diverse career experience programs; Mentoring for Digital Future supports coding education and other software education programs.

In the five key areas of 'Dreaming Youth, Green, Global, Neighbor, and Culture', a wide range of programs are implemented by offering economic and financial education, launching environment–linked products, and providing health care support for immigrant workers.

Employee Volunteer Hours

16,000 hours

KB Insurance operates 190 volunteer teams that consist of employees and sales agents to undertake a range of campaigns and social-giving programs across local communities.

KB Kookmin Card supports teens with disabilities including 91 teens in arts and 150 teens in sports to provide a systemic educational opportunity.

KB Securities

Under the slogan 'Wholehearted, Warm KB Securities', KB Securities undertakes varying social contribution programs in the areas of 'organizational culture of sharing and participation', 'youth & multicultural family' and 'community-friendly social contribution'. As its leading social-giving program, the 'Rainbow Classroom' aims to create a favorable learning environment for underprivileged youths by renovating learning spaces, creating a library, and donating books. Since 2009, this program has benefited 12 schools in Korea and three schools overseas, and opened the 15th Rainbow Classroom at the Saemsotneun Children Center in Seoguipo City, Jeju Island, in 2019. Included in other social contribution activities are the 'Hands-On' programs designed to donate homemade items, ranging from 'KB facial masks' and 'filial piety carnation flowers' given to seniors living alone to 'soap of life' donated to children and families in impoverished countries.

KB Insurance

With the vision of "Becoming a company delivering hope to the public", KB Insurance continues to practice sharing–focused management. Driven by the three core strategies of "intensive support for children", "community–friendly social contribution" and "organizational culture of sharing and participation", KB Insurance operates volunteer groups and improves residential conditions for children and teens, among other diverse social–giving programs. Notably, KB Insurance's 190 volunteer groups composed of employees and sales representatives proactively lent their helping hand to reach nearly 16,000 hours in volunteer hours in 2019.

KB Kookmin Card

KB Kookmin Card practices the spirit of sharing in the three areas of youth, multi-cultural family, and public interest. In the youth education sector, KB Kookmin Card provides economic and financial education every year to nearly 10,000 elementary/middle/high school students to help them develop reasonable consumption habits. The 'Fine Arts & Physical Education Program for Children with Disability' has been under operation to sponsor a total of 241 teens with disabilities, including 91 in arts and 150 in sports. also sends gift sets that consist of a backpack, school supplies, and an encouraging letter to children from low-income families who will be first graders that year, benefiting nearly 10,200 children over the years.

In the global sector, KB Kookmin Card offers Korean language education to children from multicultural families and North Korean refugees who face difficulties in learning and adapting to Korean society. Each year, 160 children receive personalized education from Korean language teachers for six hours per week. In addition, KB Kookmin Card employees have made Love T-shirts and donated them to children overseas since 2017, and its labor and management have jointly launched overseas volunteer activities since 2019 to extend classrooms and donate necessary equipment.

In the public interest sector, KB Kookmin Card has operated the 'Employee Love–Sharing Blood Donation' campaign biannually since 2014 to donate nearly 1,100 blood donor cards raised through the event to help children with leukemia. The company also initiated social–giving programs designed to bridge the social divide in 2019, ranging from turning non–regular workers into fulltime employees and improving working conditions to creating jobs for youth and supporting employment stability for low–income workers.

Employee Love-Sharing Blood Donation

1,100+

KB Kookmin Card donated
nearly 1,100 blood donor cards to help
children with leukemia via 'Employee Love-Sharing
Blood Donation' campaign since 2014.

All KB Financial Group subsidiaries are engaged in a wide array of social contribution programs. KB Asset Management visits senior welfare centers to help distribute meals and tidy up the facility, and designated each last Wednesday of the month as 'Day of Social Contribution' to undertake hands-on volunteering. KB Capital donates various items for underprivileged youths and has made financial donations to people who have been displaced.

KB Life Insurance offers scholarships to children whose parents work in the social welfare sector and its employees donate their blood, sign an organ donation pledge, tend to the upkeep of parks, and participate in environmental cleanups. KB Real Estate Trust offers learning guidance to children, provides vocational training and rehabilitation assistance to people with disabilities, and supports orphaned infants and toddlers. The company has helped improve the environment at the Seoul Forest since 2019 by rooting out noxious plants and clean up the environment.

KB Savings Bank has regularly sponsored and volunteered at the 'Home of St. Paul Hasang', a soup kitchen for the underprivileged, for the past seven years while supporting the livelihood of the less-fortunate in local communities and cleaning up the areas in the vicinity of its branches in order to pursue co-prosperity with local communities. KB Investment has volunteered at nursing homes every year since 2006 and is donating kimchi to multicultural families and seniors living alone. KB Data Systems visits senior welfare centers to help serve meals while making financial donations to youth residence facilities and holding just-for-fun soccer matches with teens living in these facilities. KB Credit Information offers meal services at soup kitchens, hands-on volunteering, blood donation cards, and environmental cleanups near its head office and other worksites.

Management's Discussion & Analysis

In 2019, the Korean economy slowed down due to global economic uncertainties and the continued shrinkage in domestic economic activities. In the face of these challenging business conditions, KB Financial Group strengthened its future growth driver and digital competitiveness to pave the way for its sustained growth into Asia's leading global financial group. We pursued stability and balance in asset growth to reinforce our earnings fundamental while relentlessly improving the credit portfolio with our proved conservative risk management.

As to business results in 2019, KB Financial Group's total assets rose by KRW 38.9 trillion from the previous year to KRW 518.5 trillion, which is attributable to the solid asset growth mostly focused on prime household and SME loans. Net interest income increased mostly led by quality loan growth and our endeavors to defend margins. Non-interest income also increased contributed to improvement performance in trusts and IB businesses as well as securities. F/X and derivatives. The Group's net income posted KRW 3,311.8 billion, increased by KRW 250.6 billion from the previous year. In asset quality, the group NPL ratio fell by 0.11%p from the previous year to 0.48%. This is mainly due to our continued commitment to improving credit quality of loan portfolio by increasing portion of prime quality assets while reducing potential non-performing loans and continuing preemptive and conservative risk management, Under Basel III, group BIS ratio and CET 1 ratio are to mark 14.48% and 13.59% respectively. The capital adequacy ratios of the Group and other subsidiaries have remained stable above the regulatory standards set by financial supervisors.

Asset Growth

As of the end of 2019, KB Financial Group's total assets reached to KRW 518.5 trillion, rose by KRW 38.9 trillion, 8.1% from the previous year mainly in loans and financial investments. This is primarily attributable to loans in won growth driven by retail unsecured loans and prime SME loan, by KRW 11.6 trillion over the previous year. In addition, financial investments grew by KRW 10.1 trillion from the previous year as a result of the expanded securities business at the group-level in response to the continued low interest rates. KB Financial Group's total assets including AUM posted KRW 789.6 trillion, up KRW 57.8 trillion, 7.9% from the previous year. The Group's AUM increased by KRW 18.3 trillion from the previous year driven by KB Kookmin Bank's trust and AUM of KB Securities as well as AUM of KB Asset Management.

Profitability

In 2019, KB Financial Group's net income amounted to KRW 3,311.8 billion, up by 8.2% from the previous year mainly due to robust increase in interest income in the banking and card business as well as solid growth in non-interest income, including fee and commission income from trust and IB Business, and profit from securities, FX, and derivatives.

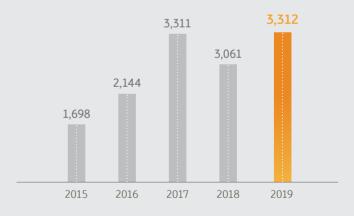

Group Profitability Overview

Group Net Income Trends

(KRW in billions)

KB Financial Group's net interest income amounted to KRW 9,196.8 billion, up by 3.3% from the previous year. This is attributed to increases in average loan balances mostly backed by the balanced growth of prime retail unsecured loans and prime SME and SOHO loans as well as to the increased contribution from the interest income generated by its card business. In 2019, net interest margin(NIM) of the group and bank stood at 1,94% and 1.67% respectively: bank NIM inched down only by 4bp from the previous year despite key rate cuts and intensifying market competition.

KB Financial Group's net fee and commission income rose by 5.0% from the previous year to KRW 2,355.0 billion as trust income of the bank and group IB business increased in spite of the significant reductions posted in securities brokerage commissions amid the sluggish stock market. Other operating profit improved by KRW 168.7 billion from the previous year mostly due to a increase in gains on valuation of bonds resulted from declining market interest rates and improvement on profits from sales & trading in the securities business, while insurance-related profits fell due to the worsening loss ratios of auto insurance and long-term insurance plans.

G&A expenses recorded a 6.0% YoY growth to KRW 6,271.0 billion: ERP costs occurred in Kookmin Bank and KB Insurance, and digitalization costs - amortizing expenses and computing work expenses - related to the digitalization initiative undertaken at the group level were recognized. In 2019, the Group cost-income ratio(CIR) remained almost unchanged from the previous year at 54.9% in line with ERP costs and increasing digitalization costs. However, on a recurring basis disregarding ERP and digitalization costs etc., CIR recorded to 50.9% presenting continued improvements in cost efficiency in line with visible cost savings from ERP and groupwide cost control efforts. As digitalization costs are forecast to increase for the time being to respond to digitalization, open banking and other changes affecting the financial landscape, KB Financial Group will continue to tighten the level of cost control by revisiting every costs groupwide on a zeo base except investment for future growth such as digitalization.

Provision for credit losses fell by 0.5% YoY to KRW 670.3 billion: while the amount of loans increased, KB Financial Group pursued qualitative growth with a focus on high-quality assets as well as preemptive risk management, which also contributed to maintaining a low credit cost ratio of 0.20%.

By subsidiary, KB Kookmin Bank's profit for the year in 2019 reached KRW 2,439,1 billion, up by KRW 179,9 billion from the previous year, as its net interest income and net fee and commission income posted solid growth. Its net interest income rose by KRW 263.1 billion from the previous year to KRW 6,363.8 billion thanks to the sustained highquality growth in assets. Its net fee and commission income inched up to KRW 1,133.3 billion mainly backed by growth in commission from trust and IB business in spite of the stock market remaining sluggish. Improvent in profit from securities, F/X, and derivatives drove its other operating income up by KRW 192.1 billion from the previous year, and gross operating income increased by KRW 465.1 billion YoY to KRW 7,319.1 billion. G&A expenses grew by KRW 120.4 billion from the previous year to KRW 3,887.4 billion mainly due to increasing digitalization costs such as amortization costs, resulting from the introduction of next-generation IT systems and other digitalization endeavors. Provision for credit losses rose by KRW 9.6 billion only to KRW 103.5 billion driven by the bank's premptive and conservative risk management to manage credit quality in spite of its growing asset size. Since growing uncertainties, including COVID 19, could result in deterioration of asset quality especially for subprime borrowers, KB Kookmin Bank will closely monitor relevant indicators and reinforce its risk management, taking a conservative stance on asset quality management.

053 Operation Review
074 Financial Section
317 Appendix

In 2019, KB Insurance's net income fell by KRW 28.0 billion from the previous year to KRW 234.3 billion due to the deteriorating loss ratios witnessed mainly in auto and long-term insurance across the industry and the increasing operational expenses caused by intensifying competition over new contract.

In 2019, KB Kookmin Card's profit for the period amounted to KRW 316.5 billion, up by KRW 29.9 billion from the previous year, which is attributable to increases in interest income generated by growing card transaction amounts, steadfast endeavors to improve cost efficiency, and expanding financial assets including installment financing and lease business.

Asset Quality

In 2019, KB Financial Group's provision for credit losses amounted to KRW 670.3 billion, which fell slightly from the previous year due to quality growth generated mainly in high–quality assets and its premptive risk management in the face of the economic downturn. Group credit cost ratio also remained at a low level of 0.20%.

Group Credit Cost Ratio(CCR)

KB Financial Group's non-performing loan(NPL) ratio improved by 0.11%p from the previous year to 0.48% as sustained endeavors were made for conservative risk management at the group level as demonstrated by growth focused on prime quality loans. Its NPL coverage ratio increased by 9.8%p from the previous year to remain stable at 149.2%: new NPL formation decreased with its improved loan portfolio and its strengthened post–loan management led to the decrease in NPLs.

Group Asset Quality

(KRW in billions, %)

| | 2019 | 2018 | YTD |
|--|------------------------------------|------------------------------------|----------------------------------|
| Total Loans for NPL Classification | 339,688.4 | 321,040.1 | 5.8 |
| Precautionary Substandard Doubtful Estimated Loss | 2,552.7 655.9 679.2 311.7 | 2,514.7 679.1 862.1 368.7 | 1.5 (3.4) (21.2) (15.5) |
| Substandard & Below Loans(NPL) | 1,646.8 | 1,909.9 | (13.8) |
| NPL Ratio | 0.48% | 0.59% | (0.11%p) |
| Loan Loss Reserves | 2,456.3 | 2,662.7 | (7.8) |
| NPL Coverage Ratio | 149.2% | 139.4% | 9.8%p |

Group NPL & NPL Coverage Ratio

KB Kookmin Bank's delinquency ratio remains at a low level of 0.24%, which is attributed to its endeavors to reduce potential NPLs and to proactively manage asset quality in so doing. Its NPL ratio improved by 0.11%p from the previous year to 0.37%: the bank strove to improve its credit quality of corporate loan portfolio by increasing the portion of prime rating loans and by pursuing preemptive risk management and proactive sales and write–offs of NPLs. Its NPL coverage ratio rose by 7.9%p from the previous year to 130.2%, which is at the highest level in the banking industry, and this is attributed to reductions in NPLs and its conservative approach to provisioning. KB Kookmin Bank's credit cost remained at the significantly low level of 0.04%, based on its endeavor for quality growth and the reversal of provisions.

KB Kookmin Card focused on conservative credit quality management and strengthened premptive risk management in the face of mounting concerns over worsening asset quality as a result of the economic slowdown. This drove down its delinquency ratio by 0.09%p from the previous year to 1.11%, and its NPL ratio remains stable.

Capital Adequacy

KB Financial Group's BIS and CET 1 ratios recorded to 14.48% and 13.59%, down by 0.12%p and 0.38%p from the previous year respectively. While this attributed to increases in risk-weighted assets in line with its growing asset, the group still maintains its strong capital position at the highest level in the Korean financial industry. Considering growing uncertainties and tightening regulations for capital management of financial institutions, KB Financial Group will strategically respond to the environment utilizing issuance of hybrid securities and other contingent convertible bonds while maintaining solid capital buffer mainly consisiting of common shares.

KB Kookmin Bank's BIS and CET 1 ratios improved by 0.33%p and 0.04%p from the previous year to 15.85% and 14.37% respectively thanks to increasing retained earnings and the placement of contingent capital while RWA increased as a result of loan growth.

NCSI

No.1Customer Satisfaction

KB Kookmin Bank ranked first in the National Customer Satisfaction Index for 13 consecutive years, for the first time in the banking industry.

Retail Banking

In 2019, the retail banking market experienced increasing fluctuations in demographics and social trends in line with accelerating aging, an increasing prevalence of single households, an emerging demand for corporate social responsibility, growing interest in nation—wide environmental protection and eco–friendliness, and demands for a work—life balance and productivity gains spurred on by the 52—hour workweek policy. Wide—ranging changes were also witnessed across the regulatory landscape, including the revision of the Banking Act to approve the additional establishment of internet—only banks, tightening regulations on household loans and consumer protection, strengthened support to facilitate fintech(financial regulatory sandbox), and data deregulation.

Innovative Customer Centric Systems and Processes

In response to shifting demographics and customer transactions and needs, KB Kookmin Bank created new customer–centric indicators and developed a monitoring system to solidify the tailor–made customer management system while improving its customer management process for effective customer management. In addition, the 'KB Star Dream Service' was launched to further provide customized contents for respective VIP customer segments.

We also launched new specialty products to reflect changing demographics and social trends, including the 'KB Clean Sky Installment Deposit' (Mar. 2019) to strengthen our image as a socially responsible company that cares for the environment, '280 Days for My Baby Installment Deposit' (Jun. 2019) to target expecting mothers, and 'KB X BTS Installment Deposit' (Oct. 2019) developed in collaboration with the global idol band BTS, following its first version unveiled in 2018. Notably, the 'KB X BTS Installment Deposit' posted nearly 68,000 in number of accounts and KRW 25 billion in balance in just two months since its launching.

Given the prolonged low growth and low interest rates and the intensifying competition spurred by the entry of fintech businesses into the financial industry, KB Kookmin Bank will effectively respond to demographic shifts, governmental financial policies, and the changing regulatory landscape by promoting data-based segmented customer management and the more sophisticated identification of potential VIP customers, developing products that set the social trends, and expanding digital innovation as well as non-face-to-face channel products and services.

Strengthening Group-wide One-Firm WM Collaboration

We continued to broaden the coverage of multi-service WM branches to generate greater One-Firm synergy between banking and securities subsidiaries, and opened PB centers (WM multi-service branches) within the business districts where main corporate clients are located to invigorate our corporate asset management business. A dedicated team for securities firms was set up and the pilot operation was initiated on a multi-service branch model that adopted the proximate arrangement of WM and corporate banking counters.

001 Introduction 026 Core Competency 048 Management's Discussion & Analysis 053 Operation Review 074 Financial Section

In addition, the existing collaboration system was improved to advance corporate finance-WM collaboration. Such as the 'P-PB System' was launched to provide specialized 'total asset management solutions' to corporate customers, and the 'RM-VM One Team System' was initiated in retail branches to improve working-level sales execution and generate collaborative outcomes in serving corporate clients.

Meanwhile, we launched the 'KB Family UP Advisory Service' brand and initiated its operation. Wealth management consulting was provided to those with professional careers as well as major corporate customers and their employees, and our WM advisory business improved its competitiveness by expanding the support of itinerant consulting, lectures and seminars for corporate customers maintaining outstanding business relationships with us. Also, we continuously worked to diversify our real estate investment advisory business and to generate profits by taking actions such as implementing the 'Rebalancing & Value Added' service for real estate assets and operating the 'Real Estate Emergency Committee' to respond to government policies.

In 2020, we plan to facilitate our wealth management operations by developing a new WM business model to innovate our WM channels by customer segment and providing 'seminars' and 'professional counseling' to diverse customers. We will also expand the range of our distinguished advisory service by providing systematic support services for land compensation process, 'legal risk assessment' services for SMEs and CEOs and 'specialized tax' services for overseas Koreans.

Corporate Banking

In the face of economic downturn and other sustained challenges in the business landscape, we pursued qualitative growth with a focus on high-quality assets to continue with sustainable growth, and endeavored to secure solid growth engines by advancing into the global IB market and developing IB services.

To sum up some of our major achievements, we topped the Bloomberg League Table's Syndicated loan arrangement category for four consecutive years to maintain our No. 1 market leadership position while successfully arranging the Seoul IFC Mall refinancing worth KRW 2.3 trillion and the KRW 2.0 trillion Sin Ansan double track railway private investment project. We also broadened the coverage of our global business through wide-ranging overseas deals including the refinancing of the U.S.-based Lackawanna Center.

The utility of blind funds was improved and deal sourcing was strengthened in aircraft financing and other key business areas to secure a stable profit base while institutional improvements were made from multiple angles to establish a globally recognized infrastructure, including the improvement of the double counting system to handle global collaboration deals.

Fully Advancing into the Global IB Market

In 2019, we completed our regional hub network across Hong Kong, London and New York. These regional hubs will help us expand our business lineups in advanced markets based on our partnership with local financial institutions and serve as the main pillar of our IB operations to strengthen our group-wide IB competitiveness. Furthermore, we will build new growth drivers in the global market to pave the way to ultimately emerge as a global IB player.

In 2020, we will fully advance into the global markets on the strength of our Hong Kong, London, and New Yok regional hubs and do our utmost to lay the basis for KB Financial Group to leap forward onto the global stage. This will be done by creating a team dedicated to the exploration of new markets and establishing the 'Hub & Spoke' operational system with Hong Kong, New York, and London serving as the 'Hub' and nearby regions as the 'Spokes', In preparation for the growing market uncertainties, we will continue to improve our asset portfolio to pursue qualitative growth with a focus on riskless assets and elevate capital efficiency while transforming ourselves into a global IB player to secure future growth momentum over the long haul.

SME Banking

317 Appendix

Leading Financial Support for SMEs

KB Kookmin Bank strengthened support for productive finance and fully responded to relevant governmental policies to posted an increase of KRW 5,2 trillion in SME loans in 2019 to become the first commercial bank to reach KRW 100 trillion in SME loan balances and is currently maintaining its No. 1 leadership position in market shares. Notably, the ratio of prime rating loans extended to healthy SMEs rose by 2,7%p YoY from 74.7% at the end of 2018 to 77.4%, which in turn allowed us to record the lowest delinquency rate of 0.55% among commercial banks.

Leading Support for Innovative Finance

Our credit supply continues to expand, with KRW 12.5 trillion newly provided for technology finance as a way to facilitate innovative financing. Also, our non-financial services are increasing their support for SMEs and self-employed businesses as demonstrated in 3,860 cases of job placement arranged through the 'KB Good Job' and 1,674 cases of consulting assistance provided through the 'KB SoHo Consulting Center'.

Number of KB Kookmin Bank's Customers

31.5 million

KB Kookmin Bank has the largest customer base in the domestic banking industry.

Pursuing the Digitalization of Corporate Financing

We accelerate the digitalization of our corporate finance operations to proactively respond to the rapidly-changing business environment. Our 'KB bridge' app recommends optimal governmental policy funds to corporate customers based on their specific needs so that they can be swiftly provided with the necessary funds, and the 'Corporate Financing ACE' was developed exclusively for our corporate finance staff to help them reduce their workload and focus more of their time on corporate customer marketing. We also created the 'KB Corporate Customer Preferential Support System' to upgrade our corporate customer management and reward provision system. While 2020 is expected to suffer increasing external volatility and the protracted economic downturn, we will continue to attract prime customers to further step ahead of the competition as the dominant player with the largest market share.

Global Operation

Over the years, we have advanced into the digital banking, micro finance and other diverse business areas in Cambodia, Laos, Myanmar, and Vietnam to better understand and accumulate experience with these markets. In January 2020, we signed a stock purchase agreement(SPA) to acquire a 70% stake in PRASAC Microfinance, Cambodia's largest Microfinance Deposit—taking Institution(MDI) while opening new local branches under Myanmar's MFI and our Cambodian subsidiary as well as KB Kookmin Bank branches in Hanoi, Vietnam and Gurugram, India, further broadening our global network. Included in other tangible outcomes from our global operations is Liiv KB Cambodia which posted a consistent growth in number of members with its strengthened service competitiveness as the nation's global digital banking platform.

In 2020, we plan to follow the Two-Track strategy both in Southeast Asia and other advanced markets to continuously expand our global presence. We will pursue non-organic growth through M&A and equity investment, and leverage digital banking in connection with our offline channel strategy to improve the accessibility of our retail service for retail and SME customers in emerging Asian economies with high growth potentials. To tap into mature financial markets with stable financial systems in place, we will expand our branch and subsidiary network in key regional hubs and use this network to secure our profit base with a focus on CIB and capital market businesses.

Expanding Global Presence

In December 2019, we made the decision to acquire a 70% stake in PRASAC Microfinance in Cambodia. With a local network of 117 locations, PRASAC is ranked third among financial institutions in loan market share. KB Kookmin Bank plans to transform PRASAC into a commercial bank to transfer its exceptional retail capabilities and help PRASAC evolve into a leading commercial bank in Cambodia in order to broaden its business presence in Southeast Asia.

Facilitating Global Export Finance

KB Kookmin Bank signed a 'global export finance promotion business agreement' with the Korea Trade Insurance Corporation(K-sure), and became the first commercial bank to launch the debtor finance instrument 'KB Global Export Finance'. Upon making shipments on the part of the exporter, KB Kookmin Bank's overseas branch extends loans to the importer, taking as security the short-term export insurance plan provided by K-sure so that the exporter can receive payments through their domestic account. This allows domestic exporters to turn their export receivables into cash sooner and without recourse while overseas importers can make payments at lower financial costs compared to those provided by local banks. In alignment with the Korean government's top priority initiative of the New Southern Policy, KB Kookmin Bank will proactively deliver financing support through its overseas branch network, in addition to KB Global Export Finance.

KB Kookmin Bank also became the first commercial bank to launch the 'KB Global Payment Usance' service. Concerning imports whose payments are made on an open account basis, the domestic importer is provided with import finance from an overseas financial institution that suggests more competitive interest rates, and then later, they can pay the principle and interests at the time of maturity. This product will surely enable KB Kookmin Bank to reinforce its wire transfer lineups which account for nearly 70% of the total import payments, and to respond to the international trade finance trend of moving away from letters of credit(LC) to wire transfers.

Furthermore, KB Kookmin Bank signed business agreements with the global e-commerce settlement service providers of WorldFirst and Payoneer, and launched the 'KB Global eCommerce Sellers Benefit Program' for domestic sellers to receive their sales proceeds generated overseas in a more cost-effective and convenient manner. This product is expected to revitalize the operations of SME exporters who often face difficulties in opening a local bank account as a seller conducting business at overseas online market places.

In 2020, KB Kookmin Bank will expand its F/X customer base, including SME importers and exporters, through the marketing programs led by its head office, strengthen its F/X product and service competitiveness through improved non-face-to-face F/X services, and reinforce marketing support to pave the way for the sustained growth of its F/X business.

Trust

KB Kookmin Bank continued to face challenging conditions in the overall trust market due to shrinking investor confidence and declining global stock market indices. In the second half of 2019, derivatives—linked fund(DLF) products linked with offshore interest rates created serious issues to eventually prompt the financial authorities to impose restrictions on high–risk financial instruments and tighten relevant regulations. Even amid such unfavorable business conditions, our proactive customer management, strategic marketing campaigns, and the launching of customized ELT products enabled us to rank first in the industry, with KRW 26.4 trillion in money trust AUM and 19.3% in market

001 Introduction 026 Core Competency 048 Management's Discussion & Analysis 053 Operation Review

074 Financial Section 317 Appendix

share. We were also able to generate solid profits with KRW 291 billion in annual revenue from trust operations for the year of 2019.

In 2019, a range of specialty products were unveiled to create the trust product line-ups that satisfy customer needs and increase our product competitive edge. These specialty products included the 'KB Clean Sky Trust' designed to contribute to reducing microdust levels, the integrated inheritance-bequeath solution 'KB The Great Heritage Trust' and the 'Family Business Succession Trust' that facilitates asset succession at SMEs. To respond to future trends and reflect current market conditions. our 'Short Strangle ETN Trust' leverages option transfer/selling to address the stock market trend of prices repeating ups and downs within a certain range, the 'KB Mini Gold Bar Trust' addresses preference for risk-free assets and declining benchmark rates, and 'U.S. REITs EFT Trust' invests in U.S.-located commercial real estate.

In 2020, we plan to maintain the similar level of profits of 2019 by continuously increasing the profitability of equity-linked trusts, our key profit-generating product. We will also be pursuing quantitative profit growth through the expanded line-ups of equity-based and alternative investment products, providing a portfolio of products that cater to each specific stage of a customer's life cycle, and delivering specialty products that are in line with the latest trends. In the mid-to-long term, we will upgrade our customer-based asset management system to retain customers and increase their loyalty, and perform stringent reviews on complete sales and post-sales management to reinforce our financial consumer protection system.

Money Trust Depository

KRW

KB Kookmin Bank accounted for 19.3% of the total money trust AUM of Korean banks, maintaining the position of consistently having the largest AUM in the industry for several years.

Pension

To solidify its status as a leading bank in the pension market, KB Kookmin Bank strengthens the management of its rate of returns for customers and offers them differentiated specialty products while using its digitally-based total asset management system to support customers with their pension asset management. In 2019, our contribution reserve rose by KRW 3.7 trillion from the previous year to KRW 23.4 trillion to top all the other pension business operators in net reserve increase for two consecutive years. We developed the 'KBot SAM' service that deploys robo advisors to make personalized portfolio recommendations to support our pension asset management, and

improved the entire non-face-to-face pension transaction process, from establishing new accounts to transfers and payments, through the 'One-Stop Online Pension Account Service'.

Our Retirement Pension Asset Management Consulting Center that provides one-on-one pension asset management services recruited more counselors and set up a team dedicated to improving our customers' rate of returns in order to deliver differentiated customer management services, including pension asset portfolio rebalancing. The pension expert program was also created to provide customized asset management services according to different life cycle stages based on comprehensive counseling capabilities in the areas of public pensions, retirement pensions and personal pensions.

The '12 Moments of Happiness' was added to our pension portfolio as an installment payment option for our senior customers to help them generate a stable source of income following retirement. Furthermore, the 'KB Golden Life Specialty Service' was significantly reinforced, and the 'Premium Health Care Service' was launched to deliver diverse health care services, the first of its kind in the banking industry as a way to provide a range of services.

In 2020, the Retirement Pension Asset Management Consulting Center will extend its work scope and recruit more employees to increase customers' rate of returns, and the operation of our pension expert training course will be upgraded to deliver comprehensive and professional pension asset management services.

We will deploy a non-face-to-face channel system 2.0 for our pension fund business. This will provide a virtual user environment that ensures improved and quicker around-the-clock accessibility throughout the year. Our UI/UX will be reconfigured to enable customers to intuitively understand and access all data and processes across non-face-toface channels, and Al-powered lifecycle asset management solutions will be offered to establish an end-to-end pension asset counseling system spanning from premium payment and asset operation to benefit payment and taxation. We also plan to develop the 'KB One-Senior Platform' to deliver health care services for senior customers and other personalized customer service packages as a way to solidify our status as a professional pension service provider.

Pension Contribution Reserves

Ranked first in net reserve increases among other pension operators for two consecutive years.

Capital Markets

In 2019, even though the global financial markets experienced continuous fluctuations due to the U.S.-China trade dispute and concerns over the global economic slowdown. KB Kookmin Bank successfully issued sustainability bonds in diverse formats based on its outstanding credit ratings (Moody's: Aa3, S&P: A+, Fitch: A), which are the highest among Korea's commercial lenders, as well as on its exceptional business performances.

KB Kookmin Bank flexibly conducted business to respond to increasing volatility in interest rates while expanding the investment asset size to eventually set a new record in operational performance over the past decade. We have strengthened our flow business basis and expanded synergy-based transactions by intensive collaboration with our sales channels and subsidiaries. To broaden our overseas business, the London capital markets desk initiated to build up its trading position actively in 2019 and we have dispatched expert employees to establish Indian and Vietnamese desks,

In February 2019, we issued 10-year subordinated sustainability bonds with a nominal amount of USD 450 million, which drew investors' attention as the first foreign currency-denominated subordinated bonds since the merger of the former Kookmin Bank and H&CB in 2001 and as the first such bonds in sustainability bond format in Korea. This successful issuance, with spread of 187.5bps over the 10-year U.S. Treasury, ended up building nearly USD 1.7 billion of orders from a total of 110 institutional investors.

In July, we also raised USD 500 million of Tier 1 subordinated bond which is Basel III compliant as well as Korea's first foreign currency-denominated subordinated sustainability bond. The issuance attracted orders in the amount of USD 2.7 billion, 5.4 times greater than the issued amount, from a total of 128 global investors.

By issuing sustainability bonds in 2019, KB Kookmin Bank was able to secure new funding sources as well as to diversify investor spectrum which include socially responsible investors. Going forward, we will continue to issue ESG-related bonds, along with covered bonds and subordinated bonds to diversify our funding structure.

In 2020, we plan to preemptively respond to the changes in financial environment and strengthen our human/physical capabilities in the capital markets to consistently promote profit growth even in

Issuance of Subordinated Sustainability Bond

450 million

KB Kookmin Bank issued USD 450 million 10-year subordinated sustainability bond for the first time in Asia.

the prolonged low–growth, low–interest rate environment. We will expand the size of investment assets and diversify products and strategies to pursue profitability while gradually expanding our global business presence and infrastructure and accelerating digitalization to strengthen our profit base and promote sustainable growth.

Smart Banking

Proactively Responding to the Shifting Digital Finance Landscape

In 2019, the opening of the financial infrastructure, as illustrated by the open banking initiative, and the introduction of the financial regulatory sandbox broke down the barriers that had separated industries and spurred competition and innovation. To turn this rapid change in the financial environment into opportunity, KB Kookmin Bank endeavored to create a convergence-driven ecosystem to collaborate with diverse players. We developed 157 open APIs to easily connect financial services with external platforms, and our cloud-based collaboration platform 'CLAYON' became the industry's first to complete 'cloud service provider safety assessments' to pave the way to deploy financial services in the cloud environment. We also capitalized on the financial regulatory sandbox to launch innovative services that were barely available in the conventional financial environment. The MVNO-based finance-telecommunication hybrid service 'Liiv M' was unveiled to take a bold step into the previously-untapped 'telecommunications' market to broaden the KB financial ecosystem. Going forward, we will focus on the development of new innovative products and services through telecommunication-data convergence to move ahead of the competition and build distinctive competitiveness.

Strengthening Digital Platform Competitiveness

On the service front, we launched the Al-enabled counseling chatbot service to provide easy and convenient 24/7 counseling services, and developed the 'KB Mobile Certificate' to allow customers to easily process their transactions through biometric certification, simple passwords, and pattern certification without a physical security medium in order to deliver new customer experience and improve user convenience.

We also continued to reorganize our digital platforms. The 'Open Banking' service, which enables customers to register their accounts at other banks for account checks and transfers, was adapted to Star Banking, internet banking, Liiv, and Liiv Talk Talk, and KB my money was upgraded to address the shifting data industry landscape and strengthen our competitive edge as an asset manager. Our Liiv Talk Talk and Liiv platforms were equipped with scanning apps and additional financial product offerings to improve the financial expertise and usability of respective platforms.

Infrastructure–wise, our cloud–based collaboration platform CLAYON was leveraged to deliver Liiv M services to set an example in using cloud infrastructure for financial services. Our non–face–to–face log collection system was also upgraded to strengthen the analytics of customer behavior data, creating a financial environment conducive to the development of digital financial services.

- 001 Introduction
- 026 Core Competency
- 048 Management's Discussion & Analysis
- 053 Operation Review
- 074 Financial Section
- 317 Appendix

Delivering MVNO-based Finance-Telecommunication Hybrid Services

KB Kookmin Bank unveiled the industry's first MVNO-based telecommunication service 'Liiv M' to deliver innovative services and products that combine finance with telecommunications in order to create new customer experience and social value. Following the opening of its beta version in November 2019, this service fully opened on December 16, and has since provided services differentiated from the conventional MNVO counterparts by launching first-ever MVNO 5G plans and the membership service to turn monthly unclaimed data credits into Liiv Mate points.

We provide such innovative financial services as the USIM KB Mobile Certificate, the USIM personal information storage service, and the ATM withdrawal control service designed to prevent voice phishing frauds by disallowing the simultaneous use of a phone while making withdrawals in order to improve customer safety and convenience. Meanwhile, we offer 'sharing discounts' to vulnerable individuals and opened the Liiv M Zone within our branch to provide face–to–face counseling support for the digitally–underprivileged in order to strengthen our inclusive finance initiative.

Improving Diverse Functionalities for Greater Customer Convenience

In keeping with our public certificate log-in policy, which is rather complicated due to the inherent features of it being a banking app, we introduced a simpler log-in method that allows customers to use their mobile phone number as their ID, as the log-in was often cited as one of the user pain points. KB Real Estate Liiv ON is available across the PC web, mobile web, and mobile app channels, and customers can log in on any these channels to access the Liiv ON with their personal mobile phone number, which has significantly improved user convenience in regards to the log in process. Concerning data searching, our 'natural language' processing search function was upgraded to allow customers to type in single word segments without word spacing in the integrated search box to minimize the errors that may arise during real estate content research.

Providing Real Estate Data Contents to Customers through Social Network Channels

KB Real Estate Liiv ON leverages KB's real estate price data recognized for its market dominance to directly produce season/issue-specific real estate information and delivers wide-ranging real estate contents across the four leading social network channels of Naver Post, Kakao 1boon, Youtube, and Facebook. Since this service was launched at the end of March 2019, its cumulative views reached 11 million at the end of 2019 which goes to demonstrate the huge interest in and appreciation for the Liiv ON contents granted by numerous customers who are keeping a constant eye on the real estate market.

In 2020, we are working to migrate our service platform into the cloud environment and improve the flexibility of our platform to allow for collaboration with external startup businesses. In so doing, KB Kookmin Bank will embrace a UI/UX that delivers digitally-based easy-to-understand visual contents and maximizes user convenience while swiftly catering to customer needs.

Plans for 2020

In 2020, the full-fledged opening of the financial infrastructure through the expansion of open banking services and the initiation of My Data business will further blur the lines between the financial industry and other industries, increase convergence services among heterogenous industries, and accelerate the 'Financial Nomad' trend with the emergence of customers who constantly shift among financial institutions for greater benefits. KB Kookmin Bank's response to these trends will be to understand customers and deliver positive customer experience and new value in order to advance 'customer–centric digital finance'.

We will analyze log data and gather candid customer feedback when it is time for the platform renovation to integrate such feedback into our service improvement. We will provide personalized and useful information through customer behavior data analytics, identify customers' pain points to resolve any inconvenience they may face, and develop necessary benefits and services even before customers become aware of such needs in order to improve the qualitative competitiveness of our service.

We will also change the way we conduct business to swiftly address customer needs. While expanding our 'ACE(Agile, Centric, Efficient)' experience through Agile units to weave Agile into our corporate DNA, we will also promote collaboration by embracing co-location for our business units and IT operations. We will continue to hire outside experts and ICT staff and strengthen digital training for employees to nurture our digital workforce in order to reinforce our fundamentals for digital finance,

Banking Service

157 open APIs

157 open APIs were developed to facilitate the alignment between financial services and external platforms.

The financial industry's first-ever MVNO-based finance and telecommunications service was fully launched in December 2019.

KB Securities

KB Securities has grown into a mega investment firm with more than KRW 4 trillion in equity capital and 118 competitive WM branches nationwide as of the end of 2019. With an unrivaled competitive edge, KB Securities has been ranked No. 1 as an underwriter for corporate bonds and ABS for nine consecutive years. It is also widely known for its best-in-class product line-up and management competitiveness in the S&T business. By establishing a local subsidiary in Vietnam, KB Securities is broadening its global network to evolve into Asia's leading financial firm.

2018

KB Securities leverages its differentiated asset management capability to expand its AUM in operating WM financial instruments for customers,

Generating synergy with group subsidiaries

KB Securities opened five more multi-service branches in 2019 to expand WM coverage between banking and securities operations, which increased the number of these branches to a total of 70 as of the end of 2019. The continued improvement of joint business models including the KB Kookmin Bank-KB Securities pairing system and the offering of customer-centric tailor-made wealth management services raised our referral-based WM asset size by 9.5% YoY to KRW 7.4 trillion as of the end of 2019.

In IB business, our referral-based CIB revenue reached nearly KRW 113.0 billion and our contribution deals amounted to 62, which was made possible through the strengthened CIB collaboration system which included Partnership RM and Co-RM. Our nine CIB centers nationwide strive to enhance efficiency in serving banking-securities SME customers. As a product factory within KB Financial Group, our S&T Division continuously expands the delivery of wide-ranging products that cater to customer needs. Our increased banking-securities synergy and the resulting operational expansion enabled us to post nearly KRW 4.8 trillion in products delivered to banks(KRW 2.9 trillion in derivative-linked securities and KRW 1.9 trillion in bonds).

Strengthening digital competitiveness

KB Securities pursues company-wide digital transformation to improve work efficiency and provide differentiated customer service. This allowed us to create a smart work environment enabled by Robotics Process Automation and chatbots and to reduce nearly 30,000 hours of work on a cumulative annual basis through the Work Diet initiative. In addition, open APIs were leveraged in offering financial services, including account set-ups and account transaction inquiries, to build an open platform ecosystem and form partnerships with external startups and fintech businesses.

Such partnerships continue to expand as we launched a non-face-to-face discretionary investment robo advisor service app through a partnership with a robo advisor company in April 2019 while opening a fund care service in our integrated wealth management service app in October 2019. These endeavors enabled us to reach a total of 190,000 in new accounts opened through non-face-to-face channels as of the end of 2019, which is up by 27% from 2018, and to surpass 350,000 in monthly active users(MAU) by improving user convenience – upgrading MTS UI/UX and adopting the Kakao authentication for the first time in the industry. Furthermore, we became the first in the domestic financial industry to be honored with the 'Digital Transformer Award' by IDC, a globally-renowned IT market research firm.

Exceeding KRW 2 trillion in bills issued through KB able

Since we were granted the short-term financing business license from the Financial Services Commission in May 2019, we posted nearly KRW 2.1 trillion in bills issued as of the end of 2019. We ensure that 50% or more of the funds created as such are invested in corporate financing–related assets. This is done in consideration of

001 Introduction 026 Core Competency 048 Management's Discussion & Analysis 053 Operation Review 074 Financial Section

317 Appendix

the governmental regulation to invest more than 50% of these into corporate financing assets as well as internal risk management limits. We also intend to gradually increase our investments in innovative SMEs and other venture capital.

Surpassing 100,000 in Global One Market service customers

In January 2019, KB Securities unveiled the Global One Market service to enable customers to trade overseas stocks in six markets including the U.S., Hong Kong, Japan, China and Vietnam in Korean won, free from foreign exchange charges. This service was so popular that there were more than 100,000 users by the end of 2019. KB Securities aims to strengthen its competitive edge in global investment service by delivering such differentiated products and services that assist customers in diversifying their global investment portfolio, which include overseas securities, with greater convenience.

Ranking first in the DCM for nine consecutive years

KB Securities posted 22.4% market share(based on Bloomberg) in Debt Capital Market(DCM) in 2019, proudly topping the DCM league table for nine consecutive years since 2011. In 2019, we also became the first Korean business to underwrite the issuance of ESG bonds and the first in Korea to arrange the issuance of Arirang bonds through the Qualified Institutional Buyers(QIB) system. Furthermore, we became the largest corporate bill underwriter to build a short and long-term corporate financing platform while initiating bill issuance service as a way to offer competitive products to customers. Going forward, we plan to solidify our market leadership by exploring optimal financing options that satisfy the needs of issuers and investors.

Plans for 2020

Uncertainties are forecast to continue for the time being in the real economy both at home and abroad and in the financial market. The competition in the securities sector will only intensify further, especially among big securities firms. This prompts us at KB Securities to strengthen our intrinsic core competitive edge and to identify new growth drivers and expand our global presence in order to secure

a leading position in the securities industry. Furthermore, we will improve the structural efficiency of our entire operations to sharpen our focus on profitability across our business management system.

Our business strategy by business area is as follows: in the WM sector, we will further reinforce our sales competitiveness to become a solid second tier player based on AUM in the WM market. Since building long-term customer relationships is the key to a successful WM business, our sales system will take a customer-centric approach to increase customer returns and prevent any incomplete sales to strengthen their protection. In the S&T business, we will continue to generate profits based on our strengths in bond management while developing best-in-class capabilities in operating overseas bonds, in-house assets and ELS hedging to secure solid profits even amid diverse financial market conditions.

In the IB sector, we will continue to increase profits in those areas where we are already competitive, including DCM, growth investment, real estate and structured assets while elevating our status as an investment bank in corporate financing business - Equity Capital Management, acquisition finance, and bill issuance - and in such new businesses as publicly-traded REITs and Business Development Company(BDC)

In the wholesale business, we will pursue revolutionary change in every aspect, from business processes to sales methods and performance to deliver optimal solutions and services to institutional and corporate customers and to rebuild our reputation in corporate sales operations. Furthermore, we will build business capabilities in the Outsourced Chief Investment Officer(OCIO) business that is emerging as a new financing method among institutions, and broaden our overseas network to drive global business and generate meaningful outcomes, boosting our growth drivers for the future.

KB Insurance

KB Insurance continued to practice value—driven management to focus more on the Value of New Business(VNB) which is based on embedded profitability rather than external growth. This drove its Embedded Value(EV)—based growth up by 35.1% from the previous year. The company became the first in the industry to operate Al—powered voicebots at the call center and went above and beyond that by initiating a direct chatbot counseling service. Launching on—demand insurance plans targeting part—time delivery workers on two—wheelers, KB Insurance delivers wide—ranging financial products and services on the strength of its top—notch digital capabilities.

Creating Synergy at the Group Level

KB Insurance leverages KB Financial Group's wide-ranging business areas to share capabilities among subsidiaries and to collaborate and generate synergistic value. Facilitating synergy across subsidiary planner channels, increasing the use of subsidiary infrastructure, and raising awareness among employees and engaging them in synergy generation will pave the way to produce synergistic outcomes, and this will in turn result in tangible outcomes in 2020 as it has before.

In 2019, KB Insurance encouraged its planners to sell products from other subsidiaries to expand synergy generated through its own planner channel, which raised the number of new cards issued by 24.4% YoY to 16,800 at KB Kookmin Card. This helped KB Insurance surpass KRW 300 million in CMIP-based product sales to more than triple its growth from the previous year. A wide array of synergy activities were also undertaken to promote win-win partnerships with other group subsidiaries, from payment account campaigns and Magic Car loan referral sales to the use of its corporate loan introduction process for bank branches. Furthermore, synergy activity reward programs and 'acquaintance referral campaigns' were operated for subsidiary employees to improve their engagement in synergy generation while subsidiary databases were analyzed to operate digitally-enabled marketing programs in order to broaden the window of marketing opportunities and increase cross-subsidiary customers.

Long-Term Insurance

In 2019, the long-term insurance market experienced continued concerns regarding profitability due to the increasingly fierce competition across the industry to generate new sales from term insurance products, growth in non-reimbursed claims in relation to the Korean government's policy to expand the national health insurance coverage, and increasing loss ratios. Such unfavorable business conditions drove down our long-term insurance profit for the year by 4.2% to KRW 287 billion while raising our loss ratio by 1.1%p YoY to 85.1%. This is mainly attributable to the worsening loss ratio that affected the overall industry primarily in indemnity insurance plans. KB Insurance will endeavor to refine its contract management and tighten its underwriting and claim review process to improve on loss ratios while increasing revenues with a focus on contract year-based maturity products and diversifying the product portfolio to strengthen its overall profit fundamentals.

Auto Insurance

While the 2019 car insurance market generally witnessed degrading loss ratios due to increases in such costs as minimum wage allowances and repair fees, the direct premiums written demonstrated a 5.1% YoY growth to reach KRW 17.5 trillion as auto insurance premium rates rose in the first half of the year. KB Insurance expanded its sales primarily through direct channels, and this raised its new sales from direct premiums by 8.4% YoY to KRW 2,206.5 billion and its market share inched up from the previous year to 12.6%. In the face of rate increases, our car insurance loss ratio rose by 3.7%p YoY to 92.0% in line with the cumulative effects caused by costs increases in minimum wage allowances and repair fees. Going forward, we aim to reinforce our underwriting competency, secure fair and reasonable prices, and improve our claim efficiency to continuously control our loss ratio.

317 Appendix

General Insurance

In 2019, the general insurance market grew by 5.5% YoY to KRW 6.2 trillion based on the direct premiums written. The Korean market increased by 4.7% YoY to KRW 5.7 trillion and the overseas market by 14.4% YoY to KRW 517.3 billion. Our sales based on the direct premiums written increased by 5.4% YoY to KRW 981.7 billion, and our prompt response to the governmental regulation to make liability insurance mandatory in more areas allowed us to rank top in elevator liability insurance and data privacy liability insurance sales. As our loss ratio rose by 4.6%p YoY to reach 75.6%, the ESS(Energy Storage System) fire that occurred in Korea along with other factors set us back considerably. We plan to manage our loss ratio through the proactive risk management of large-size contracts and improve our portfolio with a focus on highquality properties.

Asset Management

Our AUM grew by 6.1% YoY to KRW 29 trillion as of the end of 2019. with our investment income increasing by KRW 175 billion YoY to KRW 959 billion and our return on investment 3.46%. We follow the barbell asset management strategy to pursue profitability while managing asset/liability duration. In line with the adoption of K-ICS and other tightening capital adequacy regulations, our new investments are focused on profitable real estate and SOC-related assets and swaps are utilized to improve our returns on asset management. This will surely enable us to expand our asset duration through the purchase of longterm bonds, relieve the burden of required capital with the decreasing ratio of risk assets, and minimize decreases in returns caused by a longer asset duration. Furthermore, investment limits are set in advance by asset type to manage the profitability and stability of assets under management while rigorous risk management is practiced including asset-specific limit management to secure stable returns.

Risk Management

KB Insurance manages its capital efficiency and profitability through performing capital allocations based on internal capital by business area in order to systematically support the development of a risk-based performance culture. Periodical monitoring is conducted to ensure that the company-wide risk appetite remains at an appropriate level against available capital. Quarterly Risk Management Committee meetings are held to make decisions on major risk-related issues while monthly Risk Management Council meetings are hosted to discuss the current status and necessary improvements to be made on major issues by business area including general insurance, long-term insurance, and car insurance.

We systematically and independently performed Own Risk and Solvency Assessments(ORSA) to earn exceptional scores in all of the eight sectors and be chosen as one of the best practices under the ORSA operational status reviews conducted by the Financial Supervisory Service last June on the insurance industry.

Commitment to Greater Customer Convenience

KB Insurance leads the industry through a differentiated customer experience enabled by digital innovation. As the most distinguished insurer in the field of insurtech, we became the first in the industry in 2018 to unveil the 'easy premiums claim service', and moved on to

launch an integrated tailor-made mobile app and initiate 'You Self Claim' as a self-directed insurance payment system in 2019 to leverage our digital competitive edge to improve customer convenience. Going forward, we will create a digital ecosystem with startups and ICT businesses to offer differentiated services in order to solidify our status as an insurance provider that grows hand-in-hand with customers in the digital financial environment.

Plans for 2020

In line with increasing loss ratios across the industry as a whole and overall intensifying competition regarding high-risk products, the domestic insurance market is forecast to experience abrupt changes in 2020 including but not limited to growing financial risks caused by shifting external conditions(interest rates and FX) and an accelerated digitalization of the financial industry. In response, KB Insurance will continue to focus on customers and values in business conduct and on the following strategic priorities by business area.

In long-term insurance, we will improve our product structure to move away from low-profit products, tighten loss ratio management through contract management, and expand business growth mainly on such strategic revenue-generating products as health insurance packages and auto insurance in order to build a stable profit base. Furthermore, we will upgrade the entire product-underwriting-claim value chain to improve on our mortality profit and other claim efficiency indicators while migrating to digitally-based customer-centric product/business processes to enhance work efficiency and increase profitability.

We aim to secure price fairness in auto insurance by strengthening our underwriting capability while adjusting premium rates by customer and property and to pursue phased-in premium increases. We will launch new on-demand products, respond to the aggregator market, and reinforce collaboration with platform and fintech businesses to improve customer convenience and build a differentiated competitive edge.

In general insurance, we will focus on our key channel – corporate sales channel - to increase sales from profitable and high-quality property/ liability insurance products, and also use varying channels spanning planners, agencies, and direct channels to broaden our stable profit base. This will go hand-in-hand with developing new products to target new markets and platform business and strengthening cross sales with other subsidiaries to bolster our sales base.

Smart App Award Korea 2019

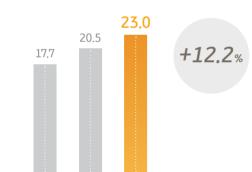

Won the 'Grand Prize in the financial category', granted to the best app in the entire financial industry

KB Kookmin Card

KB Kookmin Card provides a broad range of financial services, including credit card and check card services and installment financing. Notably, the company has been ranked first in the industry in check card transaction amounts for nine consecutive years. To secure future growth drivers, KB Kookmin Card is expanding its market position in the auto installment and lease financing and mid-range interest rate loan sectors while accelerating its global business operations to tap into new sources of profit from multiple angles. As a tech-fin business enabled by big data and digital technology, KB Kookmin Card will set the trend of the future payment market, and focus on digital and data business to develop new payment systems and continuously strengthen data analytics and application.

Launching 'KB Kookmin Deun Deun Livelihood Loan 2' as a new mid-range interest rate loan offering

Following 'KB Kookmin Mid-range Interest Rate Loan' launched in 2018, KB Kookmin Card also unveiled 'KB Kookmin Deun Deun Livelihood Loan 2' in 2019 that offers mid-range interest rates to its credit card holders in an aim to help low-income individuals ease their interest rate burden and keep pace with the Korean government's inclusive finance policy initiative. This new loan product was designed to bear 11.0% or less average annual interest rates and under 14.5% in maximum annual interest rates and to qualify 70% or more of those customers with credit grades ranging from 4 to 10 in accordance with mid-range loan requirements imposed on card businesses. This product will be available for KB Kookmin Card credit card holders with mid-level credit grades who are chosen based on separate criteria. Launching this new product, KB Kookmin Card is expected to significantly help customers reduce their interest rate burden through its differentiated risk management capability and big data analytics, and will assist lowincome groups with wide-ranging financial services to proactively respond to the government's inclusive finance policy.

Assigned 'A-' rating by Fitch for three consecutive years

We were assigned 'A-' long-term credit ratings by Fitch for three consecutive years, and 'A2' by Moody's in June 2019. This makes us the highest-rated specialized credit finance business in Korea, and this can be attributed to our continued efforts towards diversification to generate stable results amid decreasing merchant fees and other challenging business conditions and to our contribution to group-level synergy generation as a key subsidiary of KB Financial Group based on our stable growth potential and profitability.

Initiating connected car pilot service through Hi-pass

Through our partnership with 'Owin', a connected car solution provider, we launched a connected car pilot service enabled by Hi-pass digital electronic cards. As part of the 'financial regulatory testbed' initiative led by the Korean Financial Services Commission for financial institutions to be commissioned the right to use new financial services developed by startups and innovators to conduct pilot operations, this service allows users to register their car ID granted through the digital electronic Hi-pass card as well as user/vehicle/payment card information on 'Owin Pick', a connected car service mobile application. It then allows users to receive onboard assistance in placing location-based orders and making automatic payments through Bluetooth Low Energy. We plan to operate this pilot service and continue with follow-up work for its full-fledged release.

Signing the SPA to acquire PT. Financia Multi Finance of Indonesia

In November 2019, we signed a share purchase agreement with 'PT Finansia Multi Finance', an Indonesian specialized credit finance business offering installment financing for automobiles, motorbikes and consumer goods. Multi finance companies are capable of selling local currency-related loan products – installment finance, lease, factoring, and housing mortgages – and conducting credit card business. Our plan

001 Introduction 026 Core Competency 048 Management's Discussion & Analysis 053 Operation Review

is to acquire its 80% stake at USD 81.3 million (nearly KRW 9.5 billion) owned by PEFs, and officially transform the company into our second overseas subsidiary in the 2nd half of 2020 following approval by the financial authorities and post-merger integration. We aim to assist PT Finansia Multi Finance in evolving into a specialized credit finance business with products and services ranging from consumer goods installment finance to credit card operations: its installment finance business will be diversified through the continued transfer of our product development, risk management and digital core capabilities, and its card operation will be initiated including card processing agency business.

Becoming the 1st card company to receive the Presidential Award for exceptional labor relations

Kookmin Card became the first-ever card company to be honored with the Presidential Award at the 'Labor-Management Culture Awards 2019' in recognition of its contribution to establishing exemplary labor relations and a win-win labor-management culture.

Supervised by the Ministry of Employment and Labor and the Korea Labor Development Foundation, the awards serves to reward businesses and organizations for practicing a win-win labor culture, and awardees are determined through documentary/on-site reviews and case study presentations out of the businesses granted 'Labor-Management Culture Top Performer' certificates. Once awarded, these businesses become eligible for wide-ranging administrative/financial benefits including the exemption from regular work supervision for three years.

While KB Kookmin Card, following its establishment in 2011, suffered conflicts as labor-management confrontations on major issues resulted in repetitive labor dispute arbitration procedures executed by the National Labor Relations Commission, it has been positively evaluated in recent years for developing win-win labor relations through a range of mutual communication programs and for endeavoring to practice an advanced labor-management culture.

Notably, proactive steps have been taken to improve negotiation practices, from setting reasonable rules between labor and management and sharing negotiation agendas in advance to honoring simple promises, sharing review materials and hosting regular workinglevel workshops. The sum of such endeavors has led to the creation of outstanding labor relations.

The joint labor-management activity program 'Harmony Created Together by KB Kookmin Card Labor and Management' also allowed us to facilitate communication and to join hands in attending labor-related academic training and diverse social contribution programs, which highlighted our efforts to strengthen mutual cooperation and earned us high scores accordingly.

Plans for 2020

074 Financial Section 317 Appendix

While the growth of the card market turns sluggish due to worsening economic conditions and withering consumer confidence, we are encountering new competitive threats including the rapid emergence of fintech companies. As we recognize all such changes in the business landscape as a turning point to take a renewed step forward, we will follow the below three directions in actively conducting all our business initiatives.

First, we will take a back to 'basics' approach that focuses on our customers. We will perform detailed analyses of all our processes that occur in the customer use of our products and services and utilize their outcomes to continuously deliver innovative customer services.

Second, we will set ourselves apart from the competition with our topnotch digital capabilities. To keep pace with the ICT evolution, we will continue to embrace new technologies while taking a fresh perspective in identifying market and consumer trends and leading the industry.

Third, we will continuously expand the scope of our new business. Leveraging the existing card business base and data as well as wideranging assets, we will broaden our new business in Korea and abroad and diversify our profit base.

KB Asset Management

As of the end of 2019, KB Asset Management's total assets rose by 21.9% YoY to KRW 310.0 billion, and its net profit increased by 23.5% to KRW 48.9 billion. With AUM growing by 16.1% from the previous year to KRW 59.2 trillion, KB Asset Management continued with its growth journey in 2019.

AUM (KRW in trillions)

Net Profit (KRW in billions)

Alternative Investments

KRW 13.0 trillion +23.8%

Strengthening overseas investment competency

Following the creation of a subsidiary in Shanghai, China, in August 2018, we opened a representative office in Vietnam in September 2019 to steadily expand our global presence and our overseas portfolio. Such endeavors resulted in noteworthy investment outcomes mainly in China and Vietnam in 2019: our Chinese equity funds reached KRW 1.6 trillion in AUM and our internal management size rose by 20% YoY to KRW 770.0 billion as of the end of 2019. In Vietnam, we became the first in the industry to launch a Vietnamese index fund in April 2019, and have since continued to grow our business with KRW 150.3 billion in AUM and nearly KRW 50 billion in the size of internal management of these funds as of the end of 2019.

Expanding alternative investment areas and increasing the share of overseas investments

Our alternative investment operation is growing rapidly, posting a 23.8% YoY growth to KRW 13.0 trillion as of the end of 2019. Notably, our cumulative investments in photovoltaics(PV), wind farm, and other renewable energy sources amounted to KRW 1.5 trillion which enabled us to rank first in the industry. With our expertise in operating domestic infrastructure funds, we are also diversifying our investment destinations into overseas real estate and renewable energy. We made KRW 220 billion–worth GIF(Global Infrastructure Fund) commitments in May 2019 and increased our overseas infrastructure investments – energy infra projects in North America, PV generation in Spain, fund of funds in public affordable housing in the U.S., and mezzanine blind funds in Europe – to eventually raise the ratio of overseas investments out of the total alternative investments from nearly 19% at the end of 2018 to 28% at the end of 2019.

Broadening the Korean equity ETF line-up

As of the end of 2019, our ETF net asset value amounted to KRW 3.0 trillion, up by 16% from the previous year due to the expanding product line—up and a fund inflow mainly into new ETFs. In 2019, 12 new ETF offerings were listed to scale up our product line—up to 73 in total.

Plans for 2020

In 2020, we plan to boost our marketing campaign on the existing equity funds and pension funds as a way to facilitate the public offering fund market while addressing shifting market conditions swiftly and flexibly by reinforcing our product line-up with a focus on overseas asset allocation funds. Furthermore, we will continue to closely collaborate with global fund managers to further develop our management competency and continue with our innovative digital strategy to reinforce our quant-based management capabilities and focus on non-face-to-face channel marketing to keep pace with technological changes in the 4th Industrial Revolution era.

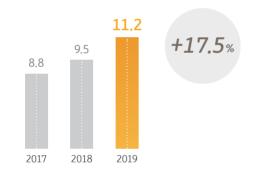

In alternative investments, we aim to diversify our investment assets and the counties in which we provide them to, and expand our overseas infrastructure business to offer institutional investors varying profit-generation opportunities. Furthermore, we will proactively explore new products in the areas of domestic infrastructure and real estate to cater to the needs of individual investors.

KB Capital

KB Capital's total assets rose by 17,5% YoY to KRW 11,2 trillion as of the end of 2019, and the company leverages its diversified business portfolio to maintain robust growth, In 2019, its net income increased by 4.6% YoY to KRW 117.0 billion, and KB Capital has remained above KRW 100 billion in net income for the recent three years in a row.

Reaping success in diversifying the business portfolio

KB Capital further strengthened its competitive edge in auto financing and expanded its retail/corporate financing to diversify the business portfolio, which allowed the company to reduce the ratio of auto financing by 8.5%p while raising the ratio of retail and corporate financing by 3.7%p and 4.7%p respectively from the previous year. In corporate financing, we bolstered the competitive edge of our core business areas with a focus on stability and profitability by increasing prime corporate loans and expanding investment financing.

Advancing the digital business model

Unveiling KB Cha Cha Cha 3.0 KB Capital launched 'KB Cha Cha Cha 3.0', an upgraded version of its preowned car trading platform, in November 2019. This platform has been highly successful with over 120,000 cars registered for sale in less than three years since its debut. The 3.0 version is equipped with Al-enabled price estimation system and a personalized car recommendation function, along with the integrated auto financing limit check service provided by KB Financial Group.

Expanding the adoption of RPA across branches to improve business efficiency We introduced Robotics Process Automation(RPA) for the back office work of our business branches to reduce more than 3,000 working hours per month, and our companywide adoption of RPA in 2020 is expected to increase this number to nearly 70,000 hours on an annual basis.

Securing mid to long-term growth drivers through strategic partnership and global business expansion

KB Capital has secured the unrivaled position in the imported car market with a 25,8% market share as of the end of 2019. Its partnerships with Kolon Group, Deutsch Group and other diverse businesses will further solidify its status both in the imported and preowned car financing sectors. In addition, KB KOLAO Leasing, our Laos subsidiary initiated in March 2017, has continued to grow to rise to 3rd place based on asset size among 29 lease businesses in the country. In February 2019, we signed a stock purchase agreement with Sunindo Parama Finance in Indonesia, and with final approval granted by the local financial authorities in December of that same year, the company is set to initiate operation in the first half of 2020.

Plans for 2020

In 2020, we will strengthen our competitiveness in global and digital operations as well as in non-face-to-face channels while embracing RPA at the company-wide level to promote Smart Work in order to improve productivity and advance sustainability management.

KB Life Insurance

KB Life Insurance reached KRW 1,182 billion in premium income, up by 1.8% from 2018, and its net income also rose by 7.7% from the previous year to KRW 16.0 billion. As its Value of New Business(VNB) amounted to KRW 32.8 billion and total assets KRW 9.8 trillion, the company is well on track for continued growth.

Building a CPC-based integrated marketing system

We developed 'Customer-Product and Channel (CPC)' based strategic direction to place our customers interests at our first priority while leveraging our customer segment analysis platform to perform wideranging analysis. As part of our digital marketing programs designed to secure future financial customers, online customer touchpoints were broadened by creating social network marketing channels. We also executed influencer marketing to target the millennial population.

Responding to changes in the regulatory environment

With the continued implementation of the IFRS17 system development project, a stable infrastructure and a management decision–making support system were established while our RBC level has remained above the set target through the sustained duration extension of the assets before the adoption of the Korean Insurance Capital Standard (K–ICS). Furthermore, we make use of varying methods to promote internal modeling–based risk management and assist value–driven product development through the reflection of the new K–ICS and risk factor segmentation and improvement.

Driving digital transformation

Our Smart Work Place initiative allowed us to create a mobile work environment, and we endeavored tirelessly to bring innovation to our value chain by establishing a data analysis system based on the DB targeting model, leveraging Robotics Process Automation to improve work processes, and developing a Smart UW System. Building a collaborative ecosystem with fintech businesses, we are also broadening our ecosystem.

Plans for 2020

As a business in the life insurance market, we witness continued concerns over the profitability and growth potential of the insurance industry itself due to low growth, low interest rates and other unfavorable business conditions. Furthermore, the spread of high techbased digital platforms is imposing numerous changes upon the overall financial industry. The insurance industry is also challenged with the introduction of IFRS17 and K-ICS, the tightening business regulations put in place to protect customers, and systemic and regulatory changes concerning business expenses and solicitation commissions. All these prompted KB Life Insurance to establish the following strategic steps.

First, our growth will be driven by our customers. We will rigorously analyze the data we collect regarding our customers and markets to constantly deliver products that truly meet the needs of our customers, and we will solidify our brand image as an insurer who truly puts customers first. Second, we will proactively respond to market and system changes to pursue quality and value–driven growth while fortifying our corporate value by improving management efficiency from the long–term perspective. Third, we will seek digitally–driven innovation to strengthen the user experience and optimize our value chain and data analytics system. This will undoubtedly expand our presence within the digital ecosystem as a business that wholeheartedly values customers.

KRW

Ranked top-level of AUM in the industry with 12.3% of market share

Increasing New Orders Awarded on High-Quality Properties and Thorough Risk

We perform stringent location analyses and feasibility reviews to focus on profitable project undertakings as a way to secure a stable profit base. Notably in the trust business, we endeavor to increase orders awarded for completion guarantee management land trust projects that are executed on an advanced business structure as well as profitable leveraged land trust projects. Our profit base is also being diversified through low-risk collateral trusts and other non-land trust offerings.

In the reconstruction business, we tender for profitable reconstruction projects and host promotional presentations to proactively conduct business, and are adopting diverse business models such as project agency and small-scale reconstruction in addition to the conventional project operation model to rebalance our business portfolio.

As far as the REITs business goes, the 'REITs Business Division' was created in 2019 to improve the competitiveness of our REITs operations, and our investments were diversified into retail properties and logistics centers to generate greater business outcomes.

In the risk management sector, periodic monitoring is performed on preemptive response processes developed in preparation for emergencies and on product-specific limit runout rates while phasebased progress reviews are made on major parts of the projects being implemented to manage risks preemptively.

Plans for 2020

317 Appendix

It is expected that the year 2020 will witness a deepening economic slowdown and continued downturn in the real estate market in Korea while the entry of new trust firms will further intensify competition in the real estate trust market. As such, KB Real Estate Trust will practice risk management based on product-specific risk factors and take swift and company-wide actions to address the pending issues of respective projects so as to solidify its proactive risk management system and push forward with digitalization to maximize business efficiency.

In the reconstruction business, we will ensure we obtain governmental official designation as either a project operator or a project agent on the projects we are currently working on, and increase our orders granted by respective business execution models in order to improve our performance. In the REITs business, we will diversify our investment portfolio and upgrade investment operations while diversifying the profit portfolio by participating in public biddings and launching wideranging property-based REITs products. Furthermore, we will advance our REITs operations to increase the value of REITs assets and maximize our operational outcomes through successful asset sales.

KB Savings Bank

In 2019, KB Savings Bank posted KRW 16.3 billion in net income and 1.8% of NPL ratio to demonstrate continued stable performance. In April 2019, the bank became the first–ever in the financial industry to adopt non–FIDO authentication, and launched a mobile banking app equipped with the mobile certificate functionality as a way to pursue digital innovation.

NPL Ratio

1.8%

Posted 1.8%, significantly lower than the industry average to make remarkable progress in asset quality management

Generating Synergy through Collaboration with Subsidiaries

Inclusive finance products (KB Kind Loan, Sunshine Loan, and Saitdol 2) along with mortgage loans provided in alignment with KB Savings Bank's loan products are available at KB Kookmin Bank locations, and the subsidiary-linked loans posted a 125% YoY growth as a result of strengthened synergy with group subsidiaries through the promotion of subsidiary-aligned loans.

Achievements from Upgraded Digital Financing

The KB Savings Bank's mobile banking app is the first in the financial industry to deliver the 'voice service' enabled by non–FIDO authentication and the 'mobile certificate' function that uses QR codes to ascertain the authenticity of certificates. Our innovative mobile banking improved the UI/UX for greater customer convenience and increased the speed of log-ins and screen transition times to the highest-possible level in the industry. With the goal of creating a user-centric financial platform, we elevated security performance based on our philosophy of 'Secure, Simple, and Speedy', adopted a simple certification technique to increase service accessibility and utility, and achieved the highest-possible transaction speed in the financial industry through the rearrangement of security solutions and the improvement of transaction modes.

In 2020, we plan to leverage digital transformation to unveil our mobile banking services powered by a number of new technologies. We also aim to deliver even greater benefits to the working class by providing digital finance services for those who find it difficult to visit our brick

and mortar branches. This allows for easy and convenient access to these financial services by reducing business costs which will keep our loan interest rates low and deposit interest rates high,

New Products and Most-Popular Products & Services

We offer wide-ranging financial products that cater to customer needs, from our flagship mid-range interest rate loan 'KB Kind Loan' to the Korea Inclusive Finance Agency's 'Sunshine Loan' and the Seoul Guarantee Insurance Company's 'Saitdol 2'. In so doing, we not only help the working class build their assets but also serve as an intermediary in enabling low-credit customers, who are otherwise unable to get approved for loans at commercial banks, to benefit from the regulated financial system.

In May 2019, we launched the gamification product 'KB Honey Savings' to expand the territory of our business. This daily installment savings product comes with a 100–day maturity and offers up to 55,000 Liiv Mate points in addition to a 2.2% annual base rate. The Liiv Mate points are accumulated when the account holder plays the 'Cham Cham' game following a daily automatic transfer, recommends this product to others, or opens his/her account. This product was named based on the idea generated through Gig, a voluntary idea suggestion meeting attended by KB Savings Bank employees, and we plan to launch diverse digital products that allow customers to experience saving money through such an amusing platform.

*Gig: The term originates in jazz music and is the name of KB Savings Bank's in-house employee meeting organized voluntarily to meet specific purposes.

Becoming the First in the Industry to Achieve the ISO37001 Anti-Bribery Management Certification

We became the first in the industry to achieve the ISO37001 international anti-bribery management certification in 2018, and have since maintained our certification through annual assessments in 2019. Our strong commitment and endeavors to establish and implement a practical and detailed anti-bribery management system were highly recognized, which include but are not limited to thorough financial policy compliance, mandatory integrity training, strengthened disciplinary standards, the proactive identification and improvement of anti-bribery risk factors at the department level, and internal evaluations and management reviews led by anti-bribery compliance managers. This represents a best practice on anti-bribery management in the savings bank industry, and we are strengthening our anti-bribery and integrity promotion activities.

Plans for 2020

KB Savings Bank will become a 'Clean Bank' through preemptive risk management and an industry-leading digital bank through the offering of differentiated digital customer experiences. To realize this vision, we will 1) deliver mobile banking services that offer the greatest-possible benefits and convenience to customers, 2) efficiently reallocate our human resources through process automation to pursue cost efficiency and productivity gains, 3) rebuild our credit rating model to broaden the credit spectrum of our mid-range interest rate loan portfolio, and 4) advance our IT infrastructure to ensure long-term growth.

Fund Creation and New Investment Reinforcement Strategy

074 Financial Section317 Appendix

Driven by the Korean government's venture business promotion policy, annual venture investments in the venture investment market surged by 25% from 2018 to reach nearly KRW 4.2 trillion in 2019, setting a new record in the venture investments made. With newly-formed venture capitals amounting to KRW 4.1 trillion, both fund creation and new investment witnessed rapid growth.

The number of new venture capital increased by 16 year on year and a record-high number of venture funds was created this year, competition has intensified in organizing funds and identifying deals. These circumstances prompted KB Investment to strengthen its collaboration with group subsidiaries in creating large-size venture funds while reinforcing investment in and promotion of new growth industries and overseas investment destinations.

Large-size Funds and Subsidiary Collaboration Funds. In May 2019, KB Investment launched a KRW 220.0 billion large-scale KB Global Platform Fund in conjunction with KB Kookmin Bank, KB Securities, KB Insurance, KB Capital, and KB Kookmin Card, and made investments in the global market based on the funds raised.

PEFs and Specialty Venture Funds KB Investment created the 'KB CAPE No.1' fund with KRW 19.3 billion in total commitments in cooperation with CAPE Investment & Securities to invest KRW 18.8 billion in 'TNK Factory's redeemable convertible preferred stocks. In addition, We created the KB Culture & Global Digital Contents Fund valued at KRW 40 billion to invest in domestic/overseas cultural digital content businesses. In addition, the KRW 15 billion KB Social Impact Investment Fund was launched to invest in social enterprises.

Nurturing New Growth Industries and Making Overseas Investments We increased our investments in new growth industries: our ICT service investment posted a whopping 270% increase from KRW 37.1 billion in 2018 to KRW 137.1 billion in 2019, and our investment in the bio and health care sectors also surged by 114% from KRW 29.7 billion in 2018 to KRW 63.7 billion in 2019. Meanwhile, our Seed and Series A investments rose by 49% from KRW 47.2 billion in 2018 to KRW 70.1 billion in 2019, and our overseas investments skyrocketed by 489% from KRW 16.0 billion in 2018 to KRW 94.2 billion in 2019.

In 2019, KB Investment's fund assets under management, including PEFs, increased by KRW 294 billion from the previous year to reach KRW 1,303 billion, and its investments also set a new record high at KRW 267.9 billion.

Plans for 2020

KB Investment will continue with its mid to long-term growth strategy to nurture talented employees and strengthen its investment capacity with an aim to move beyond being a top-tier venture capital business into the Most Influential Venture Capital within three years. We will also further broaden our global presence to establish a balanced investment portfolio and lay the basis for mid to long-term growth.

KB Data Systems

KB Data Systems reached KRW 41.7 billion in total assets, up by 3.7% from the previous year, and net income posted KRW 4.7 billion, up by 62.1% from the previous year, while sales posted a 20.3% YoY growth to KRW 158.1 billion in line with increasing group-level IT investments. KB Data Systems is also supporting KB Financial Group's IT and digital innovation strategy, spanning from cloud and AI to blockchain.

IT system development

Supported the successful deployment of a next-generation IT system

Completed the development of KB Kookmin Card's next-generation system and the redevelopment of the banking call center system under the The K Project

Reaping success in building a next-generation system for group subsidiaries

In 2019, we successfully completed the development of a next-generation card system, and redeveloped the call center system under the KB Kookmin Bank's "The K" Project. Furthermore, our professional developers took an active role in the information system and data hub businesses. As intensifying competition against internet-only banks and fintech businesses led to the growth of non-face-to-face channels and new IT-related business, KB Data Systems proactively joined the IT businesses conducted in digitally-driven core areas on the group level to assist KB Financial Group's digital strategy and accelerate its digitalization.

Generating synergy through joint group-level IT system development

We developed IT systems that could be shared among group subsidiaries, including integrated internal controls for financial reporting and an integrated certificate platform while operating a joint group—wide IT system from WiseNet(group portal system) and open APIs to help improve the IT efficiency of KB Financial Group. In business operations, KB Insurance's IT system operation was transferred to KB Data Systems to enable us to secure expertise in serving the IT operational service needs of the group and to extend the scope of these services into other subsidiaries in the savings bank and capital sectors. In line with the increasing demand for group–level operational business and SI development, our workforce expanded from 413 to 484 employees on a YoY basis, and the widened scope of our operational service support for insurance, card, capital and other non–banking subsidiaries demonstrates our commitment to providing balanced IT services at the group level.

Creating Digital IT Business Unit and internalizing digital competency

In 2019, Digital IT Business Unit was created to help us serve as a digital and IT hub within KB Financial Group and support its wide-ranging digital-related IT services. We participated in developing the strategy to assist the group's savings bank business in migrating to digital banking, and adopted DevOps-based agile development methodology(CI/CD) in supporting the cloud-driven hybrid financing(CLAYON) business, thereby internalizing digital capabilities and broadening the width of our IT service offerings.

Plans for 2020

In response to KB Kookmin Bank's "The K" Project and KB Financial Group's digital innovation, KB Data Systems will recruit top performers and invest these top-notch human resources in a timely manner to assist the successful completion of the group's next-generation system development. In hybrid financing, we will strengthen collaboration on major group-level businesses – particularly Cloud platform business and life-style financing(Liiv) business – to help generate synergy in the IT sector while securing and internalizing exceptional digital capabilities to grow into a provider of IT services that truly satisfies customer needs.

KB Credit Information

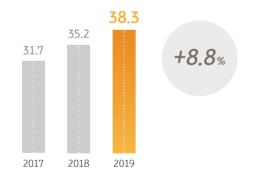

In 2019, KB Credit Information posted an approximately 8.8% growth in sales to KRW 38.3 billion, and its total assets rose by nearly 6% to KRW 27.8 billion. While financial institutions strengthened their asset quality this year to negatively impact the amount of debts managed by credit information businesses, this also helped to maintain a low level of delinquency ratio and non–performing loans on the part of financial institutions from the long–term view point, contributing to managing asset quality at the group level.

Total Assets

(KRW in billions)

Sales (KRW in billions)

KB Financial Group debts collected in 2019

KRW 322,2 billion

Manage nearly KRW 5 trillion worth NPLs from KB Financial Group subsidiaries and post KRW 322.2 billion in annual debt collection

Improving the Efficiency and Competitiveness of Debt Collection

KB Credit Information proactively recruited top-performing debt collectors in the areas of banking and card debts, operated an adequate performance management system, and strengthened its management system by type of debt in order to maximize group-level debt collection and recovery, and these multi-pronged endeavors allowed us to significantly increase the efficiency and competitiveness of our debt collection business. In 2019, we posted relatively robust performance in the face of worsening business conditions with our debt collection sales and group-level debt recovery reaching KRW nearly 28.2 billion and KRW 322.2 billion respectively. We also continuously extended our group-level business areas by supporting KB Kookmin Card's credit recovery business, accepting KB Capital's delinquent debts, and increasing the commission of bank debts.

By type of debt, the amount of delinquent debts we retrieved was KRW 154.1 billion at KB Kookmin Bank, KRW 159.7 billion at KB Kookmin Card, and KRW 8.9 billion at KB Insurance, KB Capital, and KB Savings Bank, which allowed us to remain above KRW 320 billion in annual debt collection just as we had last year.

As outstanding debt collectors are the key to our debt collection business, one of our top priorities for 2019 was to recruit these topperforming individuals. A total of 75 professional debt collectors were hired in the bank and card debt areas. The majority of these collectors outperformed their colleagues which served to affirm our expectation that their services will play a pivotal role for KB Credit Information in building a stronger competitive edge.

In lease investigation, our sales reached nearly KRW 9.5 billion, and we did our best to advance into diverse businesses derived from these investigations by continuing to accept title search work from KB Insurance and preparing a bid at the Korea Asset Management Corporation.

Plans for 2020

In 2020, the economic slowdown is forecast to continue due to external/internal uncertainties and debtors' moral hazard is also expected to aggravate in line with governmental support for the underprivileged, which prompted KB Credit Information to further reinforce its competitive edge as a debt collector in order to improve group-wide asset quality as its top priority. Our management system will be bolstered by type of debt and group-level debt collection will be maximized while proactive responses will be made to address declining debt volume. Meanwhile, we continue to explore new sources of revenue - KB Insurance, KB Capital, KB Savings Bank, and a business derived from lease investigations. We intend to strengthen our business competency through an advanced IT system and improve our organizational productivity through appropriate organizational and workforce operations while continuously tightening the management of delinquent customers in Korea in line with financial consumer protection regulations.

Independent Auditor's Report

(English Translation of a Report Originally Issued in Korean)

To the Board of Directors and Shareholders of KB Financial Group Inc.

Opinion

We have audited the accompanying consolidated financial statements of KB Financial Group Inc. and its subsidiaries (collectively referred to as the "Group"), which comprise the consolidated statements of financial position as at December 31, 2019 and 2018, and the consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2019 and 2018, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards as adopted by the Republic of Korea (Korean IFRS).

Basis for Opinion

We conducted our audits in accordance with Korean Standards on Auditing. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the ethical requirements of the Republic of Korea that are relevant to our audit of the consolidated financial statements and we have fulfilled our other ethical responsibilities in accordance with the ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

1. Expected Credit Losses on Loans Measured at Amortized Cost

Why it is determined to be a key audit matter:

The impairment guidance under Korean IFRS 1109 Financial Instruments requires determination of significant increases in credit risk and measurement of expected credit losses using forward-looking information and others. Accordingly, the Group developed a new measurement model utilizing various types of information, which requires a higher level of management's interpretation and judgment.

The Group measures expected credit losses on loans measured at amortized cost, on an individual or collective basis. The identification of loans that are deteriorating and the assessment of the present value of expected future cash flows in determining expected credit losses are inherently uncertain, involving various assumptions and judgment. In measuring expected losses on a collective basis, a wide range of complex inputs and assumptions are used. Given the extent of judgment involved, we considered expected credit losses to be a key audit matter.

Loans measured at amortized cost subject to individual or collective assessment are $\mbox{$W$}$ 342,092,076 million, with loan loss allowances of $\mbox{$W$}$ 2,408,016 million, as of December 31, 2019(See Note 4–2, 10, 11). In addition, unused commitments and guarantees are $\mbox{$W$}$ 163,972,499 million, with related provisions of $\mbox{$W$}$ 291,970 million as of December 31, 2019(See Note 4–2, 23, 40). Significantly affected subsidiaries are Kookmin Bank and KB Kookmin Card.

How our audit addressed the key audit matter:

(1) Assessment of expected credit losses on an individual basis

We obtained an understanding and evaluated the processes and controls relating to the assessment of expected credit losses on an individual basis, In particular, we focused our effort on the assumptions used in estimating future cash flows. We evaluated whether management's estimation was reasonable and we assessed the key assumptions in the cash flow projection including growth rate of entities subject to individual assessment and valuation of collateral. As part of these procedures, we assessed whether sales growth rate, operating income ratio, and assumptions on investment activities were consistent with historical performance and current market conditions. Furthermore, we assessed the appropriateness of collateral valuation by conducting our own research on recent property prices and engaged independent appraisal specialists in assessing reasonableness of appraisal reports, models and methodologies used by management.

(2) Assessment of expected credit losses on a collective basis

We obtained an understanding and evaluated the processes and controls relating to management's calculation of expected credit losses on a collective basis in accordance with impairment requirements under Korean IFRS 1109 Financial Instruments. As explained in Note 2, management assesses credit ratings to recognize lifetime expected credit losses on loans with significant increase in credit risk and impaired loans, Other than these cases, management recognizes twelve-months of expected credit losses. To calculate all expected credit losses, management has applied forward-looking information, probability of default, loss given default, and other assumptions estimated through its internal procedures and controls implemented for various assumptions.

We assessed the design and operating effectiveness of controls relating to credit ratings that reasonably reflect both qualitative and quantitative information. Our testing over the accuracy and reliability of the information included agreeing qualitative and quantitative information with relevant evidence.

We reviewed the appropriateness of management policies and procedures to determine significant increases in credit risk, and tested reasonableness of expected credit loss model applied by each of the three stages(Stage 1, 2 and 3) depending on how significantly credit risk was increased.

Our audit involved risk specialists to statistically analyze the correlation between forward-looking information and probability of default or loss given default. We assessed the appropriateness of methodologies for adjusting the probability of default and loss given default to reflect forward-looking information on estimation of expected credit losses. We further tested the reasonableness and mathematical accuracy of the information through recalculation and inspection of supporting data.

We reviewed the methodologies used by management to verify that probability of default and loss given default were calibrated using sufficient and reasonable historical data. We determined that the default and loss data used were appropriately gathered and applied in accordance with internal control procedures. In addition, we assessed reasonableness and accuracy of probability of default and loss given default through procedures including recalculation, and evaluated management's default and loss data.

2. Valuation of Over-The-Counter Derivatives

Why it is determined to be a key audit matter:

Fair value of large portion of over-the-counter derivatives in the consolidated financial statements is calculated through the use of an internally developed valuation system. Judgment is required in estimating the fair value of these derivatives held by KB Securities in determining appropriate models, assumptions and inputs. Given the extent of judgment involved in valuing these over-the-counter derivatives, we considered this to be a key audit matter. Over-the-counter derivatives of KB securities subject to fair value measurement amount to \(\psi\) 14,444,557 million as of December 31, 2019, including financial liabilities designated as at fair value through profit or loss (See Note 6).

How our audit addressed the key audit matter:

We obtained an understanding and evaluated processes and controls in relation to fair value measurement. Our focus was particularly on the accuracy of underlying transaction data used and mathematical calculation in accordance with management's internal valuation methodologies.

We assessed design and tested operating effectiveness of controls over accuracy and completeness of key inputs such as underlying transaction data (notional amount, interest rate, maturity etc.) used in management's determination of estimated fair value. We tested transaction data used in the valuation by examining supporting evidence including contracts and trade confirmations.

We also evaluated the design and tested the operating effectiveness of controls over periodic verification of management's internal valuation system to ensure the valuation methodologies configured in the system were operating as intended. We involved our derivative valuation specialist to independently estimate fair values utilizing independent valuation models and variables to see if management's valuation is outside our ranges.

Other Matter

Auditing standards and their application in practice vary among countries. The procedures and practices used in the Republic of Korea to audit such consolidated financial statements may differ from those generally accepted and applied in other countries.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Korean IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Korean Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Korean Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- · Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- · Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.
- · Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- · Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- · Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Yeob Yu, Certified Public Accountant.

Notes to the Consolidated Financial Statements

December 31, 2019 and 2018

1. The Parent Company

KB Financial Group Inc. (the "Parent Company") was incorporated on September 29, 2008, under the Financial Holding Companies Act of Korea. KB Financial Group Inc. and its subsidiaries (the "Group") derive substantially all of their revenue and income from providing a broad range of banking and related financial services to consumers and corporations primarily in Korea and in selected international markets. The Parent Company's principal business includes ownership and management of subsidiaries and associated companies that are engaged in financial services or activities. In 2011, Kookmin Bank spun off its credit card business segment and established a new separate credit card company, KB Kookmin Card Co., Ltd., and KB Investment & Securities Co., Ltd. merged with KB Futures Co., Ltd. The Group established KB Savings Bank Co., Ltd. in January 2012, acquired Yehansoul Savings Bank Co., Ltd. in September 2013, and KB Savings Bank Co., Ltd. merged with Yehansoul Savings Bank Co., Ltd. in January 2014. In March 2014, the Group acquired Woori Financial Co., Ltd. and changed the name to KB Capital Co., Ltd. Meanwhile, the Group included LIG Insurance Co., Ltd. as an associate and changed the name to KB Insurance Co., Ltd. in June 2015. Also, the Group included Hyundai Securities Co., Ltd. as an associate in June 2016 and included as a subsidiary in October 2016 by comprehensive exchange of shares. Hyundai Securities Co., Ltd. merged with KB Investment & Securities Co., Ltd. in December 2016 and changed the name to KB Securities Co., Ltd. in January 2017. KB Insurance Co., Ltd. became one of the subsidiaries through a tender offer in May 2017.

The Parent Company's share capital as of December 31, 2019, is ₩ 2,090,558 million. The Parent Company has been listed on the Korea Exchange ("KRX") since October 10, 2008, and on the New York Stock Exchange ("NYSE") for its American Depositary Shares ("ADS") since September 29, 2008. Number of shares authorized in its Articles of Incorporation is 1,000 million.

2. Basis of Preparation

2.1 Application of Korean IFRS

The Group maintains its accounting records in Korean won and prepares statutory financial statements in the Korean language ("Hangeul") in accordance with International Financial Reporting Standards as adopted by the Republic of Korea ("Korean IFRS"). The accompanying consolidated financial statements have been condensed, restructured and translated into English from the Korean language financial statements.

Certain information attached to the Korean language financial statements, but not required for a fair presentation of the Group's financial position, financial performance or cash flows, is not presented in the accompanying consolidated financial statements.

The consolidated financial statements of the Group have been prepared in accordance with Korean IFRS. These are the standards, subsequent amendments and related interpretations issued by the International Accounting Standards Board ("IASB") that have been adopted by the Republic of Korea.

The preparation of consolidated financial statements requires the use of certain critical accounting estimates. Management also needs to exercise judgment in applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 2.4.

The Group recognized an amount of services to customers as expenses in previous consolidated Statements of Comprehensive Income but recognized as the reduction of revenue in accordance with Korean IFRS 1115 Revenue from Contracts with Customers. Accordingly, certain accounts reported in the consolidated statement of comprehensive income for the year ended December 31, 2018 have been reclassified to facilitate the comparison with the consolidated statement of comprehensive income for the year ended December 31, 2019. The reclassification of the accounts does not have any effect on the net asset value or profit for the period of the Group as reported in the year ended December 31, 2018.

2.1.1 New and amended standards and interpretations adopted by the Group

The Group has applied the following standards and amendments for the first time for their annual reporting period commencing January 1, 2019.

-Enactment of Korean IFRS 1116 Leases

Korean IFRS 1116 Leases, the new standard, replaces Korean IFRS 1017 Leases. Under the new standard, with implementation of a single lease model, lessee is required to recognize assets and liabilities for all lease which lease term is over 12 months and underlying assets are not low value assets. A lessee is required to recognize a right-of-use asset and a lease liability representing its obligation to make lease payments.

With implementation of Korean IFRS 1116 Lease, the Group has changed accounting policy. The Group has adopted Korean IFRS 1116 retrospectively, as

permitted under the specific transitional provisions in the standard and recognized the cumulative impact of initially applying the standard as at January 1, 2019, the date of initial application. The Group has not restated comparatives for the 2018 reporting period. The impact of the adoption of the leasing standard and the new accounting policies are disclosed in Note 45.

- Amendments to Korean IFRS 1109 Financial Instruments

The narrow-scope amendments made to Korean IFRS 1109 Financial Instruments enable entities to measure certain prepayable financial assets with negative compensation at amortized cost. When a modification of a financial liability measured at amortized cost that does not result in the derecognition, a modification gain or loss shall be recognized in profit or loss. The amendment does not have a significant impact on the financial statements.

- Amendments to Korean IFRS 1019 Employee Benefits

The amendments require that an entity shall calculate current service cost and net interest for the remainder of the reporting period after a plan amendment, curtailment or settlement based on updated actuarial assumptions from the date of the change. The amendments also require that a reduction in a surplus must be recognized in profit or loss even if that surplus was not previously recognized because of the impact of the asset ceiling. The amendment does not have a significant impact on the financial statements.

- Amendments to Korean IFRS 1028 Investments in Associates and Joint Ventures

The amendments clarify that an entity shall apply Korean IFRS 1109 to financial instruments in an associate or joint venture to which the equity method is not applied. These include long-term interests that, in substance, form part of the entity's net investment in an associate or joint venture. The amendment does not have a significant impact on the financial statements.

- Enactment of Interpretation of Korean IFRS 2123 Uncertainty over Income Tax Treatments

The enactment clarifies the accounting for uncertainties in income taxes in the event that the decision of taxation authorities or courts can change tax treatment. The enactment presents calculating methods of disclosure amount based on the possibility of future recognition of the income tax treatment and requires disclosure of the uncertainty of the amount. The enactment does not have a significant impact on the financial statements.

- Amendments to Korean IFRS 1109 Financial Instruments, and 1107 Financial Instruments: Disclosure

These amendments provide exceptions applying hedge accounting even though interest rate benchmark reform gives rise to uncertainties. In the hedging relationship, an entity shall assume that the interest rate benchmark on which the hedge cash flows are based is not altered as a result of interest rate benchmark reform when determining whether a forecast transaction is highly probable and prospectively assessing hedging effectiveness. For a hedge of a non-contractually specified benchmark component of interest rate risk, an entity shall apply the requirement that the risk component shall be separately identifiable only at the inception of the hedging relationship. The application of this exception is ceased either when the uncertainty arising from interest rate benchmark reform is no longer present with respect to the timing and the amount of the interest rate benchmark-based cash flows of the hedge item, or when the hedging relationship that the hedge item is part of is discontinued. These amendments will be effective for annual periods beginning on or after January 1, 2020. However, the Group early adopted the amendments as it is permitted. The significant benchmark interest rate indicator for the hedge relationship is LIBOR, and the hedge accounting in Note 9 directly affected by these amendments.

- Annual Improvements to Korean IFRS 1103 Business Combination

The amendments clarify that when a party to a joint arrangement obtains control of a business that is a joint operation and had rights to the assets and obligations for the liabilities relating to that joint operation immediately before the acquisition date, the transaction is a business combination achieved in stages. In such cases, the acquirer shall remeasure its entire previously held interest in the joint operation. The amendment does not have a significant impact on the financial statements.

- Annual Improvements to Korean IFRS 1111 Joint Agreements

The amendments clarify that when a party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business. In such cases, previously held interests in the joint operation are not remeasured. The amendment does not have a significant impact on the financial statements.

- Annual Improvements to Paragraph 57A of Korean IFRS 1012 Income Tax

The amendment is applied to all the income tax consequences of dividends and requires an entity to recognize the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized those past transactions or events. The amendment does not have a significant impact on the financial statements.

– Annual Improvements to Korean IFRS 1023 $\it Borrowing \, Cost$

The amendments clarify that if a specific borrowing remains outstanding after the related qualifying asset is ready for its intended use (or sale), it becomes part of general borrowings. The amendment does not have a significant impact on the financial statements.

2.1.2 New and amended standards and interpretations not yet adopted by the Group

Certain new accounting standards and interpretations that have been published but are not mandatory for the reporting period commencing January 1, 2019 and have not been early adopted by the Group are set out below.

- Amendments to Korean IFRS 1001 Presentation of Financial Statements and Korean IFRS 1008 Accounting policies, changes in accounting estimates and errors - Definition of Material

The amendments clarify the explanation of the definition of material and amended Korean IFRS 1001 and Korean IFRS 1008 in accordance with the clarified definitions. Materiality is assessed by reference to omission or misstatement of material information as well as effects of immaterial information, and to the nature of the users when determining the information to be disclosed by the Group. These amendments should be applied for annual periods beginning on or after January 1, 2020, and earlier application of permitted. The Group does not expect that these amendments have a significant impact on the financial statements.

- Amendments to Korean IFRS 1103 Business Combination - Definition of a Business

To consider the integration of the required activities and assets as a business, the amended definition of a business requires an acquisition to include an input and a substantive process that together significantly contribute to the ability to create outputs and excludes economic benefits from the lower costs. An entity can apply a concentration test, an optional test, where substantially all of the fair value of gross assets acquired is concentrated in a single asset or a group of similar assets, the assets acquired would not represent a business. These amendments should be applied for annual periods beginning on or after January 1, 2020, and earlier application of permitted. The Group does not expect that these amendments have a significant impact on the financial statements.

- IFRS Interpretation Committee's agenda decisions - Lease Term

On December 16, 2019, the IFRS Interpretations Committee announced an interpretation of the "lease term and useful life of leasehold improvements". This interpretation deals with how to determine the lease term of a cancellable lease or a renewable lease and whether the useful life of non-removable leasehold improvements is limited by the relevant lease term. According to this interpretation, the Group should identify factors to consider the broader economic penalty, reflect identified factors to accounting policies, and calculate lease term again based on accounting policy.

However, due to the large number of lease contracts held by the Group and varying terms of the contract, the Group determined that sufficient time would be required to set up items to be included in the review of extensive economic penalty and to establish procedures for collecting and analyzing necessary information. Therefore, the effect of the changes in accounting policy for the lease term is not reflected in the consolidated financial statements for the current reporting period.

If the accounting policy for the lease term is changed in the annual periods beginning on or after January 1, 2020, the amount of the related right-of-use assets and lease liabilities may increase, and the consolidated financial statements may need to be retroactively restated to reflect this effect.

2.2 Measurement Basis

The consolidated financial statements have been prepared under the historical cost convention unless otherwise specified.

2.3 Functional and Presentation Currency

Items included in the financial statements of each entity of the Group are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The consolidated financial statements are presented in Korean won, which is the Parent Company's functional and presentation currency.

2.4 Critical Accounting Estimates

The preparation of consolidated financial statements requires the application of accounting policies, certain critical accounting estimates and assumptions that may have a significant impact on the assets (liabilities) and incomes (expenses). Management's estimates of outcomes may differ from actual outcomes if management's estimates and assumptions based on management's best judgment at the reporting date are different from the actual environment.

Estimates and assumptions are continually evaluated and any change in an accounting estimate is recognized prospectively by including it in profit or loss in the period of the change, if the change affects that period only. Alternatively if the change in accounting estimate affects both the period of change and future periods, that change is recognized in the profit or loss of all those periods.

Uncertainty in estimates and assumptions with significant risk that may result in material adjustment to the consolidated financial statements are as follows:

2.4.1 Income taxes

The Group is operating in numerous countries and the income generated from these operations is subject to income taxes based on tax laws and interpretations of tax authorities in numerous jurisdictions. There are many transactions and calculations for which the ultimate tax determination is uncertain.

If certain portion of the taxable income is not used for investments, increase in wages, and others in accordance with the Tax System for Promotion of Investment and Collaborative Cooperation (Recirculation of Corporate Income), the Group is liable to pay additional income tax calculated based on the tax laws. The new tax system is effective for three years from 2018. Accordingly, the measurement of current and deferred income tax is affected by the tax effects from the new system. As the Group's income tax is dependent on the investments, increase in wages, and others, there exists uncertainty with regard to measuring the final tax effects.

2,4,2 Fair value of financial instruments

The fair value of financial instruments where no active market exists or where quoted prices are not otherwise available is determined by using valuation techniques. Financial instruments, which are not actively traded in the market and those with less transparent market prices, will have less objective fair values and require broad judgment on liquidity, concentration, uncertainty in market factors and assumptions in price determination and other risks.

As described in the significant accounting policies in Note 3.3, 'Recognition and Measurement of Financial Instruments', diverse valuation techniques are used to determine the fair value of financial instruments, from generally accepted market valuation models to internally developed valuation models that incorporate various types of assumptions and variables.

2.4.3 Provisions for credit losses

The Group tests impairment and recognizes allowances for losses on financial assets classified at amortized cost, debt instruments measured at fair value through other comprehensive income and lease receivables through impairment testing and recognizes provisions for guarantees, and unused loan commitments. Accuracy of provisions for credit losses is dependent upon estimation of expected cash flows of the borrower for individually assessed allowances of loans, and upon assumptions and methodology used for collectively assessed allowances for groups of loans, guarantees and unused loan commitments.

2,4,4 Net defined benefit liability

The present value of net defined benefit liability depends on a number of factors that are determined on an actuarial basis using a number of assumptions (Note 24).

2.4.5 Impairment of goodwill

The recoverable amounts of cash-generating units have been determined based on value-in-use calculations to test whether goodwill has suffered any impairment (Note 15).

3. Significant Accounting Policies

The significant accounting policies and calculation methods applied in the preparation of these consolidated financial statements have been consistently applied to all periods presented, except for the impact of changes due to enactment of new standards, amendments and interpretations disclosed in Note 2.1 and the following paragraph.

3.1 Consolidation

3.1.1 Subsidiaries

Subsidiaries are companies that are controlled by the Group. The Group controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. The existence and effects of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity. Subsidiaries are fully consolidated from the date when control is transferred to the Group and de-consolidated from the date when control is lost.

If a subsidiary uses accounting policies other than those adopted in the consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are made to make the subsidiary's accounting policies conform to those of the Group when the subsidiary's financial statements are used by the Group in preparing the consolidated financial statements.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Parent Company and to the non-controlling interests, if any. Total comprehensive income is attributed to the owners of the Parent Company and to the non-controlling interests even if this results in the non-controlling interests having a negative balance.

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions; that is, as transactions with the owners exercising their entitlement. The difference between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

When the Group ceases to have control, any retained interest in the entity is re-measured to its fair value at the date when control is lost, with the change in carrying amount recognized in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. Amounts previously recognized in other comprehensive income are reclassified to profit or loss.

The Group applies the acquisition method to account for business combinations. The consideration transferred is measured at the fair values of the assets transferred, and identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are initially measured at their fair values at the acquisition date. The Group recognizes any non-controlling interest in the acquiree on an acquisition-by-acquisition basis in the event of liquidation, either at fair value or at the non-controlling interest's proportionate share of the recognized amounts of acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred.

In a business combination achieved in stages, the Group shall remeasure its previously held equity interest in the acquiree at its acquisition—date fair value and recognize the resulting gain or loss, if any, in profit or loss or other comprehensive income, as appropriate. In prior reporting periods, the Group may have recognized changes in the value of its equity interest in the acquiree in other comprehensive income. If so, the amount that was recognized in other comprehensive income shall be reclassified as profit or loss, or retained earnings, on the same basis as would be required if the Group had disposed directly of the previously held equity interest.

The Group applies the book amount method to account for business combinations of entities under a common control. Identifiable assets acquired and liabilities assumed in a business combination are measured at their book amounts on the consolidated financial statements of the Group. In addition, the difference between the sum of consolidated book amounts of the assets and liabilities transferred and accumulated other comprehensive income; and the consideration paid is recognized as capital surplus.

3.1.2 Associates and joint ventures

Associates are entities over which the Group has significant influence in the financial and operating policy decisions. Generally, if the Group holds 20% to 50% of the voting power of the investee, it is presumed that the Group has significant influence, it is presumed that the Group has significant influence.

Joint ventures are investments in which the Group jointly controls over economic activities pursuant to contractual arrangement. Decisions on financial and operating policies require unanimous consent of the parties sharing control.

Under the equity method, investments in associates and joint ventures are initially recognized at cost and the carrying amount is increased or decreased to recognize the Group's share of the profit or loss of the investee and changes in the investee's equity after the date of acquisition. The Group's share of the profit or loss of the investee is recognized in the Group's profit or loss. Distributions received from an investee reduce the carrying amount of the investment. Profit and loss resulting from 'upstream' and 'downstream' transactions between the Group and associates are eliminated to the extent at the Group's interest in associates. Unrealized losses are eliminated in the same way as unrealized gains except that they are only eliminated to the extent that there is no evidence of impairment.

If associates and joint ventures uses accounting policies other than those of the Group for like transactions and events in similar circumstances, if necessary, adjustments shall be made to make the associate's accounting policies conform to those of the Group when the associate's financial statements are used by the entity in applying the equity method.

If the Group's share of losses of associates and joint ventures equals or exceeds its interest in the associate (including long–term interests that, in substance, form part of the Group's net investment in the associate), the Group discontinues recognizing its share of further losses. After the Group's interest is reduced to zero, additional losses are provided for, and a liability is recognized, only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

The Group determines at each reporting period whether there is any objective evidence that the investments in the associates are impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associates and its carrying value and recognizes the amount as 'non-operating income (expense)' in the statement of comprehensive income.

3.1.3 Structured entity

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity. When the Group decides whether it has power to the structured entities in which the Group has interests, it considers factors such as the purpose, the form, the practical ability to direct the relevant activities of a structured entity, the nature of its relationship with a structured entity and the amount of exposure to variable returns.

3.1.4 Trusts and funds

The Group provides management services for trust assets, collective investment and other funds. These trusts and funds are not consolidated in the Group's consolidated financial statements, except for trusts and funds over which the Group has control.

3.1.5 Intra-group transactions

All intra-group balances and transactions, and any unrealized gains arising on intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealized losses are eliminated in the same way as unrealized gains except that they are only eliminated to the extent that there is no evidence of impairment.

3.2 Foreign Currency

3.2.1 Foreign currency transactions

A foreign currency transaction is recorded, on initial recognition in the functional currency, by applying the spot exchange rate between the functional currency and the foreign currency at the date of the transaction. At the end of each reporting period, foreign currency monetary items are translated using the closing rate which is the spot exchange rate at the end of the reporting period. Non-monetary items that are measured at fair value in a foreign currency are translated using the spot exchange rates at the date when the fair value was determined and non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the spot exchange rate at the date of the transaction.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous consolidated financial statements are recognized in profit or loss in the period in which they arise, except for exchange differences arising on net investments in a foreign operation and financial liability designated as a hedge of the net investment. When gains or losses on a non-monetary item are recognized in other comprehensive income, any exchange component of those gains or losses are also recognized in other comprehensive income. Conversely, when gains or losses on a non-monetary item are recognized in profit or loss, any exchange component of those gains or losses are also recognized in profit or loss.

3.2.2 Foreign operations

The financial performance and financial position of all foreign operations, whose functional currencies differ from the Group's presentation currency, are translated into the Group's presentation currency using the following procedures.

Assets and liabilities for each statement of financial position presented (including comparatives) are translated at the closing rate at the end of the reporting period, unless the functional currency of the foreign operation is in hyper-inflationary economy. Income and expenses in the statement of comprehensive income presented are translated using the average exchange rates for the period. All resulting exchange differences are recognized in other comprehensive income.

Any goodwill arising from the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising from the acquisition of that foreign operation are treated as assets and liabilities of the foreign operation. Thus, they are expressed in the functional currency of the foreign operation and are translated into the presentation currency at the closing rate.

On the disposal of a foreign operation, the cumulative amount of the exchange differences relating to that foreign operation, recognized in other comprehensive income and accumulated in the separate component of equity, is reclassified from equity to profit or loss (as a reclassification adjustment) when the gains or losses on disposal are recognized. On the partial disposal of a subsidiary that includes a foreign operation, the Group redistributes the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income to the non-controlling interests in that foreign operation. In any other partial disposal of a foreign operation, the Group reclassifies to profit or loss only the proportionate share of the cumulative amount of the exchange differences recognized in other comprehensive income.

3.2.3 Net investment in a foreign operation

If the settlement of a monetary item receivable from or payable to a foreign operation is neither planned nor likely to occur in the foreseeable future, then foreign currency difference arising on the item which in substance is considered to form part of the net investment in the foreign operation, are recognized in the other comprehensive income and shall be reclassified to profit or loss on disposal of the investment.

3.3 Recognition and Measurement of Financial Instruments

3.3.1 Initial recognition

The Group recognizes a financial asset or a financial liability in its statement of financial position when the Group becomes a party to the contractual provisions of the instrument. A regular way purchase or sale of financial assets (a purchase or sale of a financial asset under a contract whose terms require delivery of the financial instruments within the time frame established generally by market regulation or practice) is recognized and derecognized using trade date accounting.

The Group classifies financial assets as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, or financial assets at amortized cost. The Group classifies financial liabilities as financial liabilities at fair value through profit or loss, or other financial liabilities. The classification depends on the nature and holding purpose of the financial instrument at initial recognition in the consolidated financial statements.

At initial recognition, a financial asset or financial liability is measured at its fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The fair value is defined as the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. The fair value of a financial instrument on initial recognition is normally the transaction price (that is, the fair value of the consideration given or received) in an arm's length transaction.

3.3.2 Subsequent measurement

After initial recognition, financial instruments are measured at amortized cost or fair value based on classification at initial recognition.

Amortized cost

The amortized cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition:

- minus the principal repayments
- plus or minus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount
- or any reduction (directly or through the use of an allowance account) due to impairment or uncollectibility

Fair value

Fair values, which the Group primarily uses for the measurement of financial instruments, are the published price quotations based on market prices or dealer price quotations of financial instruments traded in an active market where available. These are the best evidence of fair value. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, an entity in the same industry, pricing service or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

If the market for a financial instrument is not active, fair value is determined either by using a valuation technique or independent third-party valuation service. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, referencing to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models.

The Group uses valuation models that are commonly used by market participants and customized for the Group to determine fair values of common over-the-counter (OTC) derivatives such as options, interest rate swaps and currency swaps which are based on the inputs observable in markets. For more complex instruments, the Group uses internally developed models, which are usually based on valuation methods and techniques generally used within the industry, or a value measured by an independent external valuation institution as the fair values if all or some of the inputs to the valuation models are not market observable and therefore it is necessary to estimate fair value based on certain assumptions.

In addition, the fair value information recognized in the statement of financial position is classified into the following fair value hierarchy, reflecting the significance of the input variables used in the fair value measurement.

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date
- $Level\ 2: inputs\ other\ than\ quoted\ prices\ included\ within\ Level\ 1\ that\ are\ observable\ for\ the\ asset\ or\ liability,\ either\ directly\ or\ indirectly.$
- Level 3: unobservable inputs for the asset or liability.

The level in the fair value hierarchy within which the fair value measurement is categorized in its entirety shall be determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

If the valuation technique does not reflect all factors which market participants would consider in setting a price, the fair value is adjusted to reflect those factors. Those factors include counterparty credit risk, bid-ask spread, liquidity risk and others.

The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with economic methodologies applied for pricing financial instruments. Periodically, the Group calibrates the valuation technique and tests its validity using prices of observable current market transactions of the same instrument or based on other relevant observable market data.

3.3.3 Derecognition

Derecognition is the removal of a previously recognized financial asset or financial liability from the statement of financial position. The Group derecognizes a financial asset or a financial liability when, and only when:

Derecognition of financial assets

Financial assets are derecognized when the contractual rights to the cash flows from the financial assets expire or the financial assets have been transferred and substantially all the risks and rewards of ownership of the financial assets are also transferred, or all the risks and rewards of ownership of the financial assets are neither substantially transferred nor retained and the Group has not retained control. If the Group neither transfers nor disposes of substantially all the risks and rewards of ownership of the financial assets, the Group continues to recognize the financial asset to the extent of its continuing involvement in the financial asset.

If the Group transfers the contractual rights to receive the cash flows of the financial asset, but retains substantially all the risks and rewards of ownership of the financial asset, the Group continues to recognize the transferred asset in its entirety and recognize a financial liability for the consideration received.

The Group writes off financial assets in its entirety or to a portion thereof when the principal and interest on the principal amount outstanding are determined to be no longer recoverable. In general, the Group considers write-off if significant financial difficulties of the debtor, or delinquency in interest or principal payments is indicated. The write-off decision is made in accordance with internal regulations and may require approval from external institution, if necessary. After the write-off, the Group can collect the written-off loans continuously according to the internal policy. Recovered amounts of financial assets previously written-off are recognized at profit or loss.

Derecognition of financial liabilities

Financial liabilities are derecognized from the statement of financial position when the obligation specified in the contract is discharged, cancelled or expires.

3.3.4 Offsetting

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position where there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the assets and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Group or the counterparty.

3.4 Cash and Due from Financial Institutions

Cash and due from financial institutions include cash on hand, foreign currency, and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and due from financial institutions. Cash and due from financial institutions are measured at amortized cost.

3.5 Non-derivative Financial Assets

3.5.1 Financial assets at fair value through profit or loss

Financial assets classified as held for trading, financial assets designated by the Group as at fair value through profit or loss upon initial recognition, and financial assets that are required to be mandatorily measured at fair value through profit or loss are classified as financial assets at fair value through profit or loss.

The Group may designate certain financial assets upon initial recognition as at fair value through profit or loss when the designation eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as 'an accounting mismatch') that would otherwise arise from measuring assets or liabilities or recognizing the gains and losses on them on different bases.

After initial recognition, a financial asset at fair value through profit or loss is measured at fair value and gains or losses arising from a change in the fair value are recognized in profit or loss. Interest income and dividend income from financial assets at fair value through profit or loss are also recognized in the statement of comprehensive income.

3.5.2 Financial assets at fair value through other comprehensive income

The Group classifies below financial assets as financial assets at fair value through other comprehensive income;

- debt instruments that are a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and consistent with representing solely payments of principal and interest on the principal amount outstanding or;
- equity instruments, not held for trading with the objective of generating a profit from short-term fluctuations in price or dealer's margin, designated as financial assets at fair value through other comprehensive income

After initial recognition, a financial asset at fair value through other comprehensive income is measured at fair value. Gain and loss from changes in fair value, other than dividend income and interest income amortized using effective interest method and exchange differences arising on monetary items which are recognized directly in income as interest income or expense, are recognized as other comprehensive income in equity.

At disposal of financial assets at fair value through other comprehensive income, cumulative gain or loss is recognized as profit or loss for the reporting period. However, cumulative gain or loss of equity instrument designated as fair value through other comprehensive income are not recycled to profit or loss at disposal.

Financial assets at fair value through other comprehensive income denominated in foreign currencies are translated at the closing rate. Exchange differences resulting from changes in amortized cost are recognized in profit or loss, and other changes are recognized as equity.

3.5.3 Financial assets measured at amortized cost

A financial asset, which are held within the business model whose objective is to hold assets in order to collect contractual cash flows and consistent with representing solely payments of principal and interest on the principal amount outstanding, are classified as a financial asset at amortized cost. Financial assets at amortized cost are subsequently measured at amortized cost using the effective interest method after initial recognition and interest income is recognized using the effective interest method.

3.6 Expected Credit Loss of Financial Assets (Debt Instruments)

The Group measures expected credit loss and recognizes loss allowance at the end of the reporting period for financial assets measured at amortized cost and fair value through other comprehensive income with the exception of financial asset measured at fair value through profit or loss.

Expected credit losses are a probability-weighted estimate of credit losses (i.e. the present value of all cash shortfalls) over the expected life of the financial instrument. The Group measures expected credit losses by reflecting reasonable and supportable information that is reasonably available at the reporting date without undue cost or effort, including information about past events, current conditions and forecasts of future economic conditions.

The Group uses the following three measurement techniques in accordance with Korean IFRS:

- General approach: for financial assets and off-balance-sheet unused credit line that are not applied below two approaches
- Simplified approach: for receivables, contract assets and lease receivables
- Credit-impaired approach: for purchased or originated credit-impaired financial assets

Different measurement approaches are applied depending on significant increase in credit risk. 12 month expected credit losses is recognized when credit risk has not significantly increased since initial recognition. A loss allowance at an amount equal to lifetime expected credit losses is recognized when credit risk has significantly increased since initial recognition. Lifetime is presumed to be a period to the contractual maturity date of a financial asset (the expected life of the financial asset).

One or more of the following items is deemed significant increase in credit risk. 30 days past due presumption is applicable for all consolidated subsidiaries, and other standards are selectively applied considering applicability of each subsidiary with its specific indicators. When the contractual cash flows of a financial asset are renegotiated or otherwise modified, the Group determines whether the credit risk has increased significantly since initial recognition using the following information.

- more than 30 days past due;
- decline in credit rating at period end by more than certain notches as compared to that at initial recognition;
- decline in ratings below certain level in the early warning system;
- debt restructuring (except for impaired financial assets); and
- credit delinquency information on Korea Federation of Banks, and etc.

Under simplified approach, the Group shall always measure the loss allowance at an amount equal to lifetime expected credit losses. Under credit-impaired approach, the Group shall only recognize the cumulative changes in lifetime expected credit losses since initial recognition as a loss allowance for purchased or originated credit-impaired financial assets. In assessing credit impairment, the Group uses definition of default as in the new Basel Accord which rules calculation of Capital Adequacy Ratio.

The Group generally deems one or more of the following items credit-impaired:

- no less than 90 days past due;
- legal proceedings related to collection;
- a borrower that has received a warning from the Korea Federation of Banks;
- corporate borrowers that are rated C or D;
- refinancing; and
- debt restructuring.

3.6.1 Forward-looking information

The Group uses forward-looking information, when it determines whether the credit risk has increased significantly and measures the expected credit losses.

The Group assumes the risk components have a certain correlation with the economic cycle, and uses statistical methodologies to estimate the relation between key macroeconomic variables and risk components for the expected credit losses.

The correlation between the major macroeconomic variables and the credit risk is as follows:

| Key macroeconomic variables | Correlation between the major macroeconomic variables and the credit risk |
|--|---|
| Domestic GDP growth rate | (-) |
| Composite stock index | (-) |
| Construction investment change rate | (-) |
| Rate of change in housing transaction price index | (-) |
| Interest rate spread | (+) |
| Private consumption growth rate | (-) |
| Change of call rate compared to the last year (%p) | (+) |
| Household loan change rate | (-) |

Forward-looking information used in calculation of expected credit losses is based on the macroeconomic forecasts utilized by management of the Group for its business plan taking into account reliable external agency's forecasts and others. The forward-looking information is generated by KB Research under the Parent Company with comprehensive approach to capture the possibility of various economic forecast scenarios that are derived from the internal and external viewpoints of the macroeconomic situation. The Group determines the macroeconomic variables to be used in forecasting future condition of the economy, taking into account the direction of the forecast scenario and the significant relationship between macroeconomic variables and time series data. And there are some changes compared to the macroeconomic variables used in the previous year.

3.6.2 Measuring expected credit losses on financial assets at amortized cost

The amount of the loss on financial assets at amortized cost is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate.

The Group estimates expected future cash flows for financial assets that are individually significant (individual assessment of impairment).

For financial assets that are not individually significant, the Group collectively estimates expected credit loss by grouping loans with homogeneous credit risk profile (collective assessment of impairment).

Individual assessment of impairment

Individual assessment of impairment losses are calculated using management's best estimate on present value of expected future cash flows. The Group uses all the available information including operating cash flow of the borrower and net realizable value of any collateral held.

Collective assessment of impairment

Collective assessment of loss allowance involves historical loss experience along with incorporation of forward-looking information. Such process incorporates factors such as type of collateral, product and borrowers, credit rating, size of portfolio and recovery period and applies 'probability of default'(PD) on a group of assets and 'loss given default'(LGD) by type of recovery method. Also, the expected credit loss model involves certain assumption to determine input based on loss experience and forward-looking information. These models and assumptions are periodically reviewed to reduce gap between loss estimate and actual loss experience.

Lifetime expected credit loss as at the end of the reporting period is calculated by product of carrying amount net of expected repayment, PD for each period and LGD adjusted by change in carrying amount.

3.6.3 Measuring expected credit losses on financial assets at fair value through other comprehensive income

Measuring method of expected credit losses on financial assets at fair value through other comprehensive income is equal to the method of financial assets at amortized cost, except for loss allowances that are recognized as other comprehensive income. Amounts recognized in other comprehensive income for sale or repayment of financial assets at fair value through other comprehensive income are reclassified to profit or loss.

3.7 Derivative Financial Instruments

The Group enters into numerous derivative financial instrument contracts such as currency forwards, interest rate swaps, currency swaps and others for trading purposes or to manage its exposures to fluctuations in interest rates and currency exchange, amongst others. These derivative financial instruments are presented as derivative financial instruments within the consolidated financial statements irrespective of transaction purpose and subsequent measurement requirement.

The Group designates certain derivatives as hedging instruments to hedge the risk of changes in fair value of a recognized asset or liability or of an unrecognized firm commitment (fair value hedge) and the risk of changes in cash flow (cash flow hedge). The Group designates non-derivatives as hedging instruments to hedge the risk of foreign exchange of a net investment in a foreign operation (hedge of net investment).

At the inception of the hedge, there is formal designation and documentation of the hedging relationship and the Group's risk management objective and strategy for undertaking the hedge. This documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the Group will assess the hedging instrument's effectiveness in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk.

Derivatives are initially recognized at fair value. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are accounted for as described below.

3.7.1 Derivative financial instruments held for trading

All derivative financial instruments, except for derivatives that are designated and qualify for hedge accounting, are measured at fair value. Gains or losses arising from a change in fair value are recognized in profit or loss as part of net gains or losses on financial instruments at fair value through profit or loss.

3.7.2 Fair value hedges

If derivatives qualify for a fair value hedge, the change in fair value of the hedging instrument and the change in fair value of the hedged item attributable to the hedged risk are recognized in profit or loss as part of other operating income and expenses. If hedged items are equity instruments and designated to present the change in fair value of the hedging instrument in other comprehensive income, recognized hedge ineffectiveness are presented in other comprehensive income. Fair value hedge accounting is discontinued prospectively if the hedging instrument expires or is sold, terminated or exercised, or the hedge no longer meets the criteria for hedge accounting or the Group revokes the designation. Once fair value hedge accounting is discontinued, the adjustment to the carrying amount of a hedged item is fully amortized to profit or loss by the maturity of the financial instrument using the effective interest method.

3.7.3 Cash flow hedges

The effective portion of changes in fair value of derivatives that are designated and qualify as cash flow hedges is recognized in other comprehensive income, limited to the cumulative change in fair value (present value) of the hedged item (the present value of the cumulative change in the future expected cash flows of the hedged item) from the inception of the hedge. The ineffective portion is recognized in gain or loss (other operating income or expense). The associated gains or losses that were previously recognized in other comprehensive income are reclassified from equity to profit or loss as a reclassification adjustment in the same period or periods during which the hedged forecast cash flows affects profit or loss. The associated gains or losses that were previously recognized in other comprehensive income are reclassified from equity to profit or loss as a reclassification adjustment in the same period or periods during which the hedged forecast cash flows affects profit or loss. Cash flow hedge accounting is discontinued prospectively if the hedging instrument expires or is sold, terminated or exercised, or the hedge no longer meets the criteria for hedge accounting or the Group revokes the designation. When the cash flow hedge accounting is discontinued, the cumulative gains or losses on the hedging instrument that have been recognized in other comprehensive income are reclassified to profit or loss over the year in which the forecast transaction occurs. If the forecast transaction is no longer expected to occur, the cumulative gains or losses that had been recognized in other comprehensive income are immediately reclassified to profit or loss.

3.7.4 Hedge of net investment

If derivatives and non-derivatives qualify for a net investment hedge, the effective portion of changes in fair value of hedging instrument is recognized in other comprehensive income and the ineffective portion is recognized in profit. The gain or loss on the hedging instrument relating to the effective portion of the hedge that has been recognized in other comprehensive income will be reclassified from other comprehensive income to profit or loss as a reclassification adjustment on the disposal or partial disposal of the foreign operation in accordance with Korean IFRS 1109 *Financial Instruments*.

3.7.5 Embedded derivatives

If a hybrid contract contains a host that is not an asset, an embedded derivative is separated from the host contract and accounted for as a derivative if, and only if the economic characteristics and risks of the embedded derivative are not closely related to those of the host contract and a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative and the hybrid (combined) instrument is not measured at fair value with changes in fair value recognized in profit or loss. Gains or losses arising from a change in the fair value of an embedded derivative separated from the host contract are recognized in profit or loss as part of net gains or losses on financial instruments at fair value through profit or loss.

3.7.6 Day one gain and loss

If the Group uses a valuation technique that incorporates data not obtained from observable markets for the fair value at initial recognition of the financial instrument, there may be a difference between the transaction price and the amount determined using that valuation technique. In these circumstances, the difference is deferred and not recognized in profit or loss, and is amortized by using the straight-line method over the life of the financial instrument. If the fair value of the financial instrument is subsequently determined using observable market inputs, the remaining deferred amount is recognized in profit or loss as part of net gains or losses on financial instruments at fair value through profit or loss or other operating income and expenses.

3.8 Property and Equipment

3.8.1 Recognition and measurement

All property and equipment that qualify for recognition as an asset are measured at cost and subsequently carried at cost less any accumulated depreciation and any accumulated impairment losses.

The cost of property and equipment includes any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management and the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

Subsequent expenditures are capitalized only when they prolong the useful life or enhance values of the assets but the costs of the day-to-day servicing of the assets such as repair and maintenance costs are recognized in profit or loss as incurred. When part of an item of an asset has a useful life different from that of the entire asset, it is recognized as a separate asset.

3.8.2 Depreciation

Land is not depreciated, whereas other property and equipment are depreciated using the method that reflects the pattern in which the asset's future economic benefits are expected to be consumed by the Group. The depreciable amount of an asset is determined after deducting its residual value.

Each part of an item of property and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method and estimated useful lives of the assets are as follows:

| Property and equipment | Depreciation method | Estimated useful lives |
|--------------------------|----------------------------------|------------------------|
| Buildings and structures | Straight-line | 20~40 years |
| Leasehold improvements | Declining-balance/ Straight-line | 4~5 years |
| Equipment and vehicles | Declining-balance/ Straight-line | 3~15 years |

The residual value, the useful life and the depreciation method applied to an asset are reviewed at each financial year end. If expectations differ from previous estimates, the changes are accounted for as a change in an accounting estimate.

3.9 Investment Properties

3.9.1 Recognition and measurement

Properties held to earn rentals or for capital appreciation or both are classified as investment properties. Investment properties are measured initially at their cost and subsequently the cost model is used.

3.9.2 Depreciation

Land is not depreciated, whereas other investment properties are depreciated using the method that reflects the pattern in which the asset's future economic benefits are expected to be consumed by the Group. The depreciable amount of an asset is determined after deducting its residual value.

The depreciation method and estimated useful lives of the assets are as follows:

| Investment properties | Depreciation method | Estimated useful lives |
|-----------------------|---------------------|------------------------|
| Buildings | Straight-line | 20~40 years |

The residual value, the useful life and the depreciation method applied to an asset are reviewed at each financial year end. If expectations differ from previous estimates, the changes are accounted for as a change in an accounting estimate.

3.10 Intangible Assets

Intangible assets are measured initially at cost and subsequently carried at their cost less any accumulated amortization and any accumulated impairment losses.

Intangible assets, except for goodwill and membership rights, are amortized using the straight-line method or double declining balance method with no residual value over their estimated useful economic life since the asset is available for use.

| Intangible assets | Amortization method | Estimated useful lives |
|----------------------------|---------------------|------------------------|
| Industrial property rights | Straight-line | 20~40 years |
| Software | Straight-line | 3 ~ 5 years |
| VOBA | Declining-balance | 60 years |
| Others | Straight-line | 1 ~ 13 years |

The amortization period and the amortization method for intangible assets with a definite useful life are reviewed at each financial year end. Where an intangible asset is not being amortized because its useful life is considered to be indefinite, the Group carries out a review in each accounting period to confirm whether or not events and circumstances still support the assumption of an indefinite useful life. If they do not, the change from the indefinite to definite useful life is accounted for as a change in an accounting estimate.

3.10.1 Value of business acquired (VOBA)

The Group recorded value of business acquired (VOBA) as intangible assets, which are the differences between the fair value of insurance liabilities and book value calculated based on the accounting policy of the acquired company. VOBA is an estimated present value of future cash flow of long-term insurance contracts at the acquisition date. VOBA is amortized over the above estimated useful life using declining balance method, and the depreciation is recognized as insurance expense.

3.10.2 Goodwill

Recognition and measurement

Goodwill arisen from business combinations before January 1, 2010, is stated at its carrying amount which was recognized under the Group's previous accounting policy, prior to the transition to Korean IFRS.

Goodwill acquired from business combinations after January 1, 2010, is initially measured as the excess of the aggregate of the consideration transferred, fair value of non-controlling interest and the acquiristion-date fair value of the acquirer's previously held equity interest in the acquiree over the net identifiable assets acquired and liabilities assumed. If this consideration is lower than the fair value of the net assets of the business acquired, the difference is recognized in profit or loss.

For each business combination, the Group decides whether the non-controlling interest in the acquiree is initially measured at fair value or at the non-controlling interest's proportionate share of the acquiree's identifiable net assets at the acquisition date.

Acquisition-related costs incurred to effect a business combination are charged to expenses in the periods in which the costs are incurred and the services are received, except for the costs to issue debt or equity securities.

Additional acquisitions of non-controlling interest

Additional acquisitions of non-controlling interests are accounted for as equity transactions. Therefore, no additional goodwill is recognized.

Subsequent measurement

Goodwill is not amortized and is stated at cost less accumulated impairment losses. However, goodwill that forms part of the carrying amount of an investment in associates is not separately recognized and an impairment loss recognized is not allocated to any asset, including goodwill, which forms part of the carrying amount of the investment in the associates.

3,10,3 Subsequent expenditure

Subsequent expenditure is capitalized only when it enhances values of the assets. Internally generated intangible assets, such as goodwill and trade name, are not recognized as assets but expensed as incurred.

3.11 Impairment of Non-financial Assets

The Group assesses at the end of each reporting period whether there is any indication that a non-financial asset, except for (i) deferred income tax assets, (ii) assets arising from employee benefits and (iii) non-current assets (or group of assets to be sold) classified as held for sale, may be impaired. If any such indication exists, the Group estimates the recoverable amount of the asset. However, irrespective of whether there is any indication of impairment, the Group tests (i) goodwill acquired in a business combination, (ii) intangible assets with an indefinite useful life and (iii) intangible assets not yet available for use for impairment annually by comparing their carrying amount with their recoverable amount.

The recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the Group determines the recoverable amount of the cash–generating unit to which the asset belongs (the asset's cash–generating unit). A cash–generating unit is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. The recoverable amount of an asset is the higher of its fair value less costs to sell and its value in use. Value in use is the present value of the future cash flows expected to be derived from an asset or cash–generating unit that are discounted by a pre–tax rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss and recognized immediately in profit or loss. For the purpose of impairment testing, goodwill arising from in a business combination is allocated to each of the cash–generating units that are expected to benefit from the synergies of the combination. The impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the cash–generating unit and then to the other assets of the unit pro rata on the basis of the carrying amount of each asset in the unit.

An impairment loss recognized for goodwill is not reversed in a subsequent period. The Group assesses at the end of each reporting period whether there is any indication that an impairment loss recognized in prior periods for an asset, other than goodwill, may no longer exist or may have decreased, and an impairment loss recognized in prior periods for an asset other than goodwill shall be reversed if, and only if, there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. The increased carrying amount of an asset other than goodwill attributable to a reversal of an impairment loss cannot exceed the carrying amount that would have been determined (net of amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

3.12 Non-current Assets Held for Sale

A non-current asset or disposal group is classified as held for sale if its carrying amount will be recovered principally through a sale transaction rather than through continuing use. For this to be the case, the asset (or disposal group) must be available for immediate sale in its present condition and its sale must be highly probable. A non-current asset (or disposal group) classified as held for sale is measured at the lower of its carrying amount and fair value less costs to sell which is measured in accordance with the applicable Korean IFRS, immediately before the initial classification of the asset (or disposal group) as held for sale

A non-current asset while it is classified as held for sale or while it is part of a disposal group classified as held for sale is not depreciated (or amortized).

Impairment loss is recognized for any initial or subsequent write-down of the asset (or disposal group) to fair value less costs to sell. Gains are recognized for any subsequent increase in fair value less costs to sell of an asset, but not in excess of the cumulative impairment loss that has been recognized.

3.13 Financial Liabilities

The Group classifies non-derivative financial liabilities into financial liabilities at fair value through profit or loss or other financial liabilities in accordance with the substance of the contractual arrangement and the definitions of financial liabilities.

The Group recognizes financial liabilities in the consolidated statement of financial position when the Group becomes a party to the contractual provisions of the financial liability.

3.13.1 Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading or designated as such upon initial recognition. Subsequent to initial recognition, financial liabilities at fair value through profit or loss are measured at fair value, and changes therein are recognized in profit or loss. Upon initial recognition, transaction costs that are directly attributable to the acquisition are recognized in profit or loss as incurred.

In relation to securities lending or borrowing transactions, the Group records transaction using memo value when it borrows securities from Korea Securities Depository etc. The borrowed securities are treated as financial liabilities at fair value through profit and loss when the Group sells them. Changes in fair value at the end of the reporting period and difference between carrying amount at redemption and purchased amount are recognized as profit and loss.

In addition, for the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability, the Group presents this change in other comprehensive income, and does not recycle this to profit or loss, subsequently. When this treatment creates or enlarges an accounting mismatch, the Group recognizes this change as profit or loss for the current period.

3.13.2 Other financial liabilities

Non-derivative financial liabilities other than financial liabilities at fair value through profit or loss are classified as other financial liabilities. Other financial liabilities include Deposits, Debts, Debentures and others. At the date of initial recognition, other financial liabilities are measured at fair value minus transaction costs that are directly attributable to the acquisition. Subsequent to initial recognition, other financial liabilities are measured at amortized cost, and its interest expense is recognized, using the effective interest method.

In case an asset is sold under repurchase agreement, the Group continues to recognize the asset with the amount sold being accounted for as borrowing. The Group derecognizes a financial liability from the consolidated statement of financial position only when it is extinguished (i.e. when the obligation specified in the contract is discharged, cancelled or expires).

3.14 Insurance Contracts

KB Life Insurance Co., Ltd., and KB Insurance Co., Ltd., the subsidiaries of the Group, issue insurance contracts.

Insurance contracts are defined as "a contract under which one party (the insurer) accepts significant insurance risk from another party by agreeing to compensate the policyholder if a specified uncertain future event adversely affects the policyholder". A contract that qualifies as an insurance contract remains an insurance contract until all rights and obligations are extinguished or expire. Such a contract that does not contain significant insurance risk is classified as an investment contract and is within the scope of Korean IFRS 1109, Financial Instruments to the extent that it gives rise to a financial asset or financial liability, except if the investment contract contains a Discretionary Participation Features (DPF). If the contract has a DPF, the contract is subject to Korean IFRS 1104, Insurance Contracts. The Group recognizes assets (liabilities) and gains (losses) relating to insurance contracts as other assets (liabilities) in the statement of financial position, and as other operating income (expenses) in the statement of comprehensive income, respectively.

3.14.1 Insurance premiums

The Group recognizes collected premiums as revenue on the due date of collection of premiums from insurance contracts and the collected premium which is not earned at the end of the reporting period is recognized as unearned premium.

3,14,2 Insurance liabilities

The Group recognizes a liability for future claims, refunds, policyholders' dividends and related expenses as follows:

Premium reserve

Premium reserve refers to an amount based on the net premium method for payment of future claims with respect to events covered by insurance policies which have not yet occurred as of the reporting period. It is calculated as the greater of the amount using standard interest rate and standard loss ratio defined by Financial Supervisory Services and the amount using the actual underlying data that have been used in premium calculation.

Reserve for outstanding claims

Reserve for outstanding claims refers to the amount not yet paid, out of an amount to be paid or expected to be paid with respect to the insured events which have arisen as of the end of each fiscal year.

Unearned premium reserve

The premiums that are due before the end of the reporting period but applicable to the next period are included.

Policyholders' dividends reserve

Policyholders' dividends reserve including an interest rate guarantee reserve, a mortality dividend reserve and an interest rate difference dividend reserve is recognized for the purpose of provisioning for policyholders' dividends in the future in accordance with statutes or insurance terms and conditions.

3.14.3 Liability adequacy test

The Group assesses at each reporting period whether its insurance liabilities are adequate, using current estimates of all future contractual cash flows and related cash flow such as claims handling cost, as well as cash flows resulting from embedded options and guarantees under its insurance contracts in accordance with Korean IFRS 1104. If the assessment shows that the carrying amount of its insurance liabilities is insufficient in light of the estimated future cash flows, additional reserve is recognized for the deficient amount. Future cash flows from long-term insurance are discounted at a future rate of return on operating assets, whereas future cash flows from general insurance are not discounted to present value. For liability adequacy tests of premium and unearned premium reserves, the Group considers all cash flow factors such as future insurance premium, deferred acquisition costs, operating expenses and operating premiums. In relation to the reserve for outstanding claims, the Group elects to use a model that best reflects the trend of paid claims among several statistical methods to perform the adequacy test.

3.14.4 Deferred acquisition costs

Acquisition cost is deferred in an amount actually spent for an insurance contract and equally amortized over the premium payment period or the period in which acquisition costs are charged for the relevant insurance contract. Acquisition costs are amortized over the shorter of seven years or premium payment period; if there is any unamortized acquisition costs remaining as of the date of surrender or lapse, such remainder shall be amortized in the period in which the contract is surrendered or lapsed.

3.15 Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The risks and uncertainties that inevitably surround many events and circumstances are taken into account in reaching the best estimate of provisions, and where the effect of the time value of money is material, the amount of provisions are the present value of the expenditures expected to be required to settle the obligation.

Provisions on confirmed and unconfirmed acceptances and guarantees, unfunded commitments of credit cards and unused credit lines of consumer and corporate loans are recognized using a valuation model that applies the credit conversion factor, probability of default, and loss given default.

Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provisions are reversed.

If the Group has an onerous contract, the present obligation under the contract is recognized and measured as provisions.

An onerous contract is a contract in which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the minimum net cost to exit from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfill it.

3.16 Financial Guarantee Contracts

A financial guarantee contract requires the issuer (the Group) to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the original or modified terms of a debt instrument.

Financial guarantee contracts are initially recognized at fair value as other liabilities, and are amortized over the contractual term. After initial recognition, financial guarantee contracts are measured at the higher of:

- The amount determined in accordance with Korean IFRS 1109, Financial Instruments or
- The initial amount recognized, less, when appropriate, cumulative amortization recognized in accordance with Korean IFRS 1115, Revenue from Contracts with Customers.

3.17 Equity Instruments Issued by the Group

An equity instrument is any contract or agreement that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

3.17.1 Ordinary shares

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or the exercise of stock option are deducted from the equity, net of any tax effects.

3.17.2 Hybrid Securities

The financial instruments can be classified as either financial liabilities or equity in accordance with the terms of the contract. The Group classifies hybrid securities as an equity if the Group has the unconditional right to avoid any contractual obligation to deliver financial assets such as cash in relation to the financial instruments. As a result, hybrid securities issued by subsidiaries are classified as non-controlling interests, dividends are recognized in the consolidated statement of comprehensive income as profit attributable to non-controlling interests.

3.17.3 Treasury shares

If the Group acquires its own equity instruments, these are accounted for as treasury shares and are deducted directly from equity. No gains or losses are recognized in profit or loss on the purchase, sale, issue or cancellation of own equity instruments. If an entity within the Group acquires and retains treasury shares, the consideration paid or received is directly recognized in equity.

3.17.4 Compound financial instruments

A compound financial instrument is classified as a financial liability or an equity instrument depending on the substance of the contractual arrangement of such financial instrument. The liability component of the compound financial instrument is measured at fair value of the similar liability without conversion option at initial recognition and subsequently measured at amortized cost using effective interest rate method until it is extinguished by conversion or matured. Equity component is initially measured at fair value of compound financial instrument in entirety less fair value of liability component net of tax effect and it is not remeasured subsequently.

3.18 Revenue Recognition

The Group recognizes revenues in accordance with the following revenue recognition standard:

- Step 1: Identify the contract with a customer.
- Step 2: Identify the performance obligations in the contract.
- Step 3: Determine the transaction price.
- Step 4: Allocate the transaction price to the performance obligations in the contract.
- Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation.

3.18.1 Interest income and expense

Interest income of financial assets at amortized cost and financial assets at fair value through other comprehensive income, and expense are recognized in the statement of comprehensive income using the effective interest method. The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability (or groups of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period.

The effective interest rate is the rate that exactly discounts estimated future cash receipts or payments through the expected life of the financial instrument or, where appropriate, a shorter period, to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all fees and points paid (main components of effective interest rates only) or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts. In those rare cases when it is not possible to estimate reliably the cash flows or the expected life of a financial instrument (or group of financial instruments), the Group uses the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Interest on impaired financial assets is recognized using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

Interest earned arising from debt investments at fair value through profit or loss is also classified as interest income in the statement of comprehensive income.

3,18,2 Fee and commission income

The Group recognizes financial service fees in accordance with the accounting standard of the financial instrument related to the fees earned.

Fees that are an integral part of the effective interest of a financial instrument

Such fees are generally treated as adjustments of effective interest. Such fees may include compensation for activities such as evaluating the borrower's financial condition, evaluating and recording guarantees, collateral and other security arrangements, negotiating the terms of the instrument, preparing and processing documents and closing the transaction and origination fees received on issuing financial liabilities measured at amortized cost. However, fees relating to the creation or acquisition of a financial instrument at fair value through profit or loss are recognized as revenue immediately.

Fees earned as services are provided

Such fees are recognized as revenue as the services are provided. Fees which can be earned through the certain periods, including account servicing fees, investment management fees, and etc. are recognized when the related services are provided.

Fees that are earned on the execution of a significant act

Such fees are recognized as revenue when the significant act has been completed.

Commission on the allotment of shares to a client is recognized as revenue when the shares have been allotted and placement fees for arranging a loan between a borrower and an investor is recognized as revenue when the loan has been arranged.

A syndication fee received by the Group that arranges a loan and retains no part of the loan package for itself (or retains a part at the same effective interest rate for comparable risk as other participants) is compensation for the service of syndication. Such a fee is recognized as revenue when the syndication has been completed.

3.18.3 Net gains/losses on financial instruments at fair value through profit or loss

Net gains/losses on financial instruments at fair value through profit or loss include profit or loss (changes in fair value, dividends, and gain/loss from foreign currency translation) from following financial instruments:

- Gain or loss from financial instruments at fair value through profit or loss
- Gain or loss from derivatives for trading, including derivatives for hedging that does not meet the condition of hedge accounting

3.18.4 Dividend income

Dividend income is recognized in profit or loss when the right to receive payment is established. Dividend income is recognized as relevant items on statements of profit or loss and other comprehensive income in accordance with the classification of equity instruments.

3.19 Employee Compensation and Benefits

3.19.1 Post-employment benefits: defined contribution plans

The contributions are recognized as employee benefit expense when they are due.

3.19.2 Post-employment benefits: defined benefit plans

All post-employment benefits, other than defined contribution plans, are classified as defined benefit plans. The amount recognized as a defined benefit liability is the present value of the defined benefit obligation less the fair value of plan assets at the end of the reporting period.

The present value of the defined benefit obligation is calculated annually by independent actuaries using the Projected Unit Credit method. The rate used to discount post-employment benefit obligations is determined by reference to market yields at the end of the reporting period on high quality corporate bonds. The currency and term of the corporate bonds are consistent with the currency and estimated term of the post-employment benefit obligations. Actuarial gains and losses including experience adjustments and the effects of changes in actuarial assumptions are recognized in other comprehensive income.

When the total of the present value of the defined benefit obligation minus the fair value of plan assets results in an asset, it is recognized to the extent of the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

Past service cost is the change in the present value of the defined benefit obligation, which arises when the Group introduces a defined benefit plan or changes the benefits of an existing defined benefit plan. Such past service cost is immediately recognized as an expense for the reporting period.

3.19.3 Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within 12 months after the end of the period in which the employees render the related service. The undiscounted amount of short-term employee benefits expected to be paid in exchange for that service is recognized as a liability (accrued expense), after deducting any amount already paid.

The expected cost of profit-sharing and bonus payments are recognized as liabilities when the Group has a present legal or constructive obligation to make such payments as a result of past events rendered by employees and a reliable estimate of the obligation can be made.

3.19.4 Share-based payment

The Group has provided its directors and employees with stock grant, and mileage stock programs. When stock grant options are exercised, the Group can either select to distribute newly issued shares or treasury shares or compensate in cash based on the share price. When mileage stock options are exercised, the Group pays the amount equivalent to KB Financial Group's share price in cash.

For a share-based payment transaction in which the terms of the arrangement provide the Group with the choice of whether to settle in cash or by issuing equity instruments, the Group determines that it has a present obligation to settle in cash because the Group has a past practice and a stated policy of settling in cash. Therefore, the Group accounts for the transaction in accordance with the requirements of cash-settled share-based payment transactions.

For mileage stock option, the Group accounts for the transaction in accordance with cash–settled share–based payment transactions, which are recognized as accrued expenses at the time of vesting.

The Group measures the services acquired and the liability incurred at fair value, and the fair value is recognized as expense and accrued expenses over the vesting period. Until the liability is settled, the Group remeasures the fair value of the liability at the end of each reporting period and at the date of settlement, with any changes in fair value recognized in profit or loss for the reporting period.

3,19,5 Termination benefits

Termination benefits are payable when employment is terminated by the Group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group shall recognize a liability and expense for termination benefits at the earlier of the following dates: when the Group can no longer withdraw the offer of those benefits and when the Group recognizes costs for a restructuring that is within the scope of Korean IFRS 1037 and involves the payment of termination benefits. Termination benefits are measured by considering the number of employees expected to accept the offer in the case of a voluntary early retirement. Termination benefits over 12 months after the reporting period are discounted to present value.

3.20 Income Tax Expenses

Income tax expense comprises current tax expense and deferred income tax expense. Current and deferred income tax are recognized as income or expense for the period, except to the extent that the ax arises from (a) a transaction or an event which is recognized, in the same or a different period outside profit or loss, either in other comprehensive income or directly in equity and (b) a business combination.

3.20.1 Current income tax

Current income tax is the amount of income taxes payable in respect of the taxable profit (loss) for a period. A difference between the taxable profit and accounting profit may arise when income or expense is included in accounting profit in one period, but is included in taxable profit in a different period. Differences may also arise if there is revenue that is exempt from taxation, or expense that is not deductible in determining taxable profit (loss). Current income tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the taxation authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The Group offsets current income tax assets and current income tax liabilities if, and only if, the Group (a) has a legally enforceable right to offset the recognized amounts and (b) intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

3.20.2 Deferred income tax

Deferred income tax is recognized, using the asset-liability method, on temporary differences arising between the tax based amount of assets and liabilities and their carrying amount in the financial statements. Deferred income tax liabilities are recognized for all taxable temporary differences and deferred income tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilized. However, deferred income tax liabilities are not recognized if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, associates and joint ventures, except for deferred income tax liabilities for which the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of a deferred income tax asset is reviewed at the end of each reporting period. The Group reduces the carrying amount of a deferred income tax asset to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of that deferred income tax asset to be utilized.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred income tax liabilities and deferred income tax assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

The Group offsets deferred income tax assets and deferred income tax liabilities when the Group has a legally enforceable right to offset current income tax assets against current income tax liabilities; and the deferred income tax assets and the deferred income tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity; or different taxable entities which intend either to settle current income tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred income tax liabilities or assets are expected to be settled or recovered.

3,20,3 Uncertain tax positions

Uncertain tax positions arise from tax treatments applied by the Group which may be challenged by the tax authorities due to the complexity of the transaction or different interpretation of the tax laws, a claim for rectification brought by the Group, or an appeal for a refund claimed from the tax authorities related to additional assessments. The Group recognizes its uncertain tax positions in the consolidated financial statements based on the guidance in Korean IFRS 1012. The income tax asset is recognized if a tax refund is probable for taxes paid and levied by the tax authority. However, interest and penalties related to income tax are recognized in accordance with Korean IFRS 1037.

3.21 Earnings per Share

The Group calculates basic earnings per share amounts and diluted earnings per share amounts for profit or loss attributable to ordinary equity holders of the Parent Company and presents them in the statement of comprehensive income. Basic earnings per share is calculated by dividing profit or loss attributable to ordinary equity holders of the Parent Company by the weighted average number of ordinary shares outstanding during the period. For the purpose of calculating diluted earnings per share, the Group adjusts profit or loss attributable to ordinary equity holders of the Parent Company and the weighted average number of shares outstanding for the effects of all dilutive potential ordinary shares including convertible bonds and share options.

3.22 Leases

As explained in Note 2.2 above, the Group has changed its accounting policy for leases. The impact of the new accounting policies is disclosed in Note 45.

Lease income from operating leases where the Group is a lessor is recognized in income on a straight-line basis over the lease term. Initial direct costs incurred in obtaining an operating lease are added to the carrying amount of the underlying asset and recognized as expense over the lease term on the same basis as lease income. The respective leased assets are included in the statement of financial position based on their nature. The Group did not need to make any adjustments to the accounting for assets held as a lessor as a result of adopting the new leasing standard.

At inception of a contract, the Group is required to assess whether the contract is, or contains, a lease. Also, at the date of initial application, the Group has assessed whether the contract is, or contains, a lease in accordance with the standard. However, the Group did not reassess all contracts as the Group elected to apply the practical expedient not to apply the standard to contracts that were not previously identified as containing a lease. On the basis of the date of initial application, the Group assesses whether the contract is, or contains, a lease.

A lessee is required to recognize a right-of-use asset (lease assets) representing its right to use the underlying leased asset and a lease liability representing its obligation to make lease payments. Assets and liabilities arising from a lease are initially measured on a present value basis,

Lease liabilities include the net present value of the following lease payments:

- Fixed payments (including in-substance fixed payments), less any lease incentives receivable
- Variable lease payment that are based on an index or a rate
- Amounts expected to be payable by the lessee under residual value guarantees
- The exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- Payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Right-of-use assets are measured at cost comprising the following:

- The amount of the initial measurement of lease liability
- Any lease payments made at or before the commencement date less any lease incentives received
- Any initial direct costs, and
- Restoration costs

However, short-term lease (lease that, at the commencement date, has a lease term of 12 months or less) and lease of low-value assets (For example, underlying leased asset under \$ 5,000) are permitted to elect exceptional conditions.

The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term.

Related to sale and leaseback, an entity (seller-lessee) is required to applying IFRS 1115 'Revenue from Contracts with Customers' to determine whether the transfer of an asset is accounted for as a sale of that asset. However, the Group has not reassessed sale and leaseback transactions entered into before the date of initial application.

Extension and termination options are included in a number of leases across the Group. These terms are used to maximize operational flexibility in terms of managing contracts. The majority of extension and termination options held are exercisable only by the Group and not by the respective lessor. But the Group is evaluating its application in accordance with the IFRIC's decision about "lease term and useful life of leasehold Improvements"

3.23 Operating Segments

Operating segments are components of the Group where separate financial information is available and is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance.

Segment information includes items which are directly attributable and reasonably allocated to the segment.

3.24 Overlay Approach

The Group applies the overlay approach in accordance with Korean IFRS 1104, and financial asset is eligible for designation for the overlay approach if, and only if, the following criteria are met:

- It is measured at fair value through profit or loss applying Korean IFRS 1109 but would not have been measured at fair value through profit or loss in its entirety applying Korean IFRS 1039.
- It is not held in respect of an activity that is unconnected with contracts within the scope of Korean IFRS 1104.

The Group reclassifies between profit or loss and other comprehensive income, and the amount reclassified is equal to the difference between:

- The amount reported in profit or loss for the designated financial assets applying Korean IFRS 1109.
- The amount that would have been reported in profit or loss for the designated financial assets if the insurer had applied Korean IFRS 1039.

The Group is permitted to apply this approach either at initial recognition or it may subsequently designate financial assets that newly meet criterion of not being held in respect of activity unconnected with insurance contract, they having previously not met that criterion.

The Group continues to apply the overlay approach to a designated financial asset until that financial asset is derecognized. However, the Group de-designates a financial asset when the financial asset no longer meets the criterion. In this case, the Group reclassifies from accumulated other comprehensive income to profit or loss as a reclassification adjustment any balance relating to that financial asset.

At the beginning of any annual period, the Group may stop applying the overlay approach to all designated financial assets, and shall not subsequently apply the overlay approach, if it stops using this approach because it is no longer an insurer.

4. Financial Risk Management

4.1 Summary

4.1.1 Overview of financial risk management policy

The financial risks that the Group is exposed to are credit risk, market risk, liquidity risk, operational risk and others.

The Group's risk management system focuses on increasing transparency, developing the risk management environment, preventing transmission of risk to other related subsidiaries, and the preemptive response to risk due to rapid changes in the financial environment to support the Group's long-term strategy and business decisions efficiently. Credit risk, market risk, liquidity risk, and operational risk have been recognized as the Group's key risks. These risks are measured and managed in Economic Capital or VaR (Value at Risk) using a statistical method.

4.1.2 Risk management organization

Risk Management Committee

The Risk Management Committee establishes risk management strategies in accordance with the directives of the Board of Directors and determines the Group's target risk appetite. The Committee approves significant risk matters and reviews the level of risks that the Group is exposed to and the appropriateness of the Group's risk management operations as an ultimate decision–making authority.

Risk Management Council

The Risk Management Council is a consultative group which reviews and makes decisions on matters delegated by the Risk Management Committee, and discusses the detailed issues relating to the Group's risk management.

Risk Management Division

The Risk Management Division is responsible for monitoring and managing the Group's economic capital limit and managing detailed policies, procedures and working processes relating to the Group's risk management.

4.2 Credit Risk

4.2.1 Overview of credit risk

Credit risk is the risk of possible losses in an asset portfolio in the event of a counterparty's default, breach of contract and deterioration in the credit quality of the counterparty. For risk management reporting purposes, the individual borrower's default risk, country risk, specific risks and other credit risk exposure components are considered as a whole.

The Group uses definition of default as defined and applied in the calculation of Capital Adequacy Ratio (Basel III) in accordance with the new Basel Accord.

4.2.2 Credit risk management

The Group measures expected losses and economic capital on assets that are subject to credit risk management whether on- or off-balance sheet items and uses expected losses and economic capital as a management indicator. The Group manages credit risk by allocating credit risk economic capital limits.

In addition, the Group controls the credit concentration risk exposure by applying and managing total exposure limits to prevent an excessive risk concentration to each industry and borrower.

The Group has organized a credit risk management team that focuses on credit risk management in accordance with the Group's credit risk management policy. Especially, the loan analysis department of Kookmin Bank, one of the subsidiaries, is responsible for loan policy, loan limit, loan review, credit management, restructuring and subsequent event management, independently of operating department. On the other hand, risk management group of Kookmin Bank is responsible for planning risk management policy, applying limits of credit lines, measuring the credit risk economic capital, adjusting credit limits, reviewing credit and verifying credit evaluation models.

4.2.3 Maximum exposure to credit risk

The Group's maximum exposures of financial instruments, excluding equity securities, to credit risk without consideration of collateral values as of December 31, 2019 and 2018, are as follows:

| | _ | | | (III IIIIIIIOIIS OI KOIEdii Woli) |
|--|---|-------------|---|-----------------------------------|
| | | 2019 | | 2018 |

| | ₩ | 654,860,994 | ₩ | 605,066,612 |

¹Due from financial institutions, loans and securities measured at amortized cost and other financial assets are net of allowance.

4,2,4 Credit risk of loans

The Group maintains an allowance for loan losses associated with credit risk on loans to manage its credit risk.

The Group assesses expected credit loss on financial asset at amortized cost and financial asset at fair value through other comprehensive income other than financial asset at fair value through profit or loss and recognizes loss allowance. Expected credit losses are a probability-weighted estimate of possible credit losses within certain range by reflecting reasonable and supportable information that is reasonably available at the reporting date without undue cost or effort, including information about past events, current conditions and forecasts of future economic conditions. The Group assesses the expected credit losses for loans categorized in financial assets at amortized cost, and presents it with the name of account 'allowance for loan losses' netting from the related carrying amounts. For the expected credit losses for loans categorized in financial assets at fair value through other comprehensive income, the Group presents it in other comprehensive income.

Loans as of December 31, 2019 and 2018 are classified as follows:

| | | | 2019 | | |
|--------------------------------------|---|--|-------------|--|------------------------|

Due from financial institutions, financial assets at fair value through profit or loss and derivatives that are linked to gold price are mostly relevant to financial and insurance industry with high credit ratings.

4.3 Liquidity Risk

4.3.1 Overview of liquidity risk

Liquidity risk is a risk that the Group becomes insolvent due to uncertain liquidity caused by unexpected cash outflows, or a risk of borrowing high interest debts or disposal of liquid and other assets at a substantial discount. The Group manages its liquidity risk through analysis of the contractual maturity of interest-bearing assets and liabilities, assets and liabilities related to the other financing, and off-balance sheet items related to cash flow of currency derivative instruments and others.

Cash flows disclosed for the maturity analysis are undiscounted contractual principal and interest to be received (paid) and; thus, are not identical to the amount in the financial statements that are based on the present value of expected cash flows in some cases. The amount of interest to be received or paid on floating rate assets and liabilities is measured on the assumption that the current interest rate would be the same through the maturity.

4.3.2. Liquidity risk management and indicator

The liquidity risk is managed by risk management policy and liquidity risk management guidelines which are applied to the risk management policies and procedures that address all the possible risks that arise from the overall business of the Group.

The Group computes and manages cumulative liquidity gap and liquidity rate subject to all transactions that affect cash flow in Korean won and foreign currencies and off-balance sheet transactions in relation to the liquidity. The Group regularly reports to the Risk Planning Council and Risk Management Committee.

4.3.3. Analysis of remaining contractual maturity of financial assets and liabilities

Cash flows disclosed below are undiscounted contractual principal and interest to be received (paid) and; thus, are not identical to the amount in the consolidated financial statements that are based on the present value of expected cash flows. The amount of interest to be received or paid on floating rate assets and liabilities is measured on the assumption that the current interest rate would be the same through the maturity.

The remaining contractual maturity of financial assets and liabilities, excluding derivatives held for cash flow hedging, as of December 31, 2019 and 2018, are as follows:

4.4 Market Risk

4.4.1 Concept

Market risk represents possible losses which arise from changes in market factors including interest rate, stock price, foreign exchange rate and other market factors that affect the fair value or future cash flows of financial instruments including securities and derivatives amongst others. The most significant risk associated with trading positions interest rate risks, currency risks and also, stock price risks. In addition, the Group is exposed to interest rate risks associated with non-trading positions. The Group classifies exposures to market risk into either trading or non-trading positions. The Group measures and manages market risk separately for each subsidiary.

4.4.2 Risk management

The Group sets internal capital limits for market risk and interest rate risk and monitors the risks to manage the risk of trading and non-trading positions. The Group maintains risk management systems and procedures including trading policies and procedures, and market risk management guidelines for trading positions, and interest rate risk management guidelines for non-trading positions in order to manage market risk efficiently. The procedures mentioned are implemented with approval from the Risk Management Committee and Risk Management Council.

Kookmin Bank, one of the subsidiaries, establishes market risk management policy, sets position limits, loss limits and VaR limits of each business group and approves newly developed instruments through its Risk Management Council. The Market Risk Management Committee, which is chaired by the Chief Risk Officer (CRO), is the decision maker and sets position limits, loss limits, VaR limits, sensitivity limits and scenario loss limits for each division, at the level of each individual business department.

The ALCO of Kookmin Bank determines the operational standards of interest and commission, the details of the establishment and prosecution of the Asset Liability Management (ALM) policies and enacts and amends relevant guidelines. The Risk Management Committee and Risk Management Council monitor the establishment and enforcement of ALM risk management policies, and enact and amend ALM risk management guidelines. The interest rate risk limit is set based on the future assets/liabilities position and interest rate volatility estimation reflects the annual work plan. The ALM Department and Risk Management Department measures and monitors the interest risk status and limits on a regular basis. The status and limits of interest rate risks including interest gap, duration gap and interest rate VaR (Value at Risk), are reported to the ALCO and Risk Management Council on a monthly basis and to the Risk Management Committee on a quarterly basis. To ensure adequacy of interest rate and liquidity risk management, the Risk Management Department assigns the limits, monitors and reviews the risk management procedures and tasks conducted by the ALM Department. Also, the Risk Management Department independently reports related information to the management.

4.4.3 Trading Position

Definition of a trading position

Trading positions subject to market risk management are defined under the Trading Policy and Guideline, and the basic requirements are as follows:

- The trading position is not restricted for sale, is measured daily at fair value, and its significant inherent risks are able to be hedged in the market.
- The criteria for classification as a trading position are clearly defined in the Trading Policy and Guideline, and separately managed by the trading department.
- The trading position is operated in accordance with the documented trading strategy and managed through position limits,
- The operating department or professional dealers have an authority to enforce a deal on the trading position within predetermined limits without pre-approval.
- The trading position is reported periodically to management for the purpose of the Group's risk management

Observation method on market risk arising from trading positions

Subsidiaries of the Group calculate VaR to measure the market risk by using market risk management systems on the entire trading portfolio. Generally, the Group manages market risk on the trading portfolio. In addition, the Group controls and manages the risk of derivative trading based on the regulations and guidelines formulated by the Financial Supervisory Service.

VaR (Value at Risk)

i, VaR (Value at Risk)

Kookmin Bank, one of the subsidiaries, uses the value-at-risk methodology to measure the market risk of trading positions. Kookmin Bank uses the 10-day VaR, which estimates the maximum amount of loss that could occur in ten days under an historical simulation model which is considered to be a full valuation method. The distributions of portfolio's value changes are estimated based on the data over the previous 250 business days, and ten-day VaR is calculated by subtracting net present market value from the value measured at a 99% confident level of portfolio's value distribution results.

VaR is a commonly used market risk measurement technique. However, the method has some shortcomings. VaR estimates possible losses over a certain period at a particular confidence level using past market movement data. Past market movements are, however, not necessarily a good indicator of future events, as there may be conditions and circumstances in the future that the model does not anticipate. As a result, the timing and magnitude of the actual losses may vary depending on the assumptions made at the time of the calculation. In addition, the time periods used for the model, generally one or ten days, are assumed to be a sufficient holding period before liquidating the relevant underlying positions. If these holding periods are not sufficient, or too long, the VaR results may understate or overstate the potential loss.

A subsidiary which holds trading positions uses an internal model (VaR) to measure general risk, and a standard method to measure each individual risk. When the internal model is not permitted for certain market risk, the Group uses the standard method. Therefore, the market risk VaR may not reflect the market risk of each individual risk and some specific positions. And also, non-banking subsidiaries use the same standard method applied to measure regulatory capital for improvement of market risk VaR management utility (improvement of relation with regulatory capital).

ii. Back-Testing

Back-testing is conducted on a daily basis to validate the adequacy of the market risk model. In back-testing, the Group compares both the actual and hypothetical profit and loss with the VaR calculations,

iii. Stress Testing

Stress testing is carried out to analyze the impact of abnormal market situations on the trading and available–for–sale portfolio. It reflects changes in interest rates, stock prices, foreign exchange rates, implied volatilities of derivatives and other risk factors that have significant influence on the value of the portfolio. The Group uses historical scenarios and hypothetical scenarios for the analysis of abnormal market situations. Stress testing is performed at least once every year.

VaR at a 99% confidence level of interest rate, stock price and foreign exchange rate risk for trading positions with a ten-day holding period by a subsidiary as of December 31, 2019 and 2018, are as follows:

Kookmin Bank

| | | | | 20: | 19 | | | |

Details of risk factors

i. Interest rate risk

Trading position interest rate risk usually arises from debt securities denominated in Korean won. The Group's trading strategy is to benefit from short-term movements in the prices of debt securities arising from changes in interest rates. The Group manages interest rate risk on trading positions using market value-based tools such as VaR and sensitivity analysis (Price Value of a Basis Point: PVBP).

ii, Stock price risk

Stock price risk only arises from trading securities denominated in Korean won as the Group does not have any trading exposure to shares denominated in foreign currencies. The trading securities portfolio in Korean won are composed of exchange–traded stocks and derivative instruments linked to stock with strict limits on diversification.

iii. Foreign exchange rate risk

Foreign exchange rate risk arises from holding assets and liabilities denominated in foreign currency and foreign currency derivatives. Net foreign currency exposure mostly occurs from the foreign assets and liabilities which are denominated in US dollars and Chinese Yuan. The Group sets both loss limits and net foreign currency exposure limits and manages comprehensive net foreign exchange exposures which consider both trading and non-trading portfolios.

4.4.4 Non-trading position

Definition of non-trading position

Managed interest rate risk in non-trading position includes on- or off-balance sheet assets, liabilities and derivatives that are sensitive to interest rate, except trading position for market risk. The interest rate sensitive assets and liabilities are interest-bearing assets and liabilities that create interest income and expenses.

Observation method on market risk arising from non-trading position

As a qualitative methodology, interest rate risk arises from a change in equity and earnings caused by fluctuation in value of interest rate sensitive assets and liabilities, and these risks are measured with change in Economic Value of Equity (Δ EVE) or interest rate VaR and change in Net Interest Income (Δ NII). In addition, as a quantitative methodology, average and longest maturity of interest rate revision for non-maturity deposits are monitored by the Group.

Interest rate risk levels

i. Subsidiary Kookmin Bank

Kookmin Bank calculates \triangle EVE by applying six types of rate shock and crisis scenarios, and \triangle NII by applying parallel rise and decline impact scenarios. The results as at December 31, 2019 are as follows:

(In millions of Korean won)

| | 2019 | 9 |
|---|--|-----------------------------------|
| | Changes in the Economic Value of Equity | Changes in Net Interest Income |
| Scenario 1 (Parallel rise) | 483,207 | 152,013 |
| Scenario 2 (Parallel decline) | 31,718 | 9,717 |
| Scenario 3 (Short-term decline, long-term rise) | 257,756 | _ |
| Scenario 4 (Short-term rise, long-term decline) | 411,237 | _ |
| Scenario 5 (Short-term rise) | 378,380 | _ |
| Scenario 6 (Short-term decline) | 492,047 | _ |
| Maximum of Scenarios 1-6 | 492,047 | 152,013 |
| Basic capital | 27,609,684 | - |

(*) As of the end of December 2019, interest rate risk was calculated by different method from the previous disclosure due to the revision of the Detailed Supervisory Regulations on Banking Business.

The results of previous method as at December 31, 2018 are as follows:

| | 2018 |
|-------------------|---------|
| Interest Rate VaR | 168,282 |

ii. Non-bank Subsidiaries

Interest rate VaR is the maximum possible loss due to interest rate risk under a normal distribution at a 99.9% confidence level. The measurement results of risk as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 2019 | 2018 |
|-----------------------------|----------|----------|
| KB Securities Co., Ltd. | ₩ 20,605 | ₩ 23,004 |

4.5 Operational Risk

4.5.1 Concept

The Group defines operational risk broadly to include all financial and non-financial risks that may arise from operating activities and could cause a negative effect on capital.

4.5.2 Risk management

The purpose of operational risk management is not only to comply with supervisory and regulatory requirements but also to promote a risk management culture, strengthen internal controls, innovate processes and provide timely feedback to management and employees. In addition, Kookmin Bank established Business Continuity Plans (BCP) to ensure critical business functions can be maintained, or restored, in the event of material disruptions arising from internal or external events. It has constructed replacement facilities as well as has carried out exercise drills for head office and IT departments to test its BCPs.

4.6 Capital Adequacy

The Group complies with the capital adequacy standard established by the Financial Services Commission. The capital adequacy standard is based on Basel III published by Basel Committee on Banking Supervision in Bank of International Settlements in June 2011 and was implemented in Korea in December 2013. The Group is required to maintain a minimum Common Equity Tier 1 ratio of at least 8.0%(2018: 7.125%), a minimum Tier 1 ratio of :9.5%(2018: 8.625%) and a minimum Total Regulatory Capital of 11.5%(2018:10.625%) as of December 31, 2019.

The Group's equity capital is classified into three categories in accordance with the Supervisory Regulations and Detailed Supervisory Regulations on Financial Holding Companies:

- Common Equity Tier 1 Capital: Common equity Tier 1 Capital represents the issued capital that takes the first and proportionately greatest share of any losses and represents the most subordinated claim in liquidation of the Group, and not repaid outside of liquidation. It includes common shares issued, capital surplus, retained earnings, non-controlling interests of consolidated subsidiaries, accumulated other comprehensive income, other capital surplus and others.
- Additional Tier 1 Capital: Additional Tier 1 Capital includes (i) perpetual instruments issued by the Group that meet the criteria for inclusion in Additional Tier 1 capital, and (ii) stock surplus resulting from the issue of instruments included in Additional Tier 1 capital and others.
- Tier 2 Capital: Tier 2 Capital represents the capital that takes the proportionate share of losses in the liquidation of the Group. Tier 2 Capital includes a fund raised by issuing subordinated debentures maturing in not less than five years that meet the criteria for inclusion in Additional Tier 2 capital, and the allowance for loan losses which are accumulated for assets classified as normal or precautionary as a result of classification of asset soundness in accordance with Regulation on Supervision of Financial Holding Companies and others.

Risk weighted asset means the inherent risks in the total assets held by the Group. The Group calculates risk weighted asset by each risk (credit risk, market risk, and operational risk) based on the Supervisory Regulations and Detailed Supervisory Regulations on Financial Holding Companies and uses it for BIS ratio calculation.

The Group assesses and monitors its adequacy of capital by using the internal assessment and management policy of the capital adequacy. The assessment of the capital adequacy is conducted by comparing available capital (actual amount of available capital) and internal capital (amount of capital enough to cover all significant risks under target credit rate set by the Group). The Group monitors the soundness of finance and provides risk adjusted basis for performance review using the assessment of the capital adequacy.

Internal Capital is the amount of capital to prevent the inability of payment due to unexpected loss in the future. The Group measures, allocates and monitors internal capital by risk type and subsidiaries.

The Risk Management Council of the Group determines the Group's risk appetite and allocates internal capital by risk type and subsidiary. Each subsidiary efficiently operates its capital within a range of allocated internal capital. The Risk Management Department of the Group monitors the limit on internal capital and reports the results to management and the Risk Management Council. The Group maintains the adequacy of capital through proactive review and approval of the Risk Management Committee when the internal capital is expected to exceed the limits due to new business or business expansion.

Details of the Group's capital adequacy calculation in line with Basel III requirements as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 2019 | 2018 |
|----------------------------------|--------------|--------------|
| Equity Capital: | ₩ 36,995,181 | ₩ 34,476,172 |
| Tier 1 Capital | 35,426,114 | 32,993,826 |
| Common Equity Tier 1 Capital | 34,709,873 | 32,993,826 |
| Additional Tier 1 Capital | 716,241 | - |
| Tier 2 Capital | 1,569,067 | 1,482,346 |
| Risk-weighted assets: | 255,549,020 | 236,099,017 |
| Equity Capital (%): | 14.48 | 14.60 |
| Tier 1 Capital (%) | 13.86 | 13.97 |
| Common Equity Tier 1 Capital (%) | 13.58 | 13.97 |

5. Segment Information

5.1 Overall Segment Information and Business Segments

The Group classifies reporting segments based on the nature of the products and services provided, the type of customer, and the Group's management organization.

| Banking Business | Corporate Banking | Loans, deposit products and other related financial services to large, small and medium-size enterprises and SOHO(small office home office)s. | | | | | | |
|-----------------------------|------------------------|---|--|--|--|--|--|--|
| banking business | Retail Banking | Loans, deposit products and other related financial services to individuals and households. | | | | | | |
| | Other Banking Services | Trading activities in securities and derivatives, funding and other supporting activities. | | | | | | |
| Securities Business | | Investment banking, brokerage services and other supporting activities. | | | | | | |
| Non-life Insurance Business | | The activities within this segment include property insurance and other supporting activities. | | | | | | |
| Credit Card Business | | The activities within this segment include credit sale, cash service, card loan and other | | | | | | |
| | | supporting activities. | | | | | | |
| Life Insurance Business | | Life insurance and other supporting activities. | | | | | | |
| | | | | | | | | |

Financial information by business segment as of and for the year ended December 31, 2019, is as follows:

The fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an ordinary transaction between market participants. For each class of financial assets and financial liabilities, the Group discloses the fair value of that class of assets and liabilities in a way that permits it to be compared with its carrying amount at the end of each reporting period. The best evidence of fair value of financial instruments is a quoted price in an active market.

Methods of determining fair value for financial instruments are as follows:

| Cash and due from financial institutions | The carrying amounts of cash and demand due from financial institutions and payment due from financial institutions are a reasonable approximation of fair values. These financial instruments do not have a fixed maturity and are receivable on demand, Fair value of ordinary due from financial institutions is measured using DCF model (Discounted Cash Flow Model). |
|--|--|
| Investment securities | The fair value of financial instruments that are quoted in active markets is determined using the quoted prices. Fair value is determined through the use of external professional valuation institution where quoted prices are not available. The institutions use one or more of the following valuation techniques including DCF Model, Free Cash Flow to Equity Model, Comparable Company Analysis, Dividend Discount Model, Risk Adjusted Discount Rate Method, and Net Asset Value Method. |
| Loans at amortized cost | DCF model is used to determine the fair value of loans. Fair value is determined by discounting the expected cash flows, which are contractual cash flows adjusted by the expected prepayment rate, at appropriate discount rate. |
| Derivatives and Financial instruments at fair value through profit or loss | For exchange traded derivatives, quoted price in an active market is used to determine fair value and for OTC derivatives, fair value is determined using valuation techniques. The Group uses internally developed valuation models that are widely used by market participants to determine fair values of plain vanilla OTC derivatives including options, interest rate swaps, and currency swaps, based on observable market parameters. However, some complex financial instruments are valued using appropriate models developed from generally accepted market valuation models including the Finite Difference Method, the Monte Carlo Simulation, Black–Scholes Model, Hull and White Model, Closed Form and Tree Model or valuation results from independent external professional valuation institution. |
| Deposits | Carrying amount of demand deposits is regarded as representative of fair value because they do not have a fixed maturity and are payable on demand. Fair value of time deposits is determined using a DCF model. Fair value is determined by discounting the expected cash flows, which are contractual cash flows adjusted by the expected prepayment rate, at an appropriate discount rate. |
| Debts | Carrying amount of overdraft in foreign currency is regarded as representative of fair value because they do not have a fixed maturity and are payable on demand. Fair value of other debts is determined using a DCF model discounting contractual future cash flows at an appropriate discount rate. |
| Debentures | Fair value is determined by using the valuations of external professional valuation institution, which are calculated using market inputs. |
| Other financial assets and liabilities | The carrying amounts are reasonable approximation of fair values. These financial instruments are temporary accounts used for other various transactions and their maturities are relatively short or not defined. However, fair value of finance lease liabilities is measured using a DCF model. |

6.1.2 Fair value hierarchy

The Group believes that valuation methods used for measuring the fair values of financial instruments are reasonable and that the fair values recognized in the statement of financial position are appropriate. However, the fair values of the financial instruments recognized in the statement of financial position may be different if other valuation methods or assumptions are used. Additionally, as there is a variety of valuation techniques and assumptions used in measuring fair value, it may be difficult to reasonably compare the fair value with that of other financial institutions.

The Group classifies and discloses fair value of the financial instruments into the three-level hierarchy as follows:

Level 1: The fair values are based on quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.

Level 2: The fair values are based on inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: The fair values are based on unobservable inputs for the asset or liability.

When the inputs used to measure the fair value of an asset or a liability might be categorized within different levels of the fair value hierarchy, the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. Assessing the significance of a particular input to the entire measurement requires judgment, taking into account factors specific to the asset or liability. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

Fair value hierarchy of financial assets and liabilities measured at fair value in the statements of financial position

The fair value hierarchy of financial assets and liabilities measured at fair value in the statements of financial position as of December 31, 2019 and 2018, are as follows:

Valuation techniques and the inputs used in the fair value measurement

Financial assets and liabilities whose carrying amount is a reasonable approximation of fair value are not subject to disclose valuation techniques and inputs.

Valuation techniques and inputs of financial assets and liabilities whose fair values are disclosed and classified as Level 2 as of December 31, 2019 and 2018, are as follows:

²Other financial assets included in Level 3 are the carrying amounts which are reasonable approximation of fair values as of December 31, 2019.

³ Debts of ₩ 4,685 million included in Level 2 is the carrying amounts which are reasonable approximation of fair values as of December 31, 2019.

² Other financial assets of ₩ 8,133,556 million included in Level 3 are the carrying amounts which are reasonable approximation of fair values as of December 31, 2018.

³ Debts of ₩ 38,403 million included in Level 2 is the carrying amounts which are reasonable approximation of fair values as of December 31, 2018.

⁴ Other financial liabilities of ₩ 19,250,252 million included in Level 3 is the carrying amounts which are reasonable approximations of fair values as of December 31, 2018.

6.2 Level 3 of the Fair Value Hierarchy Disclosure

6.2.1 Valuation policy and process for fair value measurement categorized within Level 3

The Group uses external, independent and qualified third-party valuation service in addition to internal valuation models to determine the fair value of the Group's assets at the end of every reporting period.

Where a reclassification between the levels of the fair value hierarchy occurs for a financial asset or liability, the Group's policy is to recognize such transfers as having occurred at the beginning of the reporting period.

6.2.2 Changes in fair value (Level 3) measured using valuation technique based on unobservable in market

Details of changes in Level 3 of the fair value hierarchy for year ended December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

Sensitivity analysis of changes in unobservable inputs

Sensitivity analysis of financial instruments is performed to measure favorable and unfavorable changes in the fair value of financial instruments which are affected by the unobservable parameters, using a statistical technique. When the fair value is affected by more than two input parameters, the amounts represent the most favorable or most unfavorable Level 3 financial instruments subject to sensitivity analysis are (i) equity-related derivatives, currency-related derivatives and interest rate related derivatives whose fair value changes are recognized in profit or loss, (ii) financial liabilities designated at fair value through profit or loss, and (iii) due from financial institutions, debt securities, equity securities and loan receivables whose fair value changes are recognized in profit or loss or other comprehensive income. If overlay approach is applied in accordance with Korean IFRS 1104, changes in fair value of financial assets at fair value through profit or loss are recognized as other comprehensive income.

The results of the sensitivity analysis from changes in inputs are as follows:

| | 2019 | | | | | | | |
|--|-------------------------------|------------|------|----------------------------|-----|----------------|-------|----------------|

¹For financial instruments at fair value through profit or loss, the changes in fair value are calculated by shifting principal unobservable input parameters such as volatility of the underlying asset or correlation between underlying asset by ± 10%.

6.2.4 Day one gain or loss

If the Group uses a valuation technique that incorporates data not obtained from observable markets for the fair value at initial recognition of financial instruments, there could be a difference between the transaction price and the amount determined using that valuation technique. In these circumstances, the fair value of financial instruments is recognized as the transaction price, and the difference is deferred and not recognized in profit or loss, and is amortized by using the straight-line method over the life of the financial instrument. When the fair value of the financial instruments is subsequently determined using observable market inputs, the remaining deferred amount is recognized in profit or loss.

The aggregate difference yet to be recognized in profit or loss at the beginning and end of the year and a reconciliation of changes in the balance of this difference for the years ended December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | | 2018 |
|--------------------------------------|---|-----------|---|----------|
| Balance at the beginning of the year | ₩ | 62,155 | ₩ | 22,814 |
| New transactions and others | | 168,225 | | 131,504 |
| Changes during the year | | (184,613) | | (92,163) |
| Balance at the end of the year | ₩ | 45,767 | ₩ | 62,155 |

6.3 Carrying Amounts of Financial Instruments by Category

Financial assets and liabilities are measured at fair value or amortized cost. The measurement methodology by categories of financial instruments is addressed at Note 3.

 $^{^{1}}$ For financial instruments at fair value through profit or loss, the changes in fair value are calculated by shifting principal unobservable input parameters such as volatility of the underlying asset or correlation between underlying asset by \pm 10%.

² For Derivatives financial instruments, the changes in fair value are calculated by shifting principal unobservable input parameters; such as, price of underlying asset, volatility of stock price, interest rate by ± 10% and the loss given default ratio, discount rate by ± 1%

³ For equity securities, the changes in fair value are calculated by shifting principal unobservable input parameters; such as, correlation between growth rate (0~2.2%) and discount rate.

⁴ Sensitivity of fair values to unobservable parameters of private equity fund is practically impossible, but in the case of equity fund composed of real estates, the changes in fair value are calculated by shifting correlation between discount rate $(-1 \sim 1\%)$ and volatilities of real estate price $(-1 \sim 1\%)$.

 $^{^2}$ For Derivatives financial instruments, the changes in fair value are calculated by shifting principal unobservable input parameters; such as, price of underlying asset, volatility of stock price, interest rate by \pm 10% and the loss given default ratio, discount rate by \pm 1%

³ For equity securities, the changes in fair value are calculated by shifting principal unobservable input parameters; such as, correlation between growth rate (0~2.2%) and discount rate, or liquidation value (-1~1%) and discount rate.

⁴ Sensitivity of fair values to unobservable parameters of private equity fund is practically impossible, but in the case of equity fund composed of real estates, the changes in fair value are calculated by shifting correlation between discount rate $(-1 \sim 1\%)$ and volatilities of real estate price $(-1 \sim 1\%)$.

The carrying amounts of financial assets and liabilities by category as of December 31, 2018 and 2017, are as follows:

6.4 Transfer of Financial Assets

Transferred financial assets that are derecognized in their entirety

The Group transferred loans and other financial assets that are derecognized in their entirety to SPEs (special purpose entity), while the maximum exposure to loss (carrying amount) from its continuing involvement in the derecognized financial assets as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | | | | | | | | | | |
|--------------------------------|--------------------------------|---|---|--------------------------------------|--|--|--|--|--|--|--|--|
| | Type of continuing involvement | Classification of financial instruments | Carrying amount of continuing involvement in the statement of financial position | Fair value of continuing involvement | | | | | | | | |

| | | | ₩ 34,094 | ₩ 34,094 | | | | | | | | |

¹Other than above, additionally recovered portion in excess of the consideration paid attributable to adjustments based on the agreement with the National Happiness Fund for non-performing loans amounts to ₩ 13,731 million as at December 31, 2018.

Transferred financial assets that are not derecognized in their entirety

The Group securitized the loans and issued the asset-backed debentures. The senior debentures and related securitized assets as of December 31, 2019, are as follows:

(In millions of Korean won)

| | | | 20 | 19 | | | |
|--|---|------|------------------------------------|----|----------------------------------|------------------------------------|-----------|
| | Carrying amount of underlying assets | | Fair value of underlying assets | | ying amount of ior debentures | Fair value of senior debentures | |
| KB Kookmin Card Third Securitization Co., Ltd. ¹ | ₩ 601,6 | 59 W | ₩ 592,358 | ₩ | 351,207 | ₩ | 342,204 |
| KB Kookmin Card Fourth Securitization Co., Ltd. ¹ | 560,9 |)3 | 552,216 | | 347,387 | | 340,820 |
| KB Kookmin Card Fifth Securitization Co., Ltd. ¹ | 542,8 | 51 | 534,630 | | 299,795 | | 304,835 |
| KB Kookmin Card Sixth Securitization Co., Ltd. $^{\mathrm{1}}$ | 795,8 | 34 | 784,080 | | 461,909 | | 469,600 |
| | ₩ 2,501,3 | 07 ₩ | ₩ 2,463,284 | ₩ | 1,460,298 | ₩ | 1,457,459 |

¹ The Group has an obligation to early redeem the asset-backed debentures upon occurrence of an event specified in the agreement such as when the outstanding balance of the eligible asset-backed securitization (ABS), a trust-type ABS, is below the solvency margin ratio(minimum rate: 104.5%) of the beneficiary interest in the trust. To avoid such early redemption, the Group entrusts accounts and deposits in addition to the previously entrusted card accounts.

The Group transferred held in the previous year the beneficiary certificates to Yuanta Securities at \forall 74,853 million and entered into a total return swap contract. If the fair value of the transferred asset changes, the risk is attributed to the company in accordance with the contract.

Securities under repurchase agreements and loaned securities

The Group continues to recognize the financial assets related to repurchase agreements and securities lending transactions on the statements of financial position since those transactions are not qualified for derecognition even though the Group transfers the financial assets. A financial asset is sold under a repurchase agreement to repurchase the same asset at a fixed price, or loaned under a securities lending agreement to be returned as the same asset. Thus, the Group retains substantially all the risks and rewards of ownership of the financial asset. The amounts of transferred assets and related liabilities as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 203 | 19 | | |
|------------------------------------|-------------|----------------------------|--|-----------|--|
| | Carrying am | ount of transferred assets | Carrying amount of related liabilities | | |

|------------------------------------|-----------------|--|---|-----------|--|--|--|--|--|
| | Carrying amount | Carrying amount of related liabilities | | | | | | | |
| Repurchase agreements ¹ | ₩ | 9,176,947 | ₩ | 8,784,896 | | | | | |
| Loaned securities | | | | | | | | | |
| Government bond | | 1,160,362 | | - | | | | | |
| Stock | | 58,171 | | = | | | | | |
| | ₩ | 10,395,480 | ₩ | 8,784,896 | | | | | |
| | | | | | | | | | |

¹ The bond sold under repurchase agreements amounts to ₩ 4,126,274 million and ₩ 3,162,000 million as of December 31, 2019 and 2018, respectively.

6.5 Offsetting Financial Assets and Financial Liabilities

The Group enters into International Swaps and Derivatives Association ("ISDA") master netting agreements and other similar arrangements with the Group's derivative and spot exchange counterparties. Similar netting agreements are also entered into with the Group's reverse repurchase, securities and others. Pursuant to these agreements, in the event of default by one party, contracts are to be terminated and receivables and payables are to be offset. Further, as the law allows for the right to offset, domestic uncollected receivables balances and domestic accrued liabilities balances are shown in its net settlement balance in the consolidated statement of financial position.

Details of financial assets subject to offsetting, enforceable master netting arrangements or similar agreement as of December 31, 2019 and 2018, are as follows:

| | 2019 | | | | | | | | | | | |
|--------------------------------------|------|------------|--------------------|--------------|---|------------|-----------------------|--------------|-----------------|-----------|------------|-----------|

9. Derivative Financial Instruments and Hedge Accounting

The Group's derivative operations focus on addressing the needs of the Group's corporate clients to hedge their risk exposure and to hedge the Group's risk exposure that results from such client contracts. The Group also engages in derivative trading activities to hedge the interest rate and foreign currency risk exposures that arise from the Group's own assets and liabilities. In addition, the Group engages in proprietary trading of derivatives within the Group's regulated open position limits.

The Group provides and trades a range of derivatives products, including:

- Interest rate swaps, relating to interest rate risks in Korean won
- Cross-currency swaps, forwards and options relating to foreign exchange rate risks,
- Stock price index options linked with the KOSPI index.

In particular, the Group applies fair value hedge accounting using cross currency swaps, interest rate swaps and others to hedge the risk of changes in fair values due to the changes in interest rates and foreign exchange rates of structured debts in Korean won, financial debentures in foreign currencies, structured deposits in Korean won, and structured deposits in foreign currencies. In addition, the Group applies net investment hedge accounting by designating financial debentures in foreign currencies as hedging instruments to hedge foreign exchange risks on net investments in foreign operations.

Details of derivative financial instruments held for trading as of December 31, 2019 and 2018, are as follows:

| | | | | 2019 | | | | | | 2018 | | |

¹ As of December 31, 2019 and 2018, the Group is represented on the governing bodies of its associates. Therefore, the Group has a significant influence over the decision-making process relating to their financial and business policies.

² The market value of KB No.10 Special Purpose Acquisition Company, reflecting the quoted market price as of December 31, 2018, amounts to ₩ 20 million.

⁵ The market value of KB No.11 Special Purpose Acquisition Company, reflecting the quoted market price as of December 31, 2018, amounts to 😾 21 million.

⁴ The market value of KB No.17 Special Purpose Acquisition Company, reflecting the quoted market price as of December 31, 2019, amounts to ₩ 2 million.

⁵ The market value of KB No.18 Special Purpose Acquisition Company, reflecting the quoted market price as of December 31, 2019, amounts to ₩ 4 million.

⁶ The market value of KB No.19 Special Purpose Acquisition Company, reflecting the quoted market price as of December 31, 2019, amounts to ₩ 2 million.

⁷ The market value of KB No.20 Special Purpose Acquisition Company, reflecting the quoted market price as of December 31, 2019, amounts to ¥ 2 million.

⁸ Reclassified to investments in associates due to termination of rehabilitation procedures.

⁹ Carrying amount of the investment has been recognized as a loss from the date Hyundai Securities Co., Ltd. was included in the consolidation scope.

¹⁰ In order to direct relevant activities, it is necessary to obtain the consent of the two co-operative members; the Group has applied the equity method as the Group cannot control the investee by itself.

¹¹ The ownership of Paycoms Co., Ltd. would be 22.96% and 22.96% as of December 31, 2019 and 2018, respectively, considering the potential voting rights from convertible bond.

 $^{^{12}}$ The ownership of Acts Co., Ltd. would be 27.22% and 27.22% as of December 31, 2019 and 2018, respectively, considering the potential voting rights from convertible bond.

¹³ The ownership of Food Factory Co., Ltd. would be 30.00% and 30.00% as of December 31, 2019 and 2018, respectively, considering the potential voting rights from convertible bond.

¹⁴ The ownership of Builton Co., Ltd. would be 26.86% as of December 31, 2018, considering the potential voting rights from convertible bond.

¹⁵ In accordance with Korean IFRS 1028 Investments in Associates and Joint Ventures, application of the equity method is exempted, and the Group designates its investments measured at fair value through profit or loss in Rainist Co., Ltd., RMGP Bio-Pharma Investment Fund, L.P., RMGP Bio-Pharma Investment, L.P., HEYBIT, Inc., Hasys., Stratio, Inc., Honest Fund Co., Ltd., CY Co., Ltd., CY Co., Ltd., ZOYI corporation INC., KOSESEUJITO CO., LTD., Bomapp Inc., KB Cape No.1 Private Equity Fund., Mitoimmune Therapeutics, BNF Corporation Ltd., Fabric Types Co., LTD.

¹⁶ The Group has entered into an agreement with PT Bosowa Corporindo, the major shareholder of PT Bank Bukopin TBK. Under this agreement, the Group has a right of first refusal, a tag-along right and a drag-along right. The drag-along right can be exercised for the duration of two years after three years from the acquisition date, subject to the occurrence of certain situations as defined in the agreement.

¹⁷ The fair value of PT Bank Bukopin TBK ordinary share is ₩ 47,709 million and ₩ 53,540 million as of December 31, 2019 and 2018.

Although the Group holds more than 20% of ownership, it has been excluded from associates by limited influence due to the trust agreement on related activities, bankruptcy and rehabilitation procedures.

Summarized financial information on major associates and joint ventures, adjustments to carrying amount of investment in associates and dividends received from the associates are as follows:

The valuation technique and input variables that are used to measure the fair value of investment property as of December 31, 2019, are as follows:

(In millions of Korean won)

| | | | 2019 | |
|--------------------|---|------------|--------------------------|-----------------------------|
| | | Fair value | Valuation technique | Inputs |
| Land and buildings | ₩ | 33,594 | Cost Approach Method | - Price per square meter |
| | | | | - Replacement cost |
| | | 1,000,227 | Market comparison method | - Price per square meter |
| | | | | - Prospective rental market |
| | | | | growth rate |
| | | 1,602,772 | Cash flow approach | - Period of vacancy |
| | | | | – Rental rate |
| | | | | - Discount rate and others |
| | | | | - Discount rate |
| | | 396,133 | Income approach | - Capitalization rate |
| | | | | - Vacancy rate |

As of December 31, 2019 and 2018, fair values of the investment properties amount to ₩ 3,032,726 million and ₩ 2,287,012 million, respectively. The investment properties were measured by qualified independent appraisers with experience in valuing similar properties in the same area. In addition, per the fair value hierarchy on Note 6.1, the fair value hierarchy of all investment properties has been categorized and classified as Level 3.

Rental income from the above investment properties for the years ended December 31, 2019 and 2018, amounts to \$\psi\$ 129,944 million and \$\psi\$ 87,513 million , respectively.

The changes in investment property for the years ended December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | | | | | | | 2019 | | | | | | | |

¹ The amount occurred from formerly known as KB Investment&Securities Co., Ltd.

Goodwill is allocated to cash-generating units, based on management's analysis, that are expected to benefit from the synergies of the combination for impairment testing, and cash-generating units consist of an operating segment or units which are not larger than an operating segment. The Group recognized the amount of \forall 65,288 million related to goodwill acquired in the merger of Housing & Commercial Bank. Of those respective amounts, the amounts of \forall 49,315 million and \forall 15,973 million were allocated to the Retail Banking and Corporate Banking, respectively. Cash-generating units to which goodwill has been allocated is tested for impairment annually, and whenever there is an indication that the unit may be impaired, by comparing the carrying amount of the unit, including the goodwill, with the recoverable amount of the unit.

The recoverable amount of a cash-generating unit is measured at the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell is the amount obtainable from the sale in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal. If it is difficult to measure the amount obtainable from the sale, the Group measures the fair value less costs to sell by reflecting the characteristics of the measured cash-generating unit. If it is not possible to obtain reliable information to measure the fair value less costs to sell, the Group uses the asset's value in use as its recoverable amount. Value in use is the present value of the future cash flows expected to be derived from an asset or cash-generating unit. The projections of the future cash flows are based on the most recent financial budget approved by management and generally cover a period of five years. The future cash flows after projection period are estimated on the assumption that the future cash flows will increase by 1.0% for all other cash-generating units. The key assumptions used for the estimation of the future cash flows are the market size and the Group's market share. The discount rate is a pretax rate that reflects assumptions regarding risk-free interest rate, market risk premium and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

² Changed corporate name from MARITIME SECURITIES INCORPORATION.

Unrecognized deferred income tax assets

No deferred income tax assets have been recognized for the deductible temporary difference of \forall 67,645 million associated with investments in subsidiaries and others as of December 31, 2019, because it is not probable that the temporary differences will be reversed in the foreseeable future.

No deferred income tax assets have been recognized for deductible temporary differences of \forall 125,158 million with others, as of December 31, 2019, due to the uncertainty that these will be realized in the future.

Unrecognized deferred income tax liabilities

No deferred income tax liabilities have been recognized for the taxable temporary difference of ₩ 68,836 million associated with investment in subsidiaries and associates as of December 31, 2019, due to the following reasons:

- The Group is able to control the timing of the reversal of the temporary difference.
- It is probable that the temporary difference will not be reversed in the foreseeable future.

No deferred income tax liabilities have been recognized as of December 31, 2019, for the taxable temporary difference of ₩ 65,288 million arising from the initial recognition of goodwill from the merger of Housing and Commercial Bank in 2001.

The changes in cumulative temporary differences for the years ended December 31, 2019 and 2018, are as follows:

17. Assets Held for Sale

Details of assets held for sale as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 2019 | | | | | | | | |
|-------------------------|-------------------------------|----|-------------|---------|----------|--------|----------------------------------|--------|--|
| | Acquisition cost ¹ | | Accumulated | | Carrying | | Fair value less costs to sell | | |
| | | | impairment | | amount | | | | |
| Land held for sale | ₩ 14,5 | 42 | ₩ | (1,530) | ₩ | 13,012 | ₩ | 14,374 | |
| Buildings held for sale | 11,3 | 91 | | (1,252) | | 10,139 | | 12,396 | |
| | ₩ 25,9 | 33 | ₩ | (2,782) | ₩ | 23,151 | ₩ | 26,770 | |

| | | 2018 | | | | | | | |
|-------------------------|-------|--|---|---------|--------------------|--------|-------------------------------|--------|--|
| | Acqui | Acquisition cost ¹ Accumulated impairment | | | Carrying amount | | Fair value less costs to sell | | |
| Land held for sale | ₩ | 16,048 | ₩ | (3,442) | ₩ | 12,606 | ₩ | 16,552 | |
| Buildings held for sale | | 9,054 | | (4,708) | | 4,346 | | 4,403 | |
| | ₩ | 25,102 | ₩ | (8,150) | ₩ | 16,952 | ₩ | 20,955 | |

¹ Acquisition cost of buildings held for sale is net of accumulated depreciation.

The valuation technique and input variables that are used to measure the fair value of assets held for sale as of December 31, 2019 are as follows:

(In millions of Korean won)

| | 2019 | | | | | | | | | |
|--------------------|------------|-------------------------------------|---------------------|--|---|--|--|--|--|--|
| | Fair value | Valuation technique ¹ | Unobservable input² | Range of unobservable inputs (%) | Relationship of unobservable inputs to fair value | | | | | |
| Land and buildings | ₩ 26,770 | Market comparison approach model | Adjustment index | 0.44 ~ 1.40 | Fair value increases as the adjustment index rises. | | | | | |

¹ The Group adjusted the appraisal value by the adjustment ratio in the event the public sale is unsuccessful.

The fair values of assets held for sale were measured by qualified independent appraisers with experience in valuing similar properties in the same area. In addition, per the fair value hierarchy on Note 6.1, the fair value hierarchy of all investment properties has been categorized and classified as Level 3.

The changes in accumulated impairment losses of assets held for sale for the years ended December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | | | | 2019 | | | | |
|---|-----------|---|-----------|---|---------|---|--------|---|---------|
| | Beginning | | Provision | R | eversal | | Others | | Ending |
| ₩ | (8,150) | ₩ | (333) | ₩ | - | ₩ | 5,701 | ₩ | (2,782) |

(In millions of Korean won)

| | | | | | 2018 | | | | |
|---|-----------|-----------|---------|---|----------|---|--------|--------|---------|
| | Beginning | Provision | | | Reversal | (| Others | Ending | |
| ₩ | (12,801) | ₩ | (5,281) | ₩ | 286 | ₩ | 9,646 | ₩ | (8,150) |

As of December 31, 2019, assets held for sale consist of four real estates of closed offices, which were committed to sell by the management, but not yet sold as of December 31, 2019. Negotiation with buyers is in process for the one asset and the remaining three assets are also being actively marketed.

18. Other Assets

Details of other assets as of December 31, 2019 and 2018, are as follows:

| | 2019 | 2018 |
|-------------------------------------|--------------|--------------|
| Other financial assets | | |
| Other receivables | ₩ 5,792,814 | ₩ 4,708,910 |
| Accrued income | 1,659,182 | 1,724,328 |
| Guarantee deposits | 1,146,000 | 1,182,686 |
| Domestic exchange settlement debits | 531,356 | 504,899 |
| Others | 129,039 | 125,380 |
| Allowances | (104,629) | (106,275) |
| Present value discount | (6,703) | (6,372) |
| | 9,147,059 | 8,133,556 |
| Other non-financial assets | | |
| Other receivables | 1,294 | 4,965 |
| Prepaid expenses | 198,893 | 205,394 |
| Guarantee deposits | 4,084 | 4,529 |
| Insurance assets | 1,662,016 | 1,362,877 |
| Separate account assets | 5,052,804 | 4,715,414 |
| Others | 2,173,693 | 1,347,580 |
| Allowances | (24,235) | (24,780) |
| | 9,068,549 | 7,615,979 |
| | ₩ 18,215,608 | ₩ 15,749,535 |

² Adjustment index is calculated using the real estate index or the producer price index, or land price volatility.

Changes in allowances on other assets for the years ended December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | | | | | | |
|----------------------|-------|------------------|----------|--------------------|---|---------|--|--|
| | Other | financial assets | Other no | n-financial assets | | Total | | |

| Effects of changes in discount rate | | 15,455 | | 8,680 |
| Ending | ₩ | 120,340 | ₩ | 108,000 |

Provisions for restoration cost are the present value of estimated costs to be incurred for the restoration of the leased properties. Actual expenses are expected to be incurred at the end of each lease contract. Three-year historical data of expired leases were used to estimate the average lease period. Also, the average restoration expense based on actual three-year historical data and the three-year historical average inflation rate were used to estimate the present value of estimated costs.

Changes in other provisions for the years ended December 31, 2019 and 2018, are as follows:

24. Net Defined Benefit Liabilities (assets)

Defined benefit plan

The Group operates defined benefit plans which have the following characteristics:

- The Group has the obligation to pay the agreed benefits to all its current and former employees.
- Actuarial risk (that benefits will cost more than expected) and investment risk fall, in substance, on the Group.

The defined benefit liability recognized in the statements of financial position is calculated by independent actuaries in accordance with actuarial valuation methods.

The net defined benefit obligation is calculated using the Projected Unit Credit method (the 'PUC'). Data used in the PUC such as interest rates, future salary increase rate, mortality rate and consumer price index are based on observable market data and historical data which are updated annually.

Actuarial assumptions may differ from actual results, due to changes in the market, economic trends and mortality trends which may impact defined benefit liabilities and future payments. Actuarial gains and losses arising from changes in actuarial assumptions are recognized in the period incurred through other comprehensive income.

Changes in the net defined benefit liabilities for the years ended December 31, 2019 and 2018, are as follows:

| | | | 2019 | |
|--|---|---------|---------------------------|---------------------------------|
| | Present value of de benefit obligation | | Fair value of plan assets | Net defined benefit liabilities |
| Beginning | ₩ 2,1 | 72,260 | ₩ (1,910,047) | ₩ 262,213 |

Details of the net defined benefit liabilities as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | | 2018 |
|---|---|-------------|---|-------------|
| Present value of defined benefit obligation | ₩ | 2,341,753 | ₩ | 2,172,260 |
| Fair value of plan assets | | (2,088,710) | | (1,910,047) |
| Net defined benefit liabilities | ₩ | 253,043 | ₩ | 262,213 |

Details of post-employment benefits recognized in profit or loss as employee compensation and benefits for the years ended December 31, 2019 and 2018, are as follows:

| | | 2019 | | 2018 |
|--|---|---------|---|---------|
| Current service cost | ₩ | 226,788 | ₩ | 208,470 |
| Past service cost ¹ | | 2,276 | | 7,912 |
| Net interest expenses of net defined benefit liabilities | | 5,545 | | 3,833 |
| Gain or loss on settlement | | - | | (1,000) |
| Post-employment benefits ² | ₩ | 234,609 | ₩ | 219,215 |

¹ During the year ended December 31, 2018, other provisions (amounting to ₩ 22,306 million as of December 31, 2018) were transferred into net defined benefit liabilities.

² Including post-employment benefits amounting to ₩ 2,575 million recognized as other operating expense and prepayment of ₩ 121 million recognized as other assets as of and for the year ended December 31, 2019, and post-employment benefits amounting to ₩ 2,047 million recognized as other operating expense and prepayment of ₩ 83 million recognized as other assets for the year ended December 31, 2018.

Remeasurements of the net defined benefit liabilities recognized as other comprehensive income for the years ended December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | | 2018 |
|---|---|----------|---|-----------|
| Remeasurements: | | | | |
| Return on plan assets (excluding amounts included in interest income) | ₩ | (11,116) | ₩ | (22,420) |
| Actuarial gains and losses | | (65,883) | | (167,973) |
| Income tax effects | | 21,172 | | 52,377 |
| Remeasurements after income tax | ₩ | (55,827) | ₩ | (138,016) |

Details of intangible assets as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 2019 | | | | | | | |
|--|---|---|-----------|-------|-----------|--|--|--|
| | Assets quoted Assets not quoted in an active market in an active market | | | Total | | | | |
| Cash and due from financial institutions | ₩ - | ₩ | 2,087,861 | ₩ | 2,087,861 | | | |
| Investment fund | - | | 849 | | 849 | | | |
| | ₩ - | ₩ | 2,088,710 | ₩ | 2,088,710 | | | |

(In millions of Korean won)

| | 2018 | | | | | | | | |
|--|-----------------------------------|---------------------------------------|-----------|---|-----------|--|--|--|--|
| | Assets quoted in an active market | Assets not quoted in an active market | | | Total | | | | |
| Cash and due from financial institutions | ₩ | - ₩ | 1,908,028 | ₩ | 1,908,028 | | | | |
| Investment fund | | - | 2,019 | | 2,019 | | | | |
| | ₩ | - ₩ | 1,910,047 | ₩ | 1,910,047 | | | | |

Key actuarial assumptions used as of December 31, 2019 and 2018, are as follows:

| | 2019 | 2018 |
|--------------------------|------------|------------|
| Discount rate (%) | 1,60~2,00 | 2.00~2.30 |
| Salary increase rate (%) | 0.00~7.50 | 0.00~7.50 |
| Turnover (%) | 0.00~50.00 | 0.00~50.00 |

Mortality assumptions are based on the experience-based mortality table of Korea Insurance Development Institute of 2019.

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions as of December 31, 2019, are as follows:

| | | Effect on net defined l | benefit obligation | |
|--------------------------|--------------------------------------|----------------------------------|----------------------------------|--|
| | Changes in — principal assumption | Increase in principal assumption | Decrease in principal assumption | |
| Discount rate (%) | 0.5 р. | 4.22 decrease | 4.48 increase | |
| Salary increase rate (%) | 0.5 p. | 1.86 increase | 6.18 decrease | |
| Turnover (%) | 0.5 p. | 0.75 decrease | 0.67 increase | |

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. The sensitivity of the defined benefit obligation to changes in principal actuarial assumptions is calculated using the projected unit credit method, the same method applied when calculating the defined benefit obligations recognized on the statement of financial position.

Expected maturity analysis of undiscounted pension benefits (including expected future benefit) as of December 31, 2019 are as follows:

(In millions of Korean won)

| | Up to | 1 year | 1~2 | 2 years | 2 | ~5 years | 5~ | 10 years | Ove | r 10 years | | Total |
|-------------------------------|-------|--------|-----|---------|---|----------|----|-----------|-----|------------|---|-----------|
| Pension benefits ¹ | ₩ | 74,718 | ₩ | 153,129 | ₩ | 647,074 | ₩ | 1,365,073 | ₩ | 3,707,746 | ₩ | 5,947,740 |

¹ Excluded amount to be settled per promotion-incentivized defined contribution plan

The weighted average duration of the defined benefit obligation is 1.0 \sim 11.7 years.

Expected contribution to plan assets for periods after December 31, 2019 is estimated to be ₩ 215,290 million.

25. Other Liabilities

26. Equity

26.1 Share Capital

Details of share capital and number of issued shares of the Parent Company as of December 31, 2019 and 2018, are as follows:

| | | 2019 | | 2018 |
|---|---|----------------|---|----------------|
| Type of share | | Ordinary share | | Ordinary share |
| Number of authorized shares | | 1,000,000,000 | | 1,000,000,000 |
| Par value per share (In millions of Korean won) | ₩ | 5,000 | ₩ | 5,000 |
| Number of issued shares | | 415,807,920 | | 418,111,537 |
| Share capital ¹ | ₩ | 2,090,558 | ₩ | 2,090,558 |

 $^{^{1}}$ Due to the retirement of shares deducted through profits, it is different from the total par value of the shares issued.

Changes in outstanding shares for the years ended December 31, 2019 and 2018, are as follows:

(In number of shares)

| | | 2019 | | 2018 |
|-----------|---|-------------|---|-------------|
| Beginning | ₩ | 395,551,297 | ₩ | 399,037,583 |
| Increase | | - | | - |
| Decrease | | (5,916,962) | | (3,486,286) |
| Ending | ₩ | 389,634,335 | ₩ | 395,551,297 |

26.2 Hybrid Securities

Details of hybrid securities classified as equity as of December 31, 2019 and 2018 are as follows:

(In millions of Korean won)

| | Issuance date | Maturity | Interest rate (%) | | 2019 | 2018 | |
|---|---------------|----------------|-------------------|---|---------|------|---|
| The 1-1 st Hybrid securities | May 2, 2019 | Perpetual bond | 3.23 | ₩ | 349,309 | ₩ | _ |
| The 1-2 nd Hybrid securities | May 2, 2019 | Perpetual bond | 3.44 | | 49,896 | | - |
| | | | | ₩ | 399,205 | ₩ | _ |

The above hybrid securities are early redeemable by the Group after 5 or 10 years from the issuance date. On the other hand, hybrid securities of ₩ 574,580 million issued by KB Kookmin Bank are recognized as non-controlling interests and are early redeemable every five years after the issuance date.

26.3 Capital Surplus

Details of capital surplus as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | | 2018 |
|----------------------------------|---|------------|---|------------|
| Share premium | ₩ | 13,190,274 | ₩ | 13,190,274 |
| Loss on sales of treasury shares | | (481,332) | | (481,332) |
| Other capital surplus | | 4,413,835 | | 4,412,718 |
| | ₩ | 17,122,777 | ₩ | 17,121,660 |

26.4 Accumulated Other Comprehensive Income

Details of accumulated other comprehensive income as of December 31, 2019 and 2018, are as follows:

| | 2019 | | 2018 |
|---|-----------|--|---|
| ₩ | (290,228) | ₩ | (234,401) |
| | 31,793 | | (5,784) |
| | | | |
| | 487,331 | | 450,694 |
| | | | |
| | 3,318 | | (4,377) |
| | (27,333) | | 5,849 |
| | (41,992) | | (33,092) |
| | 18,381 | | 15,017 |
| | | | |
| | (20,326) | | (8,954) |
| | 187,077 | | (7,146) |
| ₩ | 348,021 | ₩ | 177,806 |
| | | ₩ (290,228) 31,793 487,331 3,318 (27,333) (41,992) 18,381 (20,326) 187,077 | ₩ (290,228) ₩ 31,793 487,331 3,318 (27,333) (41,992) 18,381 (20,326) 187,077 |

26.5 Retained Earnings

Details of retained earnings as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | | 2018 |
|----------------------------------|---|------------|---|------------|
| Legal reserves ¹ | ₩ | 482,807 | ₩ | 390,216 |
| Voluntary reserves | | 982,000 | | 982,000 |
| Unappropriated retained earnings | | 18,244,738 | | 15,910,225 |
| | ₩ | 19,709,545 | ₩ | 17,282,441 |

¹ With respect to the allocation of net profit earned in a fiscal term, the Parent Company must set aside in its legal reserve an amount equal to at least 10% of its net income after tax as reported in the separate statement of comprehensive income each time it pays dividends on its net profits earned until its legal reserve reaches at least the aggregate amount of its share capital in accordance with Article 53 of the Financial Holding Company Act. The reserve is not available for the payment of cash dividends, but may be transferred to share capital, or used to reduce accumulated deficit.

Regulatory reserve for credit losses

Measurement and disclosure of regulatory reserve for credit losses are required in accordance with Articles 26 through 28 of Supervisory Regulations on Financial Holding Companies.

Details of the regulatory reserve for credit losses as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | | 2018 |
|---|---|-----------|---|-----------|
| Regulatory reserve for credit losses attributable to: | | | | |
| Shareholders of the Parent Company | ₩ | 3,418,136 | ₩ | 3,130,765 |
| Non-controlling interests | | 1,478 | | 1,354 |
| | ₩ | 3,419,614 | ₩ | 3,132,119 |

The adjustments to the regulatory reserve for credit losses for the year ended December 31, 2019 and 2018, are as follows:

(In millions of Korean won, except earnings per share)

| | | 2019 | | 2018 |
|--|---|-----------|---|-----------|
| Provision of regulatory reserve for credit losses ¹ | ₩ | 287,371 | ₩ | 355,363 |
| Adjusted profit after provision of regulatory reserve for credit losses ^{2,3} | | 3,017,944 | | 2,705,828 |
| Adjusted basic earnings per share after provision of | | | | |
| regulatory reserve for credit losses ² | | 7,716 | | 6,824 |
| Adjusted diluted earnings per share after | | | | |
| provision of regulatory reserve for credit losses ² | | 7,659 | | 6,785 |

¹ The amount expected to be appropriated for the year ended December 31, 2018 is the amount required to reserve for credit losses, calculated based on the beginning balance of regulatory reserve for credit losses (including unearned reserves) that reflects the effect of adoption of Korean IFRS 1109 retrospectively.

26.6 Treasury Shares

Changes in treasury shares outstanding for the years ended December 31, 2019 and 2018, are as follows:

(In number of shares and millions of Korean won)

| | 2019 | | | | | | | | |
|--|------|------------|-------------|-----------|----------|-------------|--------|------------|--|
| | | Beginning | Acquisition | | Disposal | | Ending | | |
| Number of treasury shares ¹ | | 22,560,240 | | 5,916,962 | | (2,303,617) | | 26,173,585 | |
| Carrying amount ¹ | ₩ | 968,549 | ₩ | 267,639 | ₩ | (100,000) | ₩ | 1,136,188 | |

¹ For the year ended December 31, 2019, the treasury stock trust agreement of ₩ 300,000 million with Samsung Securities Co., Ltd., which had been signed in 2018, was terminated.

(In number of shares and millions of Korean won)

| | 2018 | | | | | | | | |
|--|-----------------------|------------|---|-----------|---|--------|---|------------|--|
| | Beginning Acquisition | | | Disposal | | Ending | | | |
| Number of treasury shares ¹ | | 19,073,954 | | 3,486,286 | | _ | | 22,560,240 | |
| Carrying amount ¹ | ₩ | 755,973 | ₩ | 212,576 | ₩ | - | ₩ | 968,549 | |

¹ For the year ended December 31, 2018, the treasury stock trust agreement of ₩ 300,000 million with Samsung Securities Co., Ltd., which had been signed in 2017, was terminated. In order to increase shareholder value, the Group entered into another treasury stock trust agreement of ₩ 300,000 million with Samsung Securities Co., Ltd. for the year ended December 31, 2018.

² Adjusted profit after provision of regulatory reserve for credit losses is not based on Korean IFRS; this is calculated reflecting provision (reversal) of the reserve before tax to the net profit to shareholders of the Parent Company.

³ After deducting dividends on hybrid securities.

27. Net Interest Income

Details of interest income and interest expense for the years ended December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | | 2018 |
|--|---|------------|---|------------|
| Interest income | | | | |
| Deposits at fair value through profit or loss | ₩ | 2,685 | ₩ | 9,236 |
| Securities measured at fair value through profit or loss | | 668,377 | | 713,058 |
| Loans measured at fair value through profit or loss | | 33,001 | | 26,066 |
| Securities measured at fair value through other comprehensive income | | 774,864 | | 718,327 |
| Loans measured at fair value through other comprehensive income | | 14,708 | | 2,373 |

31.2 Share-based Payments

31.2.1 Stock grants

The Group changed the scheme of share-based payment from stock options to stock grants in November 2007. The stock grant award program is an incentive plan that sets, on grant date, the maximum amount of shares that can be awarded. Actual stock granted at the end of the vesting period is determined in accordance with achievement of pre-specified targets over the vesting period.

Details of stock grants linked to long-term performance as of December 31, 2019, are as follows:

(In number of shares)

 $^{^{\}scriptsize 1}$ Restated in accordance with Korean IFRS 1109.

36. Earnings per Share

36.1 Basic Earnings per Share

Basic earnings per share is calculated by dividing profit and loss attributable to ordinary equity holders of the Parent Company by the weighted average number of ordinary shares outstanding, excluding the treasury shares, during the years ended December 31, 2019 and 2018.

Weighted average number of ordinary shares outstanding:

(In number of shares)

| | 2 | 2019 ¹ | | 2018 | |
|--|------------------|--------------------|------------------|--------------------|--|
| | Number of shares | Accumulated amount | Number of shares | Accumulated amount | |
| Number of issued ordinary shares | 415,807,920 | 152,564,638,665 | 418,111,537 | 152,610,711,005 | |
| Number of treasury shares | (26,173,585) | (9,801,574,522) | (22,560,240) | (7,888,226,378) | |
| Average number of ordinary shares outstanding | 389,634,335 | 142,763,064,143 | 395,551,297 | 144,722,484,627 | |
| Number of days | | 365 | | 365 | |
| Weighted average number of ordinary shares outstanding | | 391,131,683 | | 396,499,958 | |

¹ Initial date of treasury stock that was deducted by the retirement is December 12, 2019.

Basic earnings per share:

(In Korean won and in number of shares)

| | | 2019 | | 2018 |
|--|---|-------------------|---|-------------------|
| Profit attributable to shareholders of the Parent Company | ₩ | 3,311,827,412,557 | ₩ | 3,061,191,387,929 |
| Deduction: Dividends on hybrid securities | | 6,512,500,000 | | - |
| Profit attributable to the ordinary equity holders of the Parent | ₩ | 3,305,314,912,557 | ₩ | 3,061,191,387,929 |
| Company (A) | | | | |
| Weighted average number of ordinary shares outstanding (B) | | 391,131,683 | | 396,499,958 |
| Basic earnings per share (A / B) | ₩ | 8,451 | ₩ | 7,721 |

36.2 Diluted Earnings per Share

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. The Group's dilutive potential ordinary shares include Stock Grants.

A calculation is done to determine the number of shares that could have been acquired at fair value (determined as the average market share price of the Group's outstanding shares for the year) based on the monetary value of Stock Grants. The number of shares calculated above is compared with the number of shares that would have been issued assuming the settlement of Stock Grants.

Adjusted profit for diluted earnings per share for the years ended December 31, 2019 and 2018, are as follows:

(In Korean won)

| | | 2019 | | 2018 |
|--|---|-------------------|---|-------------------|
| Profit attributable to ordinary equity holders of the Parent Company | ₩ | 3,305,314,912,557 | ₩ | 3,061,191,387,929 |
| Adjustment | | - | | - |
| Adjusted profit for diluted earnings | ₩ | 3,305,314,912,557 | ₩ | 3,061,191,387,929 |

Adjusted weighted average number of ordinary shares outstanding to calculate diluted earnings per share for the years ended December 31, 2019 and 2018, are as follows:

(In number of shares)

| | 2019 | 2018 |
|---|-------------|-------------|
| Weighted average number of ordinary shares outstanding | 391,131,683 | 396,499,958 |
| Adjustment Stock Grants | 2,890,513 | 2,307,630 |
| Adjusted weighted average number of ordinary shares outstanding for | | |
| diluted earnings per share | 394,022,196 | 398,807,588 |

Diluted earnings per share for the years ended December 31, 2019 and 2018, are as follows:

(In Korean won and in number of shares)

| | | 2019 | | 2018 |
|---|---|-------------------|---|-------------------|
| Adjusted profit for diluted earnings per share | ₩ | 3,305,314,912,557 | ₩ | 3,061,191,387,929 |
| Adjusted weighted average number of ordinary shares outstanding for | | | | |
| diluted earnings per share | | 394,022,196 | | 398,807,588 |
| Diluted earnings per share | ₩ | 8,389 | ₩ | 7,676 |

37. Insurance Contracts

37.1 Insurance Assets

Details of deferred acquisition costs included in other assets as of December 31, 2019 and 2018, are as follows:

37.3 Liability adequacy test

37.3.1 Non-life insurance

Assumptions and basis for the insurance liability adequacy test as of December 31, 2019 and 2018, are as follows:

| | Assumpt | ions(%) | Basis |
|-------------------------------|--------------|-------------|--|
| | 2019 | 2018 | Daziz |
| Long-term insurance | | | |
| Discount rate | 2.47~10.55 | 0.55~7.32 | Applied risk-free rate curve plus liquidity premium presented by Financial Supervisory Service |
| Expense ratio | 6.60 | 6.43 | Reflected future expense plan based on the most recent one-year data |
| Lapse ratio | 1.51~34.13 | 1.50~31.40 | Based on the most recent five years data |
| Risk rate | 13.10~1037.3 | 9.00~724.00 | The rate of insurance claim payments to risk premiums based on historical data for the latest seven years |
| General insurance | | | |
| Expense ratio | 11.38 | 10.42 | Ratio of maintenance costs incurred to earned premiums by the types of contracts for the most recent year |
| Loss adjustment expense ratio | 4.54 | 4.63 | Ratio of loss adjustment expenses incurred to insurance claim payments by the type of contracts within for the most recent three years |
| Claim settlement ratio | 64.95 | 63.77 | Ratio of insurance claims incurred to earned premiums by the type of contracts for the most recent five years |
| Automobile insurance | | | |
| Expense ratio | 9.94 | 10.11 | Ratio of maintenance costs incurred to earned premiums by the type of collaterals for the most recent year |
| Loss adjustment expense ratio | 8.84 | 9.09 | Ratio of loss adjustment expenses incurred to insurance claims paid by the type of collaterals for the most recent three years |
| Claim settlement ratio | 78.44 | 77.51 | Ratio of insurance claims incurred to earned premiums by the type of collaterals for the most recent five years |

² Including currency translation effect and decrease in liability related to investment contract

The results of liability adequacy test as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 2019 | | | | | | | | |
|----------------------|------|-------------------------------------|-----|---------------------------------|---|------------------------|--|--|--|
| | | Recognized liabilities ¹ | Est | timated adequate liabilities | | Shortfall (surplus) | | | |
| General insurance | ₩ | 365,234 | ₩ | 296,800 | ₩ | (68,434) | | | |
| Automobile insurance | | 1,123,450 | | 1,071,076 | | (52,374) | | | |
| Long-term insurance | | 19,743,658 | | 9,741,865 | | (10,001,793) | | | |
| | ₩ | 21,232,342 | ₩ | 11,109,741 | ₩ | (10,122,601) | | | |

(In millions of Korean won)

| | 2018 | | | | | | | |
|----------------------|------|--|---|-----------------------------|---|------------------------|--|--|
| | | Recognized liabilities ¹ | | ited adequate iabilities | | Shortfall (surplus) | | |
| General insurance | ₩ | 341,439 | ₩ | 279,756 | ₩ | (61,683) | | |
| Automobile insurance | | 1,020,861 | | 967,236 | | (53,625) | | |
| Long-term insurance | | 18,419,316 | | 7,471,174 | | (10,948,142) | | |
| | ₩ | 19,781,616 | ₩ | 8,718,166 | ₩ | (11,063,450) | | |

¹ Long-term insurance is for premium reserves and unearned premium reserves; the premium reserve is the amount deducted from the unearned premiums and insurance contract loans in accordance with Article 6–3 of the Insurance Supervisory Regulation.

As a result of adequacy test, the Group did not set additional reserve as it shows net surplus. As such, there was no amount recorded as a result of liability adequacy test.

37.3.2 Life insurance

Assumptions and basis for the insurance liability adequacy test as of December 31, 2019 and 2018, are as follows:

| | Assump | tions(%) | Basis | | | | |
|----------------|--------------|--------------|--|--|--|--|--|
| | 2019 | 2018 | Daziz | | | | |
| Surrender rate | 0~65.39 | 0~64.95 | The ratio of cancelled premiums to premiums by product group, method of payment, channel, and elapsed period calculated based on the most recent five-year experience statistics | | | | |
| Rate of claim | 11~132 | 8~122 | The ratio of incidents by collateral, gender, elapsed period to the number of holding insurances based on the most recent seven-year experience statistics | | | | |
| Discount rate | (2.61)~15.53 | (1.82)~13.71 | Estimated investment assets profit ratio based on the interest rate scenario provided by the Financial Supervisory Service | | | | |

Indirect costs included in commission and operating expenses were calculated based on unit cost of the expense allocation standards of the last year in accordance with the Regulation on Insurance Supervision. Direct costs included in commission and operating expenses were calculated based on estimates of future expense according to the Group's regulations.

The results of liability adequacy test as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | | 2019 | | | | | | | | | | |

| Other insurance expenses | | 200,640 | | 218,608 | |
| | | 12,017,670 | | 11,484,954 | |
| Net insurance income | ₩ | 299,512 | ₩ | 490,116 | |

37.5 Risk management of insurance

37.5.1 Overview

Insurance risk is the risk that arises from a primary operation of insurance companies that is associated with acceptance of insurance contract and payment of claims, and is classified as the insurance price risk and the reserves risk. The insurance price risk is the risk of loss that might occur when the actual risk exceeds the expected risk rate or expected insurance operating expenses ratios in calculation of premiums. It is the risk of loss that arises from differences between actual payment of claims and premiums received from policyholders. The reserves risk is the risk that arises due to a deficit in reserves at the date of assessment, making the Group unable to cover the actual claims payment in the future.

37.5.2 Purposes, policies and procedures to manage risk arising from insurance contracts

The risks associated with insurance contract that the Group faces are the insurance actuarial risk and the acceptance risk. Each risk occurs due to insurance contract's pricing and conditions of acceptance. In order to minimize acceptance risk, the Group establishes guidelines and procedure for acceptance and outlines specific conditions for acceptance by product. In addition, expected risk level at the date of pricing is compared with actual risk of contracts after acceptance and various subsequent measures such as the adjustments in the interest rate and sales conditions, termination of selling specific product and others are taken in order to reduce insurance actuarial risk. The Group has a committee to discuss status of product acceptance risk and interest rate policy. The committee decides important matters to set the processes that allow minimizing the insurance actuarial risk, the acceptance risk and other business related risk.

In addition, according to reinsurance operating standards, the Group establishes an operating strategy of reinsurance for large claims expense due to unexpected catastrophic events. The Group aims at policy holders' safety and its stable profit achievement. For the long-term goal, the Group manages risk at a comprehensive level to keep its value at the maximum.

37.5.3 Exposure to insurance price risk

According to RBC standard, exposure to insurance price risk is defined as net written premiums for prior one year that is calculated by adding and subtracting original insurance premium, assumed reinsurance premium and ceded reinsurance premium.

The Group's exposure to insurance price risk as of December 31, 2019 and 2018, as follows:

(In millions of Korean won)

| | 2019 | | | | | | | | | | |
|------------|------------------|-----------|--------------------|---------|---|---------------------|---|-----------|--|--|--|
| | Direct insurance | | Inward reinsurance | | | Outward reinsurance | | Total | | | |
| General | ₩ | 999,348 | ₩ | 101,613 | ₩ | (579,922) | ₩ | 521,039 | | | |
| Automobile | | 2,101,780 | | - | | (40,067) | | 2,061,713 | | | |

| | ₩ | 5,169,750 | ₩ | 91,440 | ₩ | (916,083) | ₩ | 4,345,107 | | | | |

37.5.4 Concentration of Insurance risk

The Group is selling general non-life insurances (fire, maritime, injury, technology, liability, package, title, guarantee and special type insurances), automobile insurances (for private use, for hire, for business, bicycle and other), long-term insurances (long-term non-life, property damage, injury, driver, savings, illness, nursing and pension) and various other insurances. The Group's risk is distributed through reinsurance, joint acceptance and diversified selling. In addition, insurances that cover severe level of risk, although there is rare possibility of the occurrence of disaster, such as storm and flood insurance are limited, and the Group controls the risk through joint acquisition.

Loss development tables

The Group uses claim development of payments and the estimated ultimate claims for the years where the accident has occurred, in order to maintain overall reserve adequacy in respect of general, automobile and long-term insurance. When the estimated ultimate claims are greater than claim payments, the Group establishes additional reserves. Loss development tables as of December 31, 2019 and 2018, are as follows:

37.5.5 Sensitivity analysis of insurance risk

The Group manages insurance risk by performing sensitivity analysis based on discount rate, loss ratio and insurance operating expenses ratio which are considered to have significant influence on future cash flow, timing and uncertainty. According to result of sensitivity analysis there is no material influence on the equity and net profit before tax.

(In millions of Korean won)

37.5.6 Liquidity risk of insurance contracts

Liquidity risk arising from insurance contracts is the increase in refunds at maturity caused by concentrations of maturity, the increase in surrender values caused by unexpected amounts in cancellation and the increase in payments of claims caused by catastrophic events. The Group manages payment of refunds payable at maturity by analyzing maturity of insurance.

Premium reserve's maturity structure as of December 31, 2019 and 2018, as follows:

37.5.7 Credit risk of insurance contract

Credit risk of insurance contract is the economic loss arising from non-performing contractual obligations due to decline in credit ratings or default. Through strict internal review, only the insurers rated above BBB- of S&P rating are accepted for the insurance contracts.

As of December 31, 2019, there are 153 reinsurance companies that deal with the Group, and the top three reinsurance companies' concentration and credit ratings are as follows:

| Reinsurance company | Ratio | Credit rating |
|---------------------|--------|---------------|
| KOREAN RE | 64.14% | AA |
| SWISS RE | 10.81% | AAA |
| SCOR RE | 2.77% | AAA |

Exposures to credit risk related to reinsurance as of December 31, 2019 and 2018 as follows

(In millions of Korean won)

¹ Net carrying amounts after impairment loss

37.5.8 Interest risk of insurance contract

The interest rate risk exposure from the Group's insurance contracts is the risk of unexpected losses in net interest income or net assets arising from changes in interest rates and it is managed to minimize unexpected loss. For long-term, non-life insurance contracts, the Group calculates exposure of interest-bearing assets and interest-bearing liabilities. Liabilities exposure is premium reserves less costs of termination deductions plus unearned premium reserve. Asset exposure is interest-bearing assets. Assets that receive only fees without interest are excluded from interest bearing assets. Exposures to interest rate risk as of December 31, 2019 and 2018, are as follows:

² Net carrying amounts of after allowance for loan losses

i) Exposure to interest rate risk

(In millions of Korean won)

| | | 2019 |
|--|---|------------|
| Liabilities | | |
| Fixed interest rate | ₩ | 534,236 |
| Variable interest rate | | 21,911,393 |

| Loans at amortized cost | | 6,924,597 |
| | ₩ | 22,741,891 |

(In millions of Korean won)

| | | 2018 |
|--|---|------------|
| Liabilities | | |
| Fixed interest rate | ₩ | 560,471 |
| Variable interest rate | | 20,332,094 |
| | | 20,892,565 |
| Assets | | |
| Due from financial institutions at amortized cost and cash equivalents | | 100,701 |
| Financial assets at fair value through profit or loss | | 4,257,959 |
| Financial assets at fair value through other comprehensive income | | 2,691,744 |
| Financial assets at amortized cost | | 7,718,337 |
| Loans at amortized cost | | 6,877,139 |
| | ₩ | 21,645,880 |

ii) Measurement and recognition method

Duration is used to measure interest rate risk within risk based solvency test. ALM system is utilized to manage interest rate risk internally. In addition, Risk Management Committee sets ALM strategy every year to manage interest rate risk.

iii) Sensitivity to changes in interest rates

Generally, when interest rates rise, the value and duration of assets and liabilities fall when interest rates fall, value and duration of assets and liabilities increase. Where duration of assets is shorter than that of liabilities with the interest rates fall, the interest risk is increased since the incremental portion of liabilities exceeds that of assets.

iv) Negative spread risk control

In order to manage the reverse margins risk between interest expenses from liabilities and investment incomes on assets, the Group set the disclosure rate every month considering the market interest rate and the managing portfolio's profit ratio.

37.6 Risk management of life insurance

37.6.1 Overview

Insurance risk is the risk of loss arising from the actual risk at the time of claims exceeding the estimated risk at the time of underwriting. Insurance risk is classified by insurance price risk and policy reserve risk.

Insurance price risk is the risk of loss arising from differences between received from policyholders and actual claims paid.

Policy reserve risk is the risk of loss arising from differences between policy reserves the Group holds and actual claims to be paid.

The Group measures only insurance price risk under RBC requirement because life insurance claim payout is mainly in a fixed amount with less volatility in policy reserve and shorter waiting period before payment.

37.6.2 Concentration of insurance risk and reinsurance policy

The Group uses reinsurance to mitigate concentration of insurance risk seeking an enhanced capital management.

The Group categorized reinsurance into group and individual contracts, and reinsurance is ceded through the following process:

The Group's reinsurance is ceded through the following process:

i. In the decision-making process of launching a new product, the Group makes a decision on ceding reinsurance. Subsequently, a reinsurer is selected through bidding, agreements with the relevant departments and final approval by the executive management.

ii. The reinsurance department analyzes the object of reinsurance, the maximum limit of reinsurance and the loss ratio with the relevant departments.

37.6.3 The characteristic and exposure of insurance price risk

The exposure of insurance price risk is measured by the risk premium for all insurance contracts held for one year prior to the calculation date. The premium for risk retention is calculated by adding direct insurance premium and reinsurance assumed premium, and deducting reinsurance ceded premium (which is paid to reinsurance companies). If the holding risk premium is less than zero, the exposure of the insurance price is measured as zero.

The insurance risk of a life insurance company is measured by insurance price risk. As the life insurance coverage is in the form of a fixed payment, the fluctuation of policy reserve is small and the period from insured event to claims payment is not long. The policy reserve risk is managed by assessments of adequacy of the policy reserve.

The insurance price risk is managed through insurance risk management regulation established by Risk Management Committee.

The maximum exposures to insurance price risk as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 2019 | | | | | |
|-----------------------------------|------|-------------------------|---|------------------------------|--|--|
| | | reinsurance tigation | | After reinsurance mitigation | | |
| Death | ₩ | 12,882 | ₩ | 9,033 | | |
| Disability | | 754 | | 424 | | |
| Hospitalization | | 1,260 | | 642 | | |
| Operation and diagnosis | | 4,419 | | 2,211 | | |
| Actual losses for medical expense | | 1,053 | | 396 | | |
| Others | | 1,066 | | 411 | | |
| | ₩ | 21,434 | ₩ | 13,117 | | |

(In millions of Korean won)

| | | 2018 | | | | |
|-----------------------------------|---|---------------------------------|---|------------------------------|--|--|
| | В | efore reinsurance mitigation | | After reinsurance mitigation | | |
| Death | ₩ | 13,264 | ₩ | 6,758 | | |
| Disability | | 858 | | 296 | | |
| Hospitalization | | 1,287 | | 358 | | |
| Operation and diagnosis | | 3,936 | | 1,031 | | |

37.6.4 Assumptions used in measuring insurance liabilities

The Group applies assumed rates defined in the premium and liability reserve calculation manual provided by the regulatory authority and in accordance with the Regulations on Supervision of Insurance Business when measuring insurance liabilities at every reporting period. For interest sensitive insurance, credit rate stated in the premium and liabilities reserve calculation manual, which is calculated based on adjusted external base rate and return rate of asset management according to Article 6–12 of the Regulation on Supervision of Insurance Business.

Reserve amount should exceed the standard reserve which is calculated using the standard interest rate and standard risk rate as required by the Regulation on Supervision of Insurance Business.

37.6.5 Premium reserves and unearned premium reserves residual maturity

Premium reserve's maturity structure as of December 31, 2019 and 2018, as follows:

(In millions of Korean won)

| | 2019 | | | | | | | | | | | | | |
|------------------|------|------------------|---|--------------|---------------|---------|----------------|---------|----------------|---------|---------------------|-----------|---|-----------|

Other Matters (including litigation)

- a) The Group has filed 102 lawsuits as a plaintiff (excluding minor lawsuits in relation to the collection or management of loans), involving aggregate claims of \forall 458,195 million, and faces 207 lawsuits (as a defendant) (excluding minor lawsuits in relation to the collection or management of loans) involving aggregate damages of \forall 193,002 million, which arose in the normal course of the business and are still pending as of December 31, 2019.
- b) Kookmin bank made a construction contract building the integrated company building, amounting to \forall 155,546 million; for the year ended December 31, 2019, the Bank has paid \forall 41,598 million.
- c) As at December 31, 2019, Kookmin Bank has entered into construction contracts amounting to Ψ 250,458 million related to the construction of The K Project(IT infrastructure construction business needed KB's Digital Transformation to cope with change of IT technology and finance environment), and payments made up to December 31, 2019 amount to Ψ 60,462 million.
- d) The face value of the securities which Kookmin Bank sold to general customers through the bank tellers amounts to \forall 372 million as of December 31, 2019 and 2018, respectively.
- e) While setting up a fraud detection system, a computer contractor employed by the personal credit ratings firm Korea Credit Bureau caused a widespread data breach in June 2013, resulting in the theft of cardholders' personal information. As a result of the leakage of customer personal information, the KB Kookmin Card received a notification from the Financial Services Commission that the KB Kookmin Card is subject to a temporary three-month operating suspension as of February 16, 2014. In respect of the incident, the Group faces 11 and 113 legal claims filed as a defendant, with an aggregate claim of \$\times\$ 444 million and \$\times\$ 6,906 million as of December 31, 2019. A provision liability of \$\times\$ 2,549 million and \$\times\$ 9,888 million have been recognized for these pending lawsuits. In addition, the Group took out the personal information protection liability insurance. On the other hand, the further appeals can be filed against the Group, however, the final outcome cannot be reasonably measured.
- f) As of December 31, 2019, the Group is not able to dispose, transfer or collateralize the shares of a joint-venture lease company or the right of shares to a third party without the written consent of Kolao Holdings for five years (the restriction period for the disposal of its equity) from the date of initial investment for KB KOLAO LEASING Co., LTD. Each party of the joint venture lease company may transfer all or part of its equity, as determined separately, after the restriction period for the disposal of its equity has expired. Meanwhile, according to the agreement, KB KOLAO LEASING Co., LTD. disposes affiliated receivables, which are overdue for more than three months, of Kolao Holdings to Lanexang Leasing Co., Ltd.
- g) KB Securities is a professional private equity investment firm which sells private investment funds that loans capital to corporations (borrowers) who invest in rental apartment of disables in Australia. KB Securities sold # 326,500 million in funds and trusts to individuals and institutional investors. However, KB Securities is in probable of a loss of investment principal because the operation of the funds became impossible due to a contract breach of a local

borrower. In this regard, one lawsuit has been filed with the Group and there is a possibility of further lawsuits as of December 31, 2019. The expected loss from the lawsuit is reflected as provision and the result of the lawsuit is unpredictable as of now.

h) Regarding Lime Asset Management, KB Securities is holding PIS(Portfolio Index Swap) contract in related to Lime Thetis Qualified Investor Private Investment Trust No.D-1, which are suspended to repurchase in fourth quarter of 2019 and KB Securities holds beneficiary certificates and TRS contracts as underlying asset amount to \(\psi\) 403,700 million. On the other hand, KB Securities has sold feeder fund of applicable funds amounts to \(\psi\ 68,100 million. Lime Asset Management conducted a due diligence on the assets of the suspended fund through an external evaluation agency and adjusted the base price based on the results of the due diligence. The Group measured the fair values of the fund and linked TRS based on the fund base price, which is adjusted by Lime Asset Management reflecting the results of the due diligence. Lime Asset Management has a repurchase and management plan in place, however, at the current status, either the availability or timing of repurchase of the fund cannot be predicted. There is possibility of lawsuit to be filed in the future, but the impact on the financial statements is unpredictable as of now.

i) Kookmin Bank signed a contract to take over a 70 percent share in Prasak(PRASAC Microfinance Institution Limited), a microcreditary finance company in Cambodia, for US\$ 603 million from an existing stockholder on January 6, 2020. The Group is required to report this contract to the domestic and foreign financial authorities for approval in order to complete the contract.

The Group has signed an agreement with the existing shareholders of PRASAC. Existing shareholders of PRASAC have the right of put option to sell 30% of the remaining shares to the Group, and they are entitled to exercise their rights at the exercise price calculated on the basis of the adjustment book amount at the end of 2021 within six months from the issue date of the audit report or date when the adjusted book amount is confirmed. If existing shareholders do not exercise put option within the exercise period, the Group has the right of call option to buy the shares of existing shareholders within six months of the end of the put option exercisable period. All stockholders are restricted from selling shares or additional pledge before exercising the put option and call option.

j) KB Kookmin Card signed a stock sale agreement to acquire 80% of the shares of PT. Finansia Multi Finance, Indonesian financial company, for US\$ 81 million in December 2019 and paid US\$ 16 million in December 2019. In addition, KB Kookmin Card entered into a contract to acquire bonds, which includes the right to exchange 5% of PT. Finansia Multi Finance shares, issued by PT. Finansia Multi Finance shareholders for US\$ 5 million.

¹ The Group controls the trust because it has power that determines the management performance over the trust and is exposed to variable returns to absorb losses through the guarantees of payment of principal, or payment of principal and fixed rate of return.

Structured companies that hold more than half of their ownership percentage but do not have the strength to related activities in accordance with agreements with trust and other related parties are excluded from the consolidation.

Although the Group holds less than a majority of the investee's voting rights, the Group controls these investees as it has power over relevant activities in case of default; is significantly exposed to variable returns by providing lines of credit or ABCP purchase commitments or due to acquisition of subordinated debt; and has ability to affect those returns through its power.

³ Although the Group holds less than a majority of the investee's voting rights, the Group controls the investee as it has power over relevant activities by managing the fund; has significant percentage of ownership; is significantly exposed to variable returns which is affected by the performance of the investees; and has ability to affect the performance through its power.

⁴ Although the Group holds less than a majority of the investee's voting rights, the Group controls the investee as it has power over relevant activities by taking the role of an operating manager and it is significantly exposed to variable returns which is affected by the performance of the investees, and has ability to affect the performance through its power.

⁵ Although the Group holds less than a majority of the investee's voting rights, the Group participated directly in establishment of this entity and has power over relevant activities, and is significantly exposed to variable returns which is affected by the performance of the investee, and has ability to affect the performance through its power. Accordingly the Group has control over the investee.

⁶ The Group changed Kookmin Bank Int'l Ltd. (London) to Kookmin Bank London Branch on May 16, 2018, and this event is categorized as business combination of entities under common control. The assets and liabilities acquired under business combinations under common control are recognized at the carrying amounts in the consolidated financial statements of the Group. The transferred assets and liabilities due to this business combination are \$\psi\$ 480,161 million and \$\psi\$ 480,023 million, respectively.

The condensed financial information of major subsidiaries as of December 31, 2019 and 2018, and for the years ended December 31, 2019 and 2018, is as follows:

| (included in administrative expenses) | | |

The total cash outflow for leases in 2019 was ₩ 228,312 million.

43.3 Finance lease - 2018

43.3.1 The Group as a finance lessee

The future minimum lease payments classified as a finance lease as at December 31, 2018 is as follows:

(In millions of Korean won)

| | | 2018 |
|---|---|--------|
| Net carrying amount of finance lease assets | | 34,002 |
| Minimum lease payment | | |
| Within 1 year | | 6,827 |
| 1-5 years | | 3,553 |
| | ₩ | 10,380 |
| Present value of minimum lease payment | | |
| Within 1 year | | 6,705 |
| 1-5 years | | 3,456 |
| | ₩ | 10,161 |

43.3.2 The Group as a finance lessor

Total lease investment and the present value of minimum lease payments as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | | | | | |
|--------------------|---|------------------------|--|--|--|--|--|
| | | Total lease investment | Present value of minimum lease payment | | | | |
| Within 1 year | ₩ | 654,104 | ₩ 367,937 | | | | |
| 1–5 years | | 1,085,208 | 569,939 | | | | |
| Later than 5 years | | 773 | 748 | | | | |
| | ₩ | 1,740,085 | ₩ 938,624 | | | | |

(In millions of Korean won)

| | | 2018 | | | | | |
|---------------|---|------------------------|--|--|--|--|--|
| | | Total lease investment | Present value of minimum lease payment | | | | |
| Within 1 year | ₩ | 710,532 | ₩ 387,721 | | | | |
| 1–5 years | | 1,225,265 | 565,152 | | | | |
| | ₩ | 1,935,797 | ₩ 952,873 | | | | |

Unearned interest income of finance lease as of December 31, 2019 and 2018 is as follows:

| | | 2019 | | 2018 |
|--|---|-----------|---|------------|
| Total lease investment | ₩ | 1,740,085 | ₩ | 1,935,797 |
| Net lease investment | | | | |
| Present value of minimum lease payment | | 938,624 | | 952,873 |
| Present value of Non-guaranteed residual value | | 639,075 | | 786,359 |
| | | 1,577,699 | | 11,739,232 |
| Unearned interest income | ₩ | 162,386 | ₩ | 196,565 |

43.4 Operating lease

43.4.1 The Group as a operating lessee

The future minimum lease payments arising from the non-cancellable lease contracts as of December 31 2018, are as follows:

(In millions of Korean won)

| | | 2018 |
|---------------------------|---|---------|
| Minimum lease payment | | |
| Within 1 year | ₩ | 179,384 |
| 1–5 years | | 299,900 |
| 1–5 years Over 5 years | | 111,906 |
| | ₩ | 591,190 |
| Minimum sublease payment | ₩ | (6,561) |

The lease payment reflected in profit or loss for the years ended December 31, 2018, is as follows:

(In millions of Korean won)

| | | 2018 |
|---|---|---------|
| Lease payment reflected in profit or loss | | |
| Minimum lease payment | ₩ | 221,305 |
| Sublease payment | | (1,804) |
| | ₩ | 219,501 |

43.4.2 The Group as a operating lessor

The future minimum lease receipts arising from the non-cancellable lease contracts as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 2019 | 2018 |
|------------------------|-------------|-------------|
| Minimum lease receipts | | |
| Within 1 year | ₩ 577,490 | ₩ 304,204 |
| 1-5 years | 1,432,354 | 985,097 |
| Over 5 years | 682,165 | 280,084 |
| | ₩ 2,692,009 | ₩ 1,569,385 |

44. Related Party Transactions

Profit and loss arising from transactions with related parties for the years ended December 31, 2019 and 2018, are as follows:

 $^{^{\}rm 1}\,\mbox{Excluded}$ from the Group's related party as of December 31, 2019.

According to Korean IFRS 1024, the Group includes associates, key management (including family members), and post–employment benefit plans of the Group and its related party companies in the scope of related parties. Additionally, the Group discloses balances (receivables and payables) and other amounts arising from the related party transactions in the notes to the consolidated financial statements. Refer to Note 13 for details on investments in associates and joint ventures.

Significant lending transactions with related parties for the years ended December 31, 2019 and 2018, are as follows:

Collateral received from related parties as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | 2018 |
|---|---|------------|--------|
| Associates KB Star Office Private Real Estate Investment Trust No.1 | Real estate | ₩ 13,00 | 13,000 |
| Key management | Time deposits and others Real estate | 19 2,92 | |

As of December 31, 2019, Incheon Bridge Co., Ltd., a related party, provides fund management account, insurance for civil engineering completion, and management rights as senior collateral amounting to \forall 611,000 million to a financial syndicate that consists of the Group and five other institutions, and as subordinated collateral amounting to \forall 384,800 million to subordinated debt holders that consist of the Group and two other institutions. Also, it provides certificate of credit quarantee amounting to \forall 400,000 million as collateral to a financial syndicate consisting of the Group and five other institutions.

45. Changes in Accounting Policies - Implementation of Korean IFRS 1116 Leases

The Group applied Korean IFRS 1116 retrospectively as of January 1, 2019. However, the financial statements for the year ended 2018 was not restated using the method allowed by transitional provisions. Therefore reclassification and adjustments under the new IFRS were recognized in the financial statements beginning on January 1, 2019.

A lessee shall apply this standard to its leases either:

- retrospectively to each prior reporting period presented applying Korean IFRS 1008 Accounting Policies, Changes in Accounting Estimates and Errors (Full retrospective application); or
- retrospectively with the cumulative effect of initially applying the standard recognized at the date of initial application.

The Group applied Korean IFRS 1116 retrospectively with recognizing the cumulative effect of initial adoption of the standard as at January 1, 2019. The Group did not restate any comparative financial statements.

For leases previously classified as 'finance leases', the Group recognized the carrying amount of the lease asset and lease liability immediately before transition as the carrying amount of the right-of-use asset and the lease liability at the date of initial application. The measurement principles of Korean IFRS 1116 are only applied after that date. The remeasurements to the lease liabilities were recognized as adjustments to the related right-of-use assets immediately after the date of initial application.

| | | January 1, 2019 |
|---|---|-----------------|
| Right-of-use asset | | |
| Operating lease commitments disclosed at December 31, 2018 ¹ | ₩ | 576,249 |
| Add: Finance lease asset recognized at December 31, 2018 | | 34,002 |
| Right-of use asset recognized as of the date of initial application | ₩ | 610,251 |
| Lease liability | | |
| Operating lease commitments disclosed at December 31, 2018 | ₩ | 586,882 |
| Discounted amount using the lessee's incremental borrowing rate ² at the date of initial application | | 544,475 |
| Add: Finance lease liability recognized at December 31, 2018 | | 10,161 |
| Lease liabilities recognized as of the date of initial application | ₩ | 555,636 |

¹ The amount included lease contract related provisions for asset retirement obligation and other assets/liabilities according to the adoption of Korean IFRS.

²The incremental borrowing rate is 1.45%~6.95%.

| Financial Section | —————————————————————————————————————— | 25 | 5 |
|-------------------|--|----|---|
| | | | |

The difference between the amount of the right-of-use asset and the lease liability is adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognized in the consolidated statement of financial position immediately before the date of initial application.

46. Approval of Issuance of the Financial Statements

The issuance of the Group's consolidated financial statements as of and for the year ended December 31, 2019, was initially approved on February 6, 2020 and re-approved due to revision on March 4, 2020 by the Board of Directors.

Independent Auditor's Report

(English Translation of a Report Originally Issued in Korean)

To the Board of Directors and Shareholders of KB Financial Group Inc.

Opinion

We have audited the accompanying separate financial statements of KB Financial Group Inc.(the Company), which comprise the separate statements of financial position as at December 31, 2019 and 2018 and the separate statements of comprehensive income, changes in equity and cash flows for the years then ended, and notes to the separate financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying separate financial statements present fairly, in all material respects, the separate financial position of the Company as at December 31, 2019 and 2018, and its separate financial performance and cash flows for the years then ended in accordance with International Financial Reporting Standards as adopted by the Republic of Korea (Korean IFRS).

We also have audited, in accordance with Korean Standards on Auditing, the Company's Internal Control over Financial Reporting as of December 31, 2019, based on Conceptual Framework for Designing and Operating Internal Control over Financial Reporting and our report dated March 5, 2020 expressed an unqualified opinion.

Basis for Opinion

We conducted our audits in accordance with Korean Standards on Auditing. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements of the Republic of Korea that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with the ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Key Audit Matters

No key audit matter is identified to be described in this audit report.

Other Matter

Auditing standards and their application in practice vary among countries. The procedures and practices used in the Republic of Korea to audit such financial statements may differ from those generally accepted and applied in other countries.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the separate financial statements in accordance with Korean IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Korean Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Korean Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

· Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

· Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances

· Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

· Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

• Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Yeob Yu, Certified Public Accountant.

Notes to the Separate Financial Statements

Years Ended December 31, 2019 and 2018

1. The Company

KB Financial Group Inc. (the "Company"), in accordance with Financial Holding Companies Act, was established on September 29, 2008, through stock transfers with the former shareholders of Kookmin Bank, KB Investment & Securities Co., Ltd., KB Asset Management Co., Ltd., KB Real Estate Trust Co., Ltd., KB Investment Co., Ltd., KB Futures Co., Ltd., KB Credit Information Co., Ltd., and KB Data Systems Co., Ltd. in order to provide management services and financing to associated companies. The headquarters are located at 26, Gukjegeumyung-ro-8-gil, Yeongdeungpo-gu, Seoul. The Company's share capital as of December 31, 2019, is \(\frac{1}{2}\) 2,090,558 million. In 2011, Kookmin Bank spun off its credit card business segment and established a new separate credit card company, KB Kookmin Card Co., Ltd., and KB Investment & Securities Co., Ltd. merged with KB Futures Co., Ltd. The Company established KB Savings Bank Co., Ltd. in January 2012, acquired Yehansoul Savings Bank Co., Ltd. in September 2013, and KB Savings Bank Co., Ltd. merged with Yehansoul Savings Bank Co., Ltd. in January 2014. In March 2014, the Company acquired Woori Financial Co., Ltd. and changed the name to KB Capital Co., Ltd. Meanwhile, the Company included LIG Insurance Co., Ltd. as an associate and changed the name to KB Insurance Co., Ltd. in June 2015. Also, the Company included Hyundai Securities Co., Ltd. as an associate in June 2016 and included as a subsidiary on October 2016 by comprehensive exchange of shares. Hyundai Securities Co., Ltd. merged with KB Investment & Securities Co., Ltd. in December 2016 and changed the name to KB Securities Co., Ltd. in January 2017. KB Insurance Co., Ltd. became one of the subsidiaries through a tender after in May 2017.

The Company has been listed on the Korea Exchange ("KRX") since October 10, 2008, and on the New York Stock Exchange ("NYSE") for its American Depositary Shares ("ADS") since September 29, 2008. Number of shares authorized on its Articles of Incorporation is 1,000 million.

2. Basis of Preparation

2.1 Application of Korean IFRS

The Company maintains its accounting records in Korean won and prepares statutory financial statements in the Korean language ("Hangeul") in accordance with International Financial Reporting Standards as adopted by the Republic of Korea ("Korean IFRS"). The accompanying separate financial statements have been condensed, restructured and translated into English from the Korean language financial statements.

Certain information attached to the Korean language financial statements, but not required for a fair presentation of the Company's financial position, financial performance or cash flows, is not presented in the accompanying separate financial statements.

The separate financial statements of the Company have been prepared in accordance with Korean IFRS. These are the standards, subsequent amendments and related interpretations issued by the International Accounting Standards Board ("IASB") that have been adopted by the Republic of Korea.

The preparation of separate financial statements requires the use of certain critical accounting estimates. Management also needs to exercise judgment in applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the separate financial statements are disclosed in Note 2.4.

The separate financial statements were prepared in accordance with Korean IFRS 1027, Separate Financial Statements.

2.1.1 New and amended standards and interpretations adopted by the Company

The Company has applied the following standards and amendments for the first time for their annual reporting period commencing January 1, 2019.

- Enactment of Korean IFRS 1116 Leases

Korean IFRS 1116 Leases replaces Korean IFRS 1017 Leases. Under Korean IFRS 1116, with implementation of a single lease model, lessee is required to recognize assets and liabilities for all lease which lease term is over 12 months and underlying assets are not low value assets. A lessee is required to recognize a right-of-use asset and a lease liability representing its obligation to make lease payments.

With implementation of Korean IFRS 1116 Lease, the Company has changed accounting policy. The Company has adopted Korean IFRS 1116 retrospectively, as permitted under the specific transitional provisions in the standard, and recognized the cumulative impact of initially applying the standard as of January 1, 2019, the date of initial application. The Company has not restated comparatives for the 2018 reporting period. The impact of the adoption of the leasing standard and the new accounting policies are disclosed in Note 31.

- Amendments to Korean IFRS 1109 Financial Instruments

The narrow–scope amendments made to Korean IFRS 1109 Financial Instruments enable entities to measure certain prepayable financial assets with negative compensation at amortized cost. When a modification of a financial liability measured at amortized cost that does not result in the derecognition, a modification gain or loss shall be recognized in profit or loss. The amendment does not have a significant impact on the Company's financial statements.

- Amendments to Korean IFRS 1019 Employee Benefits

The amendments require that an entity shall calculate current service cost and net interest for the remainder of the reporting period after a plan amendment, curtailment or settlement based on updated actuarial assumptions from the date of the change. The amendments also require that a reduction in a surplus must be recognized in profit or loss even if that surplus was not previously recognized because of the impact of the asset ceiling. The amendment does not have a significant impact on the Company's financial statements.

- Amendments to Korean IFRS 1028 Investments in Associates and Joint Ventures

The amendments clarify that an entity shall apply Korean IFRS 1109 to financial instruments in an associate or joint venture to which the equity method is not applied. These include long-term interests that, in substance, form part of the entity's net investment in an associate or joint venture. The amendment does not have a significant impact on the Company's financial statements.

- Enactment of Interpretation of Korean IFRS 2123 Uncertainty over Income Tax Treatments

The Interpretation explains how to recognize and measure deferred and current income tax assets and liabilities where there is uncertainty over a tax treatment, and includes guidance on how to determine whether each uncertain tax treatment is considered separately or together. It also presents examples of circumstances where a judgement or estimate is required to be reassessed. The enactment does not have a significant impact on the Company's financial statements.

- Annual Improvements to Korean IFRS 1103 Business Combination

The amendments clarify that when a party to a joint arrangement obtains control of a business that is a joint operation, and had rights to the assets and obligations for the liabilities relating to that joint operation immediately before the acquisition date, the transaction is a business combination achieved in stages. In such cases, the acquirer shall remeasure its entire previously held interest in the joint operation. The amendments have no significant effect on the Company's financial statements.

- Annual Improvements to Korean IFRS 1111 Joint Agreements

The amendments clarify that when a party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business. In such cases, previously held interests in the joint operation are not remeasured. The amendments have no significant effect on the Company's financial statements.

- Annual Improvements to Paragraph 57A of Korean IFRS 1012 Income Tax

The amendment is applied to all the income tax consequences of dividends and requires an entity to recognize the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized those past transactions or events. The amendments have no significant effect on the Company's financial statements.

- Annual Improvements to Korean IFRS 1023 Borrowing Cost

The amendments clarify that if a specific borrowing remains outstanding after the related qualifying asset is ready for its intended use (or sale), it becomes part of general borrowings. The amendments have no significant effect on the Company's financial statements.

2.1.2 New and amended standards and interpretations not yet adopted by the Company

Certain new accounting standards and interpretations that have been published but are not mandatory for the reporting period commencing January 1, 2019 and have not been early adopted by the Company are set out below.

- Amendments to Korean IFRS 1001 Presentation of Financial Statements and Korean IFRS 1008 Accounting policies, changes in accounting estimates and errors - Definition of Material

The amendments clarify the explanation of the definition of material and amended Korean IFRS 1001 and Korean IFRS 1008 in accordance with the clarified definitions. Materiality is assessed by reference to omission or misstatement of material information as well as effects of immaterial information, and to the nature of the users when determining the information to be disclosed by the Company. These amendments should be applied for annual periods beginning on or after January 1, 2020, and earlier application of permitted. The Company does not expect that these amendments have a significant impact on the financial statements.

- Amendments to Korean IERS 1103 Business Combination - Definition of a Business

To consider the integration of the required activities and assets as a business, the amended definition of a business requires an acquisition to include an input and a substantive process that together significantly contribute to the ability to create outputs and excludes economic benefits from the lower costs. An entity can apply a concentration test, an optional test, where substantially all of the fair value of gross assets acquired is concentrated in a single asset or a group of similar assets, the assets acquired would not represent a business. These amendments should be applied for annual periods beginning on or after January 1, 2020, and earlier application of permitted. The Company does not expect that these amendments have a significant impact on the financial statements.

- IFRS Interpretation Committee's agenda decisions - Lease Term

On December 16, 2019, the IFRS Interpretations Committee announced an interpretation of the "lease term and useful life of leasehold improvements". This interpretation deals with how to determine the lease term of a cancellable lease or a renewable lease and whether the useful life of non-removable leasehold improvements is limited by the relevant lease term. According to this interpretation, the Company should identify factors to consider the broader economic penalty, reflect identified factors to accounting policies, and calculate lease term again based on accounting policy.

However, due to the large number of lease contracts held by the Company and varying terms of the contract, the Company determined that sufficient time would be required to set up items to be included in the review of extensive economic penalty and to establish procedures for collecting and analyzing necessary information. Therefore, the effect of the changes in accounting policy for the lease term is not reflected in the separate financial statements for the current reporting period.

If the accounting policy for the lease term is changed in the annual periods beginning on or after January 1, 2020, the amount of the related right-of-use assets and lease liabilities may increase, and the separate financial statements may need to be retroactively restated to reflect this effect.

2.2 Measurement Basis

The separate financial statements have been prepared under the historical cost convention unless otherwise specified.

2.3 Functional and Presentation Currency

Items included in the separate financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates ("the functional currency"). The separate financial statements are presented in Korean won, which is the Company's functional and presentation currency.

2.4 Critical Accounting Estimates

The preparation of separate financial statements requires the application of accounting policies, certain critical accounting estimates and assumptions that may have a significant impact on the assets (liabilities) and incomes (expenses). Management's estimates of outcomes may differ from actual outcomes if management's estimates and assumptions based on management's best judgment at the reporting date are different from the actual environment.

Estimates and assumptions are continually evaluated and any change in an accounting estimate is recognized prospectively by including it in profit or loss in the period of the change, if the change affects that period only. Alternatively, if the change in accounting estimate affects both the period of change and future periods, that change is recognized in the profit or loss of all those periods.

Uncertainty in estimates and assumptions with significant risk that may result in material adjustment to the separate financial statements are as follows:

2.4.1 Income taxes

The Company is operating in numerous countries and the income generated from these operations is subject to income taxes based on tax laws and interpretations of tax authorities in numerous jurisdictions. There are many transactions and calculations for which the ultimate tax determination is uncertain.

If certain portion of the taxable income is not used for investments, increase in wages, and others in accordance with the Tax System for Promotion of Investment and Collaborative Cooperation (Recirculation of Corporate Income), the Company is liable to pay additional income tax calculated based on the tax laws. The new tax system is effective for three years from 2018. Accordingly, the measurement of current and deferred income tax is affected by the tax effects from the new system. As the Company's income tax is dependent on the investments, increase in wages, and others, there exists uncertainty with regard to measuring the final tax effects.

2.4.2 Fair value of financial instruments

The fair value of financial instruments where no active market exists or where quoted prices are not otherwise available is determined by using valuation techniques. Financial instruments, which are not actively traded in the market and those with less transparent market prices, will have less objective fair values and require broad judgment on liquidity, concentration, uncertainty in market factors and assumptions in price determination and other risks.

As described in the significant accounting policies in Note 3.1, 'Recognition and Measurement of Financial Instruments', diverse valuation techniques are used to determine the fair value of financial instruments, from generally accepted market valuation models to internally developed valuation models that incorporate various types of assumptions and variables.

2.4.3 Net defined benefit liability

The present value of net defined benefit liability depends on a number of factors that are determined on an actuarial basis using a number of assumptions (Note 16).

3. Significant Accounting Policies

The significant accounting policies and calculation methods applied in the preparation of these separate financial statements have been consistently applied to all periods presented, except for the impact of changes due to enactment of new standards, amendments and interpretations disclosed in Note 2.1 and the following paragraph.

3.1 Recognition and Measurement of Financial Instruments

3.1.1 Initial recognition

The Company recognizes a financial asset or a financial liability in its statement of financial position when the Company becomes a party to the contractual provisions of the instrument. A regular way purchase or sale of financial assets (a purchase or sale of a financial asset under a contract whose terms require delivery of the financial instruments within the time frame established generally by market regulation or practice) is recognized and derecognized using trade date accounting.

The Company classifies financial assets as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, or financial assets at amortized cost. The Company classifies financial liabilities as financial liabilities at fair value through profit or loss, or other financial liabilities. The classification depends on the nature and holding purpose of the financial instrument at initial recognition in the separate financial statements.

At initial recognition, a financial asset or financial liability is measured at its fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The fair value is defined as the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. The fair value of a financial instrument on initial recognition is normally the transaction price (that is, the fair value of the consideration given or received) in an arm's length transaction.

3.1.2 Subsequent measurement

After initial recognition, financial instruments are measured at amortized cost or fair value based on classification at initial recognition.

Amortized cost

The amortized cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition:

- minus the principal repayments
- plus or minus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount
- or any reduction (directly or through the use of an allowance account) due to impairment or uncollectibility

Fair value

Fair values, which the Company primarily uses for the measurement of financial instruments, are the published price quotations based on market prices or dealer price quotations of financial instruments traded in an active market where available. These are the best evidence of fair value. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, an entity in the same industry, pricing service or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

If the market for a financial instrument is not active, fair value is determined either by using a valuation technique or independent third-party valuation service. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, referencing to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models.

The Company uses valuation models that are commonly used by market participants and customized for the Company to determine fair values of common over-the-counter (OTC) derivatives such as options, interest rate swaps and currency swaps which are based on the inputs observable in markets. For more complex instruments, the Company uses internally developed models, which are usually based on valuation methods and techniques generally used within the industry, or a value measured by an independent external valuation institution as the fair values if all or some of the inputs to the valuation models are not market observable and therefore it is necessary to estimate fair value based on certain assumptions.

In addition, the fair value information recognized in the statement of financial position is classified into the following fair value hierarchy, reflecting the significance of the input variables used in the fair value measurement.

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: unobservable inputs for the asset or liability.

The level in the fair value hierarchy within which the fair value measurement is categorized in its entirety shall be determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

If the valuation technique does not reflect all factors which market participants would consider in setting a price, the fair value is adjusted to reflect those factors. Those factors include counterparty credit risk, bid-ask spread, liquidity risk and others.

The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with economic methodologies applied for pricing financial instruments. Periodically, the Company calibrates the valuation technique and tests its validity using prices of observable current market transactions of the same instrument or based on other relevant observable market data.

3.1.3 Derecognition

Derecognition is the removal of a previously recognized financial asset or financial liability from the statement of financial position. The Company derecognizes a financial asset or a financial liability when, and only when:

Derecognition of financial assets

Financial assets are derecognized when the contractual rights to the cash flows from the financial assets expire or the financial assets have been transferred and substantially all the risks and rewards of ownership of the financial assets are also transferred, or all the risks and rewards of ownership of the financial assets are neither substantially transferred nor retained and the Company has not retained control. If the Company neither transfers nor disposes of substantially all the risks and rewards of ownership of the financial assets, the Company continues to recognize the financial asset to the extent of its continuing involvement in the financial asset.

If the Company transfers the contractual rights to receive the cash flows of the financial asset, but retains substantially all the risks and rewards of ownership of the financial asset, the Company continues to recognize the transferred asset in its entirety and recognize a financial liability for the consideration received.

The Company writes off financial assets in its entirety or to a portion thereof when the principal and interest on the principal amount outstanding are determined to be no longer recoverable. In general, the Company considers write-off if significant financial difficulties of the debtor, or delinquency in interest or principal payments is indicated. The write-off decision is made in accordance with internal regulations and may require approval from external institution, if necessary. After the write-off, the Company can collect the written-off loans continuously according to the internal policy. Recovered amounts of financial assets previously written-off are recognized at profit or loss.

Derecognition of financial liabilities

Financial liabilities are derecognized from the statement of financial position when the obligation specified in the contract is discharged, cancelled or expires.

3.1.4 Offsetting

Financial assets and liabilities are offset and the net amount reported in the separate statement of financial position where there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the assets and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

3.2 Cash and Due from Financial Institutions

Cash and due from financial institutions include cash on hand, foreign currency, and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and due from financial institutions. Cash and due from financial institutions are measured at amortized cost.

3.3 Non-derivative Financial Assets

3.3.1 Financial assets at fair value through profit or loss

Financial assets classified as held for trading, financial assets designated by the Company as at fair value through profit or loss upon initial recognition, and financial assets that are required to be mandatorily measured at fair value through profit or loss are classified as financial assets at fair value through profit or loss.

The Company may designate certain financial assets upon initial recognition as at fair value through profit or loss when the designation eliminates or significantly reduces a measurement or recognition inconsistency (sometimes referred to as 'an accounting mismatch') that would otherwise arise from measuring assets or liabilities or recognizing the gains and losses on them on different bases.

After initial recognition, a financial asset at fair value through profit or loss is measured at fair value and gains or losses arising from a change in the fair value are recognized in profit or loss. Interest income and dividend income from financial assets at fair value through profit or loss are also recognized in the statement of comprehensive income.

3.3.2 Financial assets at fair value through other comprehensive income

The Company classifies below financial assets as financial assets at fair value through other comprehensive income;

- debt instruments with a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and consistent with representing solely payments of principal and interest on the principal amount outstanding or;
- equity instruments, not held for trading with the objective of generating a profit from short-term fluctuations in price or dealer's margin, designated as financial assets at fair value through other comprehensive income

After initial recognition, a financial asset at fair value through other comprehensive income is measured at fair value. Gain and loss from changes in fair value, other than dividend income and interest income amortized using effective interest method and exchange differences arising on monetary items which are recognized directly in income as interest income or expense, are recognized as other comprehensive income in equity.

At disposal of financial assets at fair value through other comprehensive income, cumulative gain or loss is recognized as profit or loss for the reporting period. However, cumulative gain or loss of equity instrument designated as fair value through other comprehensive income are not recycled to profit or loss at disposal.

Financial assets at fair value through other comprehensive income denominated in foreign currencies are translated at the closing rate. Exchange differences resulting from changes in amortized cost are recognized in profit or loss, and other changes are recognized as equity.

3.3.3 Financial assets measured at amortized cost

A financial asset, which are held within the business model whose objective is to hold assets in order to collect contractual cash flows and consistent with representing solely payments of principal and interest on the principal amount outstanding, are classified as a financial asset at amortized cost.

Financial assets at amortized cost are subsequently measured at amortized cost using the effective interest method after initial recognition and interest income is recognized using the effective interest method.

3.4 Expected Credit Loss of Financial Assets (Debt Instruments)

The Company measures expected credit loss and recognizes loss allowance at the end of the reporting period for financial assets measured at amortized cost and fair value through other comprehensive income with the exception of financial asset measured at fair value through profit or loss.

Expected credit losses are a probability-weighted estimate of credit losses (i.e. the present value of all cash shortfalls) over the expected life of the financial instrument. The Company measures expected credit losses by reflecting reasonable and supportable information that is reasonably available at the reporting date without undue cost or effort, including information about past events, current conditions and forecasts of future economic conditions.

The Company uses the following three measurement techniques in accordance with Korean IFRS:

- General approach: for financial assets and off-balance-sheet unused credit line that are not applied below two approaches
- Simplified approach: for receivables, contract assets and lease receivables
- Credit-impaired approach: for purchased or originated credit-impaired financial assets

Different measurement approaches are applied depending on significant increase in credit risk, 12 month expected credit losses is recognized when credit risk has not significantly increased since initial recognition. A loss allowance at an amount equal to lifetime expected credit losses is recognized when credit risk has significantly increased since initial recognition. Lifetime is presumed to be a period to the contractual maturity date of a financial asset (the expected life of the financial asset).

One or more of the following items is deemed significant increase in credit risk. When the contractual cash flows of a financial asset are renegotiated or otherwise modified, the Company determines whether the credit risk has increased significantly since initial recognition using the following information.

- more than 30 days past due;
- decline in credit rating at period end by more than certain notches as compared to that at initial recognition;
- debt restructuring (except for impaired financial assets); and
- credit delinquency information on Korea Federation of Banks, and etc.

Under simplified approach, the Company shall always measure the loss allowance at an amount equal to lifetime expected credit losses. Under credit-impaired approach, the Company shall only recognize the cumulative changes in lifetime expected credit losses since initial recognition as a loss allowance for purchased or originated credit-impaired financial assets. In assessing credit impairment, the Company uses definition of default as in the new Basel Accord which rules calculation of Capital Adequacy Ratio.

The Company generally deems one or more of the following items credit-impaired:

- no less than 90 days past due;
- legal proceedings related to collection;
- a borrower that has received a warning from the Korea Federation of banks;
- corporate borrowers that are rated C or D;
- debt restructuring.

3.4.1 Forward-looking information

The Company uses forward-looking information, when it determines whether the credit risk has increased significantly and measures the expected credit losses.

The Company assumes the risk components have a certain correlation with the economic cycle, and uses statistical methodologies to estimate the relation between key macroeconomic variables and risk components for the expected credit losses. The correlation between the major macroeconomic variables and the credit risk is as follows;

| Key macroeconomic variables | Correlation between the major macroeconomic variables and the credit risk |
|---|---|
| Domestic GDP growth rate | (-) |
| Composite stock index | (-) |
| Construction investment change rate | (-) |
| Rate of change in housing transaction price index | (-) |
| Interest rate spread | (+) |
| Private consumption growth rate | (-) |

Forward-looking information used in calculation of expected credit losses is based on the macroeconomic forecasts utilized by management of the Company for its business plan taking into account reliable external agency's forecasts and others. The forward-looking information is generated by KB Research under KB Financial Group with comprehensive approach to capture the possibility of various economic forecast scenarios that are derived from the internal and external viewpoints of the macroeconomic situation. The Company determines the macroeconomic variables to be used in forecasting future condition of the economy, taking into account the direction of the forecast scenario and the significant relationship between macroeconomic variables and time series data. And there are some changes compared to the macroeconomic variables used in the previous year.

3.4.2 Measuring expected credit losses on financial assets at amortized cost

The amount of the loss on financial assets at amortized cost is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate.

The Company estimates expected future cash flows for financial assets that are individually significant (individual assessment of impairment),

For financial assets that are not individually significant, the Company collectively estimates expected credit loss by grouping loans with homogeneous credit risk profile (collective assessment of impairment).

Individual assessment of impairment

Individual assessment of impairment losses are calculated using management's best estimate on present value of expected future cashflows. The Company uses all the available information including operating cash flow of the borrower and net realizable value of any collateral held.

Collective assessment of impairment

Collective assessment of loss allowance involves historical loss experience along with incorporation of forward-looking information. Such process incorporates factors such as type of collateral, product and borrowers, credit rating, size of portfolio and recovery period and applies Probability of Default(PD) on a group of assets and Loss Given Default(LGD) by type of recovery method. Also, the expected credit loss model involves certain assumption to determine input based on loss experience and forward-looking information. These models and assumptions are periodically reviewed to reduce gap between loss estimate and actual loss experience.

Lifetime expected credit loss as at the end of the reporting period is calculated by product of carrying amount net of expected repayment, PD for each period and LGD adjusted by change in carrying amount.

3.4.3 Measuring expected credit losses on financial assets at fair value through other comprehensive income

Measuring method of expected credit losses on financial assets at fair value through other comprehensive income is equal to the method of financial assets at amortized cost, except for loss allowances that are recognized as other comprehensive income. Amounts recognized in other comprehensive income for sale or repayment of financial assets at fair value through other comprehensive income are reclassified to profit or loss.

3.5 Revenue Recognition

The Company recognizes revenues in accordance with the following revenue recognition standard:

- Step 1: Identify the contract with a customer.
- Step 2: Identify the performance obligations in the contract.
- Step 3: Determine the transaction price.
- Step 4: Allocate the transaction price to the performance obligations in the contract.
- Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation.

3.5.1 Interest income and expense

Interest income of financial assets at amortized cost and financial assets at fair value through other comprehensive income, and expense are recognized in statements of comprehensive income using the effective interest method. The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability (or groups of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period.

The effective interest rate is the rate that exactly discounts estimated future cash receipts or payments through the expected life of the financial instrument or, where appropriate, a shorter period, to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Company estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all fees and points paid (main components of effective interest rates only) or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts. In those rare cases when it is not possible to estimate reliably the cash flows or the expected life of a financial instrument (or group of financial instruments), the Company uses the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

3.5.2 Fee and commission income

The Company recognizes financial service fees in accordance with the accounting standard of the financial instrument related to the fees earned.

Fees that are an integral part of the effective interest of a financial instrument

Such fees are generally treated as adjustments of effective interest. Such fees may include compensation for activities such as evaluating the borrower's financial condition, evaluating and recording guarantees, collateral and other security arrangements, negotiating the terms of the instrument, preparing and processing documents and closing the transaction and origination fees received on issuing financial liabilities measured at amortized cost. However, fees relating to the creation or acquisition of a financial instrument at fair value through profit or loss are recognized as revenue immediately.

Fees earned as services are provided

Such fees are recognized as revenue as the services are provided. Fees which can be earned through the certain periods, including account servicing fees, investment management fees, and etc, are recognized when the related services are provided.

Fees that are earned on the execution of a significant act

Such fees are recognized as revenue when the significant act has been completed.

3.5.3 Net gains/losses on financial instruments at fair value through profit or loss

Net gains/losses on financial instruments at fair value through profit or loss include profit or loss (changes in fair value, dividends, and gain/loss from foreign currency translation) from following financial instruments:

- Gain or loss from financial instruments at fair value through profit or loss
- Gain or loss from derivatives for trading, including derivatives for hedging that does not meet the condition of hedge accounting

3.5.4 Dividend income

Dividend income is recognized in profit or loss when the right to receive payment is established. Dividend income is recognized as relevant items on statements of profit or loss and other comprehensive income in accordance with the classification of equity instruments.

3.6 Investments in Subsidiaries and Associates

Investments in subsidiaries and associates are accounted at cost method in accordance with Korean IFRS 1027. The Company determines at each reporting period whether there is any objective evidence that the investments in the subsidiaries and associates are impaired. If this is the case, the Company calculates the amount of impairment as the difference between the recoverable amount of the subsidiaries or associates and its carrying value.

3.7 Property and Equipment

Recognition and Measurement

All property and equipment that qualify for recognition as an asset are measured at its cost and subsequently carried at cost less any accumulated depreciation and any accumulated impairment losses.

The cost of property and equipment includes any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management and the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

Subsequent expenditures are capitalized only when they prolong the useful life or enhance values of the assets but the costs of the day-to-day servicing of the assets such as repair and maintenance costs are recognized in profit or loss as incurred. When part of an item of an asset has a useful life different from that of the entire asset, it is recognized as a separate asset.

Depreciation

Land is not depreciated, whereas other property and equipment are depreciated using the method that reflects the pattern in which the asset's future economic benefits are expected to be consumed by the Company. The depreciable amount of an asset is determined after deducting its residual value.

Each part of an item of property and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method and estimated useful lives of the assets are as follows:

| Property and equipment | Depreciation method | Estimated useful life | | |
|------------------------|---------------------|-----------------------|--|--|
| Leasehold improvements | Declining-balance | 4 years | | |
| Equipment and vehicles | Declining-balance | 4 years | | |

The residual value, the useful life and the depreciation method applied to an asset are reviewed at each financial year–end and, if expectations differ from previous estimates or if there has been a significant change in the expected pattern of consumption of the future economic benefits embodied in the asset, the changes are accounted for as a change in an accounting estimate.

3.8 Intangible Assets

Intangible assets are measured initially at cost and subsequently carried at their cost less any accumulated amortization and any accumulated impairment losses.

Intangible assets, except for membership right, are amortized using the straight-line method with no residual value over their estimated useful economic life since the asset is available for use.

| Intangible assets | Amortization method | Estimated useful life | | |
|-------------------|---------------------|-----------------------|--|--|
| Software | Straight-line | 4 years | | |
| Others | Straight-line | 4 ~ 19 years | | |

The amortization period and the amortization method for intangible assets with a definite or limited useful life are reviewed at each financial year end. Where an intangible asset is not being amortized because its useful life is considered to be indefinite, the Company carries out a review in each accounting period to confirm whether or not events and circumstances still support the assumption of an indefinite useful life. If they do not, the change from the indefinite to definite or limited useful life is accounted for as a change in an accounting estimate.

3.9 Impairment of Non-financial Assets

The Company assesses at the end of each reporting period whether there is any indication that a non-financial asset except for (i) deferred income tax assets, (ii) assets arising from employee benefits and (iii) non-current assets (or group of assets to be sold) classified as held for sale, may be impaired. If any such indication exists, the Company estimates the recoverable amount of the asset.

The recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the Company determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit). A cash-generating unit is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. The recoverable amount of an asset is the higher of its fair value less costs to sell and its value in use. Value in use is the present value of the future cash flows expected to be derived from an asset or cash-generating unit that are discounted by a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss and recognized immediately in profit or loss.

3.10 Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The risks and uncertainties that inevitably surround many events and circumstances are taken into account in reaching the best estimate of provisions, and where the effect of the time value of money is material, the amount of provisions are the present value of the expenditures expected to be required to settle the obligation.

Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provisions are reversed.

3.11 Equity Instrument Issued by the Company

An equity instrument is any contract or agreement that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

3.11.1 Ordinary share

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are deducted, net of tax, from the equity.

3.11.2 Hybrid Securities

The financial instruments can be classified as either financial liabilities or equity in accordance with the terms of the contract. The Company classifies hybrid securities as an equity if the Company has the unconditional right to avoid any contractual obligation to deliver financial assets such as cash in relation to the financial instruments.

3.12 Employee Compensation and Benefits

3.12.1 Post-employment benefit:

Defined benefit plans

All post-employment benefit, other than defined contribution plans, is classified as defined benefit plans. The amount recognized as a defined benefit liability is the present value of the defined benefit obligation less the fair value of plan assets at the end of the reporting period.

The present value of the defined benefit obligation is calculated annually by independent actuaries using the Projected Unit Credit method. The rate used to discount post-employment benefit obligations is determined by reference to market yields at the end of the reporting period on high quality corporate bonds. The currency and term of the corporate bonds are consistent with the currency and estimated term of the post-employment benefit obligations. Actuarial gains and losses including experience adjustments and the effects of changes in actuarial assumptions are recognized in other comprehensive income,

When the fair value of plan assets deducted from the total of the present value of the defined benefit obligation results in an asset, it is recognized to the extent of any cumulative unrecognized past service cost and the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

Past service cost arises when the Company introduces a defined benefit plan that attributes to past service or changes the benefits payable for past service under an existing defined benefit plan. Such past service cost is recognized immediately in profit or loss.

Defined contribution plans

The contributions are recognized as employee benefit expense when they are due.

3.12.2 Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within 12 months after the end of the period in which the employees render the related service. The undiscounted amount of short-term employee benefits expected to be paid in exchange for that service is recognized as a liability (accrued expense), after deducting any amount already paid.

The expected cost of profit-sharing and bonus payments are recognized as liabilities when the Company has a present legal or constructive obligation to make such payments as a result of past events rendered by employees and a reliable estimate of the obligation can be made.

3.12.3 Share-based payment

The Company has share grant programs to directors and employees of the Company. When the stock grants are exercised, the Company can either select to distribute newly issued shares or treasury shares, or compensate in cash based on the share price.

For a share-based payment transaction in which the terms of the arrangement provide the Company with the choice of whether to settle in cash or by issuing equity instruments, the Company determined that it has a present obligation to settle in cash because the Company has a past practice and a stated policy of settling in cash. Therefore, the Company accounts for the transaction in accordance with the requirements of cash-settled share-based payment transactions.

The Company measures the services acquired and the liability incurred at fair value, and the fair value is recognized as expense and accrued expenses over the vesting period. Until the liability is settled, the Company remeasures the fair value of the liability at the end of each reporting period and at the date of settlement, with any changes in fair value recognized in profit or loss for the year.

3.12.4 Termination benefits

Termination benefits are employee benefits provided in exchange for the termination of an employee's employment as a result of either (a) the Company decision to terminate an employee's employment before the normal retirement date; or (b) an employee's decision to accept an offer of benefits in exchange for the termination of employment. The Company recognizes liabilities and expenses for termination benefits at the earlier of the following dates: when the Company can no longer withdraw the offer of those benefits and when the Company recognizes costs for a restructuring that is within the scope of Korean IFRS 1037 and involves the payment of termination benefits. Termination benefits are measured by considering the number of employees expected to accept the offer in the case of a voluntary early retirement. Termination benefits which are not expressed to be settled wholly before 12 months after the end of the reporting period are discounted to present values.

3.13 Income Tax Expenses

Income tax expense comprises current tax expense and deferred income tax expense. Current and deferred income tax are recognized as income or expense and included in profit or loss for the year, except to the extent that the tax arises from (a) a transaction or event which is recognized either in other comprehensive income or directly in equity and (b) a business combination.

Current income tax

Current income tax is the amount of income taxes payable in respect of the taxable profit (loss) for a period. A difference between the taxable profit and accounting profit may arise when income or expense is included in accounting profit in one period but is included in taxable profit in a different period. Differences may also arise if there is revenue that is exempt from taxation or expenses that is not deductible in determining taxable profit (loss). Current income tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the taxation authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The Company offsets current income tax assets and current income tax liabilities if, and only if, the Company (a) has a legally enforceable right to offset the recognized amounts and (b) intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred income tax

Deferred income tax is recognized, using the asset-liability method, on temporary differences arising between the tax based amount of assets and liabilities and their carrying amount in the financial statements. Deferred income tax liabilities are recognized for all taxable temporary differences and deferred income tax assets are recognized for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilized. However, deferred income tax liabilities are not recognized if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss.

The carrying amount of a deferred income tax asset is reviewed at the end of each reporting period. The Company reduces the carrying amount of a deferred income tax asset to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of that deferred income tax asset to be utilized.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to be applied to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred income tax liabilities and deferred income tax assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

The Company offsets deferred income tax assets and deferred income tax liabilities when the Company has a legally enforceable right to offset current income tax assets against current income tax liabilities; and the deferred income tax assets and the deferred income tax liabilities relate to income taxse levied by the same taxation authority on either the same taxable entity; or different taxable entities which intend either to settle current income tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred income tax liabilities or assets are expected to be settled or recovered.

Uncertain tax positions

Uncertain tax positions arise from a claim for rectification brought by the Company, an appeal for a refund of tax levied by the tax authorities, or others due to different interpretation of tax laws or others. The Company recognizes its uncertain tax positions in the separate financial statements based on the guidance in Korean IFRS 1012. The income tax asset is recognized if a tax refund is probable for taxes paid and levied by the tax authority. However, interest and penalties related to income tax are recognized in accordance with Korean IFRS 1037.

3.14 Earnings per Share

The Company calculates basic earnings per share amounts and diluted earnings per share amounts for profit or loss attributable to ordinary equity holders and presents them in the statement of comprehensive income. Basic earnings per share is calculated by dividing profit or loss attributable to ordinary equity holders by the weighted average number of ordinary shares outstanding during the period. For the purpose of calculating diluted earnings per share, the Company adjusts profit or loss attributable to ordinary equity holders and the weighted average number of shares outstanding for the effects of all dilutive potential ordinary shares including convertible bond and share option.

3.15 Leases

As explained in Note 2 above, the Company has changed its accounting policy for leases. The impact of the new accounting policies is disclosed in Note 31.

Lease income from operating leases where the Company is a lessor is recognized in income on a straight-line basis over the lease term. Initial direct costs incurred in obtaining an operating lease are added to the carrying amount of the underlying asset and recognized as expense over the lease term on the same basis as lease income. The respective leased assets are included in the statement of financial position based on their nature. The Company did not need to make any adjustments to the accounting for assets held as a lessor as a result of adopting the new leasing standard.

At inception of a contract, the Company is required to assess whether the contract is, or contains, a lease. Also, at the date of initial application, the Company has assessed whether the contract is, or contains, a lease in accordance with the standard. However, the Company did not reassess all contracts as the Company elected to apply the practical expedient not to apply the standard to contracts that were not previously identified as containing a lease. On the basis of the date of initial application, the Company assesses whether the contract is, or contains, a lease.

A lessee is required to recognize a right-of-use asset (lease assets) representing its right to use the underlying leased asset and a lease liability representing its obligation to make lease payments. Assets and liabilities arising from a lease are initially measured on a present value basis,

Lease liabilities include the net present value of the following lease payments:

- Fixed payments (including in-substance fixed payments), less any lease incentives receivable
- Variable lease payment that are based on an index or a rate
- Amounts expected to be payable by the lessee under residual value guarantees
- The exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- Payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Right-of-use assets are measured at cost comprising the following:

- The amount of the initial measurement of lease liability
- Any lease payments made at or before the commencement date less any lease incentives received
- Any initial direct costs, and
- Restoration costs

However, short-term lease (lease that, at the commencement date, has a lease term of 12 months or less) and lease of low-value assets (For example, underlying leased asset under \$5,000) are permitted to elect exceptional conditions.

The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term.

Related to sale and leaseback, an entity (seller-lessee) is required to applying Korean IFRS 1115 'Revenue from Contracts with Customers' to determine whether the transfer of an asset is accounted for as a sale of that asset. However, the Company has not reassessed sale and leaseback transactions entered into before the date of initial application.

3.16 Operating Segments

The Company is composed of a single operating segment. Therefore, disclosures on segments are omitted in accordance with Korean IFRS 1108, Operating Segments.

4. Financial Risk Management

4.1 Summary

4.1.1 Overview of financial risk management policy

The financial risks that the Company is exposed to are credit risk, market risk, liquidity risk and others.

The note regarding financial risk management provides information about the risks that the Company is exposed to, including the objectives, policies, assessment and management process of risks. Additional quantitative information is disclosed throughout the separate financial statements.

The Company's risk management system focuses on increasing transparency, developing the risk management environment, and the preemptive response to risk due to rapid changes in the financial environment to support the Company's long-term strategy and business decisions efficiently. Credit risk, market risk and liquidity risk have been recognized as the Company's key risks. These risks are measured and managed in Internal Capital or VaR (Value at Risk) using a statistical method.

4.1.2 Risk management organization

Risk Management Committee

The Risk Management Committee establishes risk management strategies in accordance with the directives of the Board of Directors and determines the Company's target risk appetite. The committee approves significant risk matters and reviews the level of risks that the Company is exposed to and the appropriateness of the Company's risk management operations as an ultimate decision–making authority.

Risk Management Council

The Risk Management Council is a consultative group which reviews and makes decisions on matters delegated by the Risk Management Committee, and discusses the detailed issues relating to the Company's risk management.

Risk Management Division

The Risk Management Division is responsible for conducting detailed policies, procedures and working processes relating to the Company's risk management.

4.2 Credit Risk

4.2.1 Overview of credit risk

Credit risk is the risk of possible losses in an asset portfolio in the event of counterparty's default, breach of contract and deterioration in the credit quality of the counterparty. For risk management reporting purposes, the individual borrower's default risk is considered.

4.2.2 Credit risk management

The Company measures expected losses on assets that are subject to credit risk management and uses it as a management indicator.

4.2.3 Maximum exposure to credit risk

The Company's maximum exposures of financial instruments to credit risk without consideration of collateral values as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 20 | 19 | | 2018 |
|--|----|---------|---|---------|
| Due from financial institutions | ₩ | 18,537 | ₩ | 344,302 |
| Loans at amortized cost | | 120,000 | | 50,000 |
| Loans at fair value through profit or loss | | 122,408 | | - |
| Other financial assets | | 19,814 | | 17,116 |
| | ₩ | 280,759 | ₩ | 411,418 |

4.2.4 Credit risk of loans

The Company maintains an allowance for loan losses associated with credit risk on loans to manage its credit risk.

The Company assesses expected credit loss on financial asset at amortized cost and financial asset at fair value through other comprehensive income other than financial asset at fair value through profit or loss and recognizes loss allowance. Expected credit losses are a probability-weighted estimate of possible credit losses within certain range by reflecting reasonable and supportable information that is reasonably available at the reporting date without undue cost or effort, including information about past events, current conditions and forecasts of future economic conditions. For financial assets at amortized cost, the Company measures the expected credit losses and presents it in the financial statements netting the allowance from the related loans; for financial assets measured at fair value through other comprehensive income, the Company presents it in the statements using other comprehensive income.

Credit risk exposure

Loans as of December 31, 2019 and 2018, are classified as follows:

| | | 2019 | | | | | | | | | | |
|-----------------------------------|---|--|----------|---|--|-----------|--|--|--|--|--|--|

4.3 Liquidity Risk

4.3.1 Overview of liquidity risk

Liquidity risk is a risk that the Company becomes insolvent due to uncertain liquidity caused by unexpected cash outflows, or a risk of borrowing high interest debts or disposal of liquid and other assets at a substantial discount. The Company manages its liquidity risk through analysis of the contractual maturity of interest-bearing assets and liabilities, assets and liabilities related to the other cash flow, and off-balance sheet items related to cash flow of currency derivative instruments and others.

Cash flows disclosed for the maturity analysis are undiscounted contractual principal and interest to be received (paid) and; thus, are not identical to the amount in the financial statements that are based on the present value of expected cash flows in some cases. The amount of interest to be received or paid on floating rate assets and liabilities is measured on the assumption that the current interest rate would be the same through the maturity.

4.3.2. Liquidity risk management

The liquidity risk is managed by liquidity management principles and related guidelines which are applied to the risk management policies and procedures that address all the possible risks that arise from the overall business of the Company.

4.3.3. Analysis of remaining contractual maturity of financial assets and liabilities

The remaining contractual maturity of financial assets and liabilities as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

4.4 Market Risk

4.4.1 Concept

Market risk is the risk of possible losses which arise from changes in market factors; such as, interest rate, stock price, foreign exchange rate and other market factors that affect the fair value of future cash flows of financial instruments. The most significant risk of the Company is interest rate risk.

4,4,2 Interest rate risk

Definition of interest rate risk

Interest rate risk is the risk that may occur due to changes in interest rates; such as, the value (fair value) change risk in statement of financial position line items and cash flow change risk in interest income and expense arising from investing and financing activities.

² Hybrid securities included in financial assets at fair value through profit or loss are included in the 'Over 5 years' category since the point of disposal is uncertain.

Observation method and management indicator on interest rate risk

The main objective of interest rate risk management is to protect asset values against interest rate fluctuations. The Company manages the risk through measurement and management of Value at Risk for the interest rate.

Interest Rate VaR

Interest rate VaR is the maximum possible loss due to interest rate risk at a 99.9% confidence level. The measurement results of risk as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 2019 | 2018 | |
|-------------------|-------|----------|--------|
| Interest rate VaR | ₩ 146 | 472 ₩ 1- | 49,774 |

4.5 Capital Adequacy

The Company complies with the capital adequacy standard established by the Financial Services Commission. The capital adequacy standard is based on Basel III published by Basel Committee on Banking Supervision in Bank for International Settlements in June 2011, and was implemented in Korea in December 2013. The Company is required to maintain a minimum Common Equity Tier 1 ratio of at least 8.0%(2018: 7.125%), a minimum Tier 1 ratio of 9.5%(2018: 8.625%) and a minimum Total Regulatory Capital ratio of 11.5%(2018: 10.625%) as of December 31, 2019.

The Company's equity capital is classified into three categories in accordance with the Supervisory Regulations and Detailed Supervisory Regulations on Financial Holding Companies as below:

- Common Equity Tier 1 Capital: Common equity Tier 1 Capital represents the issued capital that takes the first and proportionately greatest share of any losses and represents the most subordinated claim in liquidation of the Company, and not repaid outside of liquidation. It includes common shares issued, capital surplus, retained earnings, non-controlling interests of consolidated subsidiaries, accumulated other comprehensive income, other capital surplus and others.
- Additional Tier 1 Capital: Additional Tier 1 Capital includes (i) perpetual instruments issued by the Company that meet the criteria for inclusion in Additional Tier 1 capital, and (ii) stock surplus resulting from the issue of instruments included in Additional Tier 1 capital and others.
- Tier 2 Capital: Tier 2 Capital represents the capital that takes the proportionate share of losses in the liquidation of the Company. Tier 2 Capital includes a fund raised by issuing subordinated debentures maturing in not less than 5 years that meet the criteria for inclusion in Additional Tier 2 capital, and the allowance for loan losses which are accumulated for assets classified as normal or precautionary as a result of classification of asset soundness in accordance with Regulation on Supervision of Financial Holding Companies and others.

Risk weighted asset means the inherent risks in the total assets held by the Company. The Company calculates risk weighted asset by each risk (credit risk, market risk, and operational risk) based on the Supervisory Regulations and Detailed Supervisory Regulations on Financial Holding Companies and uses it for BIS ratio calculation.

The Company assesses and monitors its adequacy of capital by using the internal assessment and management policy of the capital adequacy. The assessment of the capital adequacy is conducted by comparing available capital (actual amount of available capital) and Internal Capital (amount of capital enough to cover all significant risks under target credit rate set by the Company). The Company monitors the soundness of finance and provides risk adjusted basis for performance review using the assessment of the capital adequacy.

Internal Capital is the amount of capital to prevent the inability of payment due to unexpected loss in the future. The Company measures, allocates and monitors Internal Capital by risk type and subsidiaries.

The Risk Management Council of the Company determines the Company's risk appetite and allocates Internal Capital by risk type and subsidiary. Each subsidiary efficiently operates its capital within a range of allocated Internal Capital. The Risk Management Department of the Company monitors the limit on Internal Capital and reports the results to management and the Risk Management Council. The Company maintains the adequacy of capital through proactive review and approval of the Risk Management Committee when the Internal Capital is expected to exceed the limits due to new business or business expansion.

Details of the Company's capital adequacy calculation in line with Basel III, as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 2019 | 2018 |
|----------------------------------|--------------|--------------|
| Equity Capital: | ₩ 36,989,005 | ₩ 34,476,172 |
| Tier 1 Capital | 35,420,184 | 32,993,826 |
| Common Equity Tier 1 Capital | 34,703,953 | 32,993,826 |
| Additional Tier 1 Capital | 716,231 | - |
| Tier 2 Capital | 1,568,821 | 1,482,346 |
| Risk-weighted assets: | 255,382,302 | 236,099,017 |
| Equity Capital (%): | 14.48 | 14.60 |
| Tier 1 Capital (%) | 13.87 | 13.97 |
| Common Equity Tier 1 Capital (%) | 13.59 | 13.97 |

5. Financial Assets and Financial Liabilities

5.1 Classification and Fair value of Financial Instruments

The carrying amounts and fair value of financial assets and liabilities by category as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 201 | 19 | |
|---|----------|-----------|----|------------|
| | Carrying | amount | | Fair value |
| Financial assets | | | | |
| Financial assets at fair value through profit or loss | ₩ | 413,909 | ₩ | 413,909 |

| | | 572,260 | | 572,260 |
| Financial liabilities | | | | |
| Financial liabilities at amortized cost | | | | |
| Debentures | | 5,543,446 | | 5,631,217 |
| Other financial liabilities | | 14,940 | | 14,940 |
| | ₩ | 5,558,386 | ₩ | 5,646,157 |

| | | | | (, |
|---|--------|-----------|----|------------|
| | | 20 | 18 | |
| | Carryi | ng amount | | Fair value |
| Financial assets | | | | |
| Financial assets at fair value through profit or loss | ₩ | 289,179 | ₩ | 289,179 |
| Financial assets at amortized cost | | | | |
| Due from financial institutions | | 344,302 | | 344,302 |
| Loans | | 50,000 | | 50,000 |
| Other financial assets | | 17,116 | | 17,116 |
| | | 700,597 | | 700,597 |
| Financial liabilities | | | | |
| Financial liabilities at amortized cost | | | | |
| Debts | | 300,000 | | 300,000 |
| Debentures | | 5,373,266 | | 5,398,656 |
| Other financial liabilities | | 19,953 | | 19,953 |
| | ₩ | 5,693,219 | ₩ | 5,718,609 |

Fair value is the amount for which an asset could be exchanged, or a liability could be settled, between knowledgeable, willing parties in an arm's length transaction. For each class of financial assets and financial liabilities, the Company discloses the fair value of that class of assets and liabilities in a way that permits it to be compared with its carrying amount at the end of each reporting period. The best evidence of fair value of financial instruments is quoted price in an active market.

Methods of determining fair value of financial instruments are as follows:

| Cash and due from financial | The carrying amounts of cash and demand due from financial institutions and payment due from financial institutions are a reasonable approximation of fair values. These financial instruments do not have a fixed maturity and are |
|-----------------------------|---|
| institutions | receivable on demand. Fair value of ordinary due from financial institutions is measured using DCF model. |
| | The fair value of financial instruments that are quoted in active markets is determined using the quoted prices. |
| | Fair value is determined through the use of external professional valuation institution where quoted prices are not |
| Investment securities | available. The institutions use one or more of the following valuation techniques including DCF Model, Free Cash Flow |
| | to Equity Model, Imputed Market Value Model, Dividend Discount Model, Risk Adjusted Discount Rate Method, and |
| | Net Asset Value Method. |
| | For exchange traded derivatives, quoted price in an active market is used to determine fair value and for OTC |
| | derivatives, fair value is determined using valuation techniques. The Company uses internally developed valuation |
| | models that are widely used by market participants to determine fair values of plain vanilla OTC derivatives including |
| Derivatives | options, interest rate swaps, and currency swaps, based on observable market parameters. However, some complex |
| | financial instruments are valued using appropriate models developed from generally accepted market valuation |
| | models including the Finite Difference Method and the Monte Carlo Simulation or valuation results from independent |
| | external professional valuation institution. |
| | DCF model is used to determine the fair value of loans. Fair value is determined by discounting the expected cash |
| Loans at amortized cost | flows, which are contractual cash flows adjusted by the expected prepayment rate, at appropriate discount rate. |
| Debts | DCF model is used to determine the fair value of debts, but in the case of short-term maturity, the carrying amount is |
| Debts | used as the fair value. |
| Debentures | Fair value is determined by using the valuations of external professional valuation institution, which are calculated |
| Debentures | using market inputs. |
| Other financial assets | The carrying amounts are reasonable approximation of fair values. These financial instruments are temporary accounts |
| and liabilities | used for other various transactions and their maturities are relatively short or not defined. |
| | |

Fair value hierarchy

The Company believes that valuation methods used for measuring the fair values of financial instruments are reasonable and that the fair values recognized in the statement of financial position are appropriate. However, the fair values of the financial instruments recognized in the statement of financial position may be different if other valuation methods or assumptions are used. Additionally, as there is a variety of valuation techniques and assumptions used in measuring fair value, it may be difficult to reasonably compare the fair value with that of other financial institutions.

The Company classifies and discloses fair value of the financial instruments into the three-level hierarchy as follows:

- Level 1 The fair values are based on quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2 The fair values are based on inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3 The fair values are based on unobservable inputs for the asset or liability.

When the inputs used to measure the fair value of an asset or a liability might be categorized within different levels of the fair value hierarchy, the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. Assessing the significance of a particular input to the entire measurement requires judgment, taking into account factors specific to the asset or liability. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

Fair value hierarchy of financial assets and liabilities measured at fair value in the statements of financial position

The fair value hierarchy of financial assets measured at fair value in the statement of financial position as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | | | | | | | |
|---|---|---------|----|--------|--------------|---|---------|---|---------|

| | ₩ | - + | ₩ 5,631,217 | ₩ 14,940 | ₩ | 5,646,157 |

(In millions of Korean won)

| | | 2018 Fair value hierarchy | | | | | | |
|---|---------|---------------------------|---|-----------|---|---------|---|-----------|
| | Level 1 | | ι | evel 2 | | Level 3 | | Total |
| Financial assets | | | | | | | | |
| Cash and due from financial institutions ¹ | ₩ | - | ₩ | 284,302 | ₩ | 60,000 | ₩ | 344,302 |
| Loans at amortized cost ² | | _ | | - | | 50,000 | | 50,000 |
| Other financial assets ³ | | - | | - | | 17,116 | | 17,116 |
| | | _ | | 284,302 | | 127,116 | | 411,418 |
| Financial liabilities | | | | | | | | |
| Debts ⁴ | | - | | 300,000 | | _ | | 300,000 |
| Debentures | | - | | 5,398,656 | | _ | | 5,398,656 |
| Other financial liabilities ³ | | - | | - | | 19,953 | | 19,953 |
| | ₩ | _ | ₩ | 5,698,656 | ₩ | 19,953 | ₩ | 5,718,609 |

¹ Because due from financial institutions classified as level 2 are deposits on demand, carrying amounts are reasonable approximations of fair values. And due from financial institutions classified as level 3 are due from financial institutions with residual maturity of less than 3 months, carrying amounts are reasonable approximations of fair values.

Valuation techniques and inputs used in the fair value measurement

For financial assets and liabilities whose carrying amount is a reasonable approximation of fair value, we do not disclose valuation techniques and inputs.

Valuation techniques and inputs of financial assets and liabilities whose fair values are disclosed and classified as Level 2 as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | Fair v | alue | | Valuation | Inputs |
|-----------------------|---|-----------|------|-----------|------------|---------------|
| | | 2019 | | 2018 | Techniques | |
| Financial liabilities | | | | | | |
| Debentures | ₩ | 5,631,217 | ₩ | 5,398,656 | DCF model | Discount rate |

5.2 Level 3 of the Fair Value Hierarchy Disclosure

5.2.1 Valuation policy and process for fair value measurement categorized as Level 3

The Company uses external, independent and qualified professional valuer's valuation to determine the fair value of the Company's assets at the end of every reporting period.

² Because loans at amortized cost classified as level 3 are loans with residual maturity of less than one year, carrying amounts are reasonable approximations of fair values.

⁵ For other financial assets and other financial liabilities classified as level 3, carrying amounts are reasonable approximations of fair values.

⁴ Since the remaining maturity of debts classified as level 2 is less than a year, carrying amounts are reasonable approximations of fair values.

5.2.2 Changes in fair value (Level 3) measured using valuation technique based on assumption that is unobservable in the market

Details of changes in Level 3 of the fair value hierarchy for the years ended December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | through | sets at fair value profit or loss 2019 |
|-------------------------------|---------|--|

5.2.3 Sensitivity analysis of changes in unobservable inputs

Information about fair value measurements using unobservable inputs as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | | | | 2019 | | |
|--|----|-----------|---|---|-----------------------------|---------------------------------------|---|
| | Fa | air value | Valuation technique | Inputs | Unobservable inputs | Range of unobservable inputs(%) | Relationship of unobservable inputs to fair value |
| Financial assets Financial assets at fair value through profit or loss | | | | | | | - |
| Hybrid securities | ₩ | 291,501 | Hull and White Model, Monte Carlo Simulation | Matrix YTM, Additional spread by grade, Risk spread of | Discount rate | 2.05 ~ 4.45 | The lower the discount rate, the higher the fair value |
| | | | | company, Valid credit rating, Disclosed information of securities, Interest rate estimation variability | Volatility of interest rate | 0.50 | The higher the volatility, the higher the fair value fluctuation |

| | 2018 | | | | | | |
|---|------------|---------|--|---|--------------------------------|---------------------------------------|--|
| | Fair value | | Valuation technique | Inputs | Unobservable inputs | Range of unobservable inputs(%) | Relationship of unobservable inputs to fair value |
| Financial assets | | | | | | | |
| Financial assets at fair value through profit or loss | | | | | | | |
| Hybrid securities | ₩ | 289,179 | Hull and White Model, Monte Carlo Simulation | Matrix YTM, Additional spread by grade, Risk spread of | Discount rate | 2.43~4.80 | The lower the discount rate, the higher the fair value |
| | | | | company, Valid credit rating, Disclosed information of securities, Interest rate estimation variability | Volatility of interest rate | 0.47 | The higher the volatility, the higher the fair value fluctuation |

Sensitivity analysis of changes in unobservable inputs

Sensitivity analysis of financial instruments is performed to measure favorable and unfavorable changes in the fair value of financial instruments which are affected by the unobservable parameters, using a statistical technique. When the fair value is affected by more than two input parameters, the amounts represent the most favorable or most unfavorable outcome. There are hybrid securities whose fair value changes are recognized in profit or loss.

The results of the sensitivity analysis from changes in inputs are as follows:

(In millions of Korean won)

| | | 2019 | | | | | | | | | |
|---|-------------------|---------------------|----------------------------|---------------------|--|--|--|--|--|--|--|
| | Recognition | n profit or loss | Other comprehensive income | | | | | | | | |
| | Favorable changes | Unfavorable changes | Favorable changes | Unfavorable changes | | | | | | | |
| Financial assets | | | | | | | | | | | |
| Financial assets at fair value through profit or loss | | | | | | | | | | | |
| Hybrid securities ¹ | ₩ 3,215 | 5 ₩ (3,195) | ₩ | - ₩ - | | | | | | | |
| | ₩ 3,215 | ₩ (3,195) | ₩ | _ ₩ | | | | | | | |

¹ For equity securities, the changes in fair value are calculated by increasing or decreasing correlations between discount rate (2.05 ~ 4.45%) which are principal unobservable input parameters. And, the changes in fair value are calculated by increasing or decreasing the correlation coefficient between short-term and long-term interests or volatility of the interest rates, which are unobservable inputs, by 1%.

(In millions of Korean won)

| | 2018 | | | | | | | | | |
|---|-------------------------------|---------|---------------------|---------|----------------------------|---|---------------------|--|--|--|
| | Recognition in profit or loss | | | | Other comprehensive income | | | | | |
| | Favorable (| changes | Unfavorable changes | | Favorable changes | | Unfavorable changes | | | |
| Financial assets | | | | | | | | | | |
| Financial assets at fair value through profit or loss | | | | | | | | | | |
| Hybrid securities ¹ | ₩ | 5,882 | ₩ | (5,782) | ₩ | - | ₩ - | | | |
| | ₩ | 5,882 | ₩ | (5,782) | ₩ | _ | ₩ - | | | |

¹ For equity securities, the changes in fair value are calculated by increasing or decreasing correlations between discount rate (2.43 ~ 4.80%) which are principal unobservable input parameters. And, the changes in fair value are calculated by increasing or decreasing the correlation coefficient between short-term and long-term interests or volatility of the interest rates, which are unobservable inputs, by 1%.

6. Due from Financial Institution

Details of due from financial institution as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | Financial Institution | Interest rate(%) (As of December 31, 2019) | | 2019 | | 2018 |
|---|------------------------------|--|---|--------|---|---------|

Unrecognized deferred income tax assets

No deferred income tax assets have been recognized for the deductible temporary difference of $\mbox{$\mbox{$$\psi}$}$ 2,896,164 million, $\mbox{$\mbox{$$\mbox{$$\mbox{$$\mbox{$}$}$}}$ 66,162 million and $\mbox{$\mbox{$$\mbox{$$\mbox{$}$}$}$ 51,742 million associated with investments in subsidiaries, tax loss carryforwards and impairment losses on investments in subsidiaries, respectively, as of December 31, 2019, due to the uncertainty that all these will be realized in the future.

Unrecognized deferred income tax liabilities

No deferred income tax liabilities have been recognized for the taxable temporary difference of $\mbox{$\psi$}$ 2,395,805 million associated with investments in subsidiaries as of December 31, 2019, due to the following reasons:

- The Company is able to control the timing of the reversal of the temporary difference.
- It is probable that the temporary difference will not be reversed in the foreseeable future.

The changes in cumulative temporary differences for the years ended December 31, 2019 and 2018, are as follows:

| | | | 201 | L9 | | | |

16. Net Defined Benefit Liabilities

Defined benefit plan

The Company operates defined benefit plans which have the following characteristics:

- The Company has the obligation to pay the agreed benefits to all its current and former employees.
- Actuarial risk (that benefits will cost more than expected) and investment risk fall, in substance, on the Company.

The net defined benefit liability recognized in the statements of financial position is calculated in accordance with actuarial valuation methods using market data; such as, interest rates, future salary increase rate and mortality rate based on historical data. Actuarial assumptions may differ from actual results, due to changes in the market, economic trends and mortality trends.

Changes in the defined benefit obligation for the years ended December 31, 2019 and 2018, are as follows:

| | | 2019 | |
|--|---|---------------------------|---------------------------------|
| | Present value of defined benefit obligation | Fair value of plan assets | Net defined benefit liabilities |
| Beginning | ₩ 20,363 | ₩ (20,180) | ₩ 183 |
| Current service cost | 2,175 | - | 2,175 |
| Interest cost(income) | 466 | (462) | 4 |
| Remeasurements: | | | |

| included in interest income) | | - | | 280 | | 280 |
| Contributions | | - | | (4,172) | | (4,172) |
| Payments from plans (benefit payments) | | (1,393) | | 1,393 | | - |
| Payments from the Company | | (38) | | _ | | (38) |
| Transfer in | | 2,883 | | (2,844) | | 39 |
| Transfer out | | (2,443) | | 2,443 | | - |
| Ending | ₩ | 20,363 | ₩ | (20,180) | ₩ | 183 |

Details of the net defined benefit liabilities as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | | 2018 |
|---|---|----------|---|----------|
| Present value of defined benefit obligation | ₩ | 20,312 | ₩ | 20,363 |
| Fair value of plan assets | | (19,875) | | (20,180) |
| Net defined benefit liabilities | ₩ | 437 | ₩ | 183 |

Details of post-employment benefits recognized in profit or loss as employee compensation and benefits for the years ended December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 20 |)19 | | 2018 |
|--|----|-------|---|-------|
| Current service cost | ₩ | 2,175 | ₩ | 1,925 |
| Net interest expenses(income) of net defined benefit liabilities | | 4 | | (6) |
| Post-employment benefits | ₩ | 2,179 | ₩ | 1,919 |

Remeasurements of the net defined benefit liabilities recognized as other comprehensive income for the years ended December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | | 2018 |
|---|---|-------|---|---------|
| Remeasurements | | | | |
| Return on plan assets (excluding amounts included in interest income) | ₩ | (195) | ₩ | (280) |
| Actuarial gains and losses | | (521) | | (2,356) |
| Income tax effects | | 196 | | 725 |
| Remeasurements after income tax | ₩ | (520) | ₩ | (1,911) |

Plan assets as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 2019 | | | | | | |
|--|-----------------------------------|---------------------------------------|-------|--------|--|--|--|
| | Assets quoted in an active market | Assets not quoted in an active market | Total | | | | |
| Cash and due from financial institutions | ₩ - | ₩ 19, | 875 ₩ | 19,875 | | | |

(In millions of Korean won)

| | | | 2018 | | |
|--|-----------------------------------|-----|--------------------------------------|------|--------|
| | Assets quoted in an active market | | ssets not quoted an active market | Tota | al |
| Cash and due from financial institutions | ₩ | - ₩ | 20,180 | ₩ | 20,180 |

Key actuarial assumptions used as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 2019 | 2018 |
|---------------------------------|------|------|
| Discount rate (%) | 2.00 | 2.30 |
| Future salary increase rate (%) | 3.75 | 3.75 |
| Turnover (%) | 1 | 1 |

Mortality assumptions are based on the experience-based mortality table(retirement pension) of Korea Insurance Development Institute of 2019.

The sensitivity of the defined benefit obligation to changes in the principal assumptions as of December 31, 2019, is as follows:

| | Channelin . | Effect on defined benefit obligation | | | | | |
|--------------------------|-----------------------------------|--------------------------------------|----------------------------------|--|--|--|--|
| | Changes in — principal assumption | Increase in principal assumption | Decrease in principal assumption | | | | |
| Discount rate (%) | 0.5%р. | -4.86% | 5.20% | | | | |
| Salary increase rate (%) | 0.5%р. | 5.32% | -5.02% | | | | |
| Turnover (%) | 0.5%р. | -0.56% | 0.58% | | | | |

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. The sensitivity of the defined benefit obligation to changes in principal actuarial assumptions is calculated using the projected unit credit method, the same method applied when calculating the defined benefit obligations recognized on the statement of financial position.

Expected maturity analysis of undiscounted pension benefits (including expected future benefits) as of December 31, 2019, are as follows:

(In millions of Korean won)

| | Up to 1 year | | 1 ~ yea | _ | | 2 ~ 5 years | | 5 ~ 10 years | | Over years | | Total |
|------------------|-----------------|-----|------------|-----|---|----------------|---|-----------------|---|---------------|---|--------|
| Pension benefits | ₩ | 185 | ₩ | 387 | ₩ | 3,349 | ₩ | 13,583 | ₩ | 35,862 | ₩ | 53,366 |

The weighted average duration of the defined benefit obligation is 10.2 years.

17. Other Liabilities

Details of other assets as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 20 | 19 | | 2018 |
|---------------------------------|----|---------|---|---------|
| Other financial liabilities | | | | |
| Payables | ₩ | 1,134 | ₩ | 7,375 |
| Accrued expenses | | 13,218 | | 12,578 |
| Lease liability | | 588 | | - |
| | | 14,940 | | 19,953 |
| Other non-financial liabilities | | | | |
| Payables | | 59,263 | | 49,348 |
| Accrued expenses | | 128,824 | | 116,800 |
| Withholding taxes | | 413 | | 380 |
| | | 188,500 | | 166,528 |
| | ₩ | 203,440 | ₩ | 186,481 |

18. Equity

Details of share capital and number of issued shares as of December 31, 2019 and 2018, are as follows:

| | | 2019 | 2018 | | |
|-----------------------------|---|----------------|------|----------------|--|
| Type of share | | Ordinary share | | Ordinary share | |
| Number of authorized shares | | 1,000,000,000 | | 1,000,000,000 | |
| Par value per share | ₩ | 5,000 | ₩ | 5,000 | |
| Number of issued shares | | 415,807,920 | | 418,111,537 | |
| Share capital ¹ | ₩ | 2,090,558 | ₩ | 2,090,558 | |

¹ In millions of Korean won. Due to the retirement of shares deducted through profits, it is different from the total par value of the shares issued.

(In number of shares)

| | | 2019 | 2018 | | |
|-----------|---|-------------|------|-------------|--|
| Beginning | ₩ | 395,551,297 | ₩ | 399,037,583 | |
| Increase | | - | | - | |
| Decrease | | (5,916,962) | | (3,486,286) | |
| Ending | ₩ | 389,634,335 | ₩ | 395,551,297 | |

18.2 Hybrid Securities

Details of hybrid securities classified as equity as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | Issuance date | Maturity | Interest rate (%) | | 2019 | | 2018 |
|---|---------------|----------------|-------------------|---|---------|---|------|
| The 1–1 st Hybrid securities | May 2, 2019 | Perpetual bond | 3.23 | ₩ | 349,204 | ₩ | _ |
| The 1-2 nd Hybrid securities | May 2, 2019 | Perpetual bond | 3.44 | | 49,881 | | - |
| | | | | ₩ | 399,085 | ₩ | |

The above hybrid securities are early redeemable by the Company after 5 or 10 years from the issuance date

301

18.3 Capital Surplus

Details of capital surplus as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 2019 | | 2018 | |
|---------------------------------|------|------------|------|------------|
| Share premium | ₩ | 13,190,275 | ₩ | 13,190,275 |
| Other capital surplus | | 1,465,893 | | 1,465,893 |
| Gain on sales of treasury share | | 86,646 | | 86,646 |
| | ₩ | 14,742,814 | ₩ | 14,742,814 |

18.4 Accumulated Other Comprehensive Income

Details of accumulated other comprehensive income as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 2019 | | 20 | 18 |
|---|------|---------|----|---------|
| Remeasurements of net defined benefit liabilities | ₩ | (7,664) | ₩ | (7,144) |
| | ₩ | (7,664) | ₩ | (7,144) |

Changes in accumulated other comprehensive income for the years ended December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | | | | | | | |
|---|---|-----------|---|---------|---|------------|---|---------|--|
| | | Beginning | | Changes | | Tax effect | | Ending | |

| | ₩ | (7,144) | ₩ | (716) | ₩ | 196 | ₩ | (7,664) | |

(In millions of Korean won)

| | | 2019 | | | | | | | |
|---|---|-----------|---|---------|---|------------|---|---------|--|
| | | Beginning | | Changes | | Tax effect | | Ending | |
| Remeasurements of net defined benefit liabilities | ₩ | (5,233) | ₩ | (2,636) | ₩ | 725 | ₩ | (7,144) | |
| | ₩ | (5,233) | ₩ | (2,636) | ₩ | 725 | ₩ | (7,144) | |

18.5 Retained Earnings

Details of retained earnings as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | | 2019 | | 2018 |
|--|---|-----------|---|-----------|
| Legal reserves | ₩ | 482,807 | ₩ | 390,216 |
| Voluntary reserves | | 982,000 | | 982,000 |
| Regulatory reserve for credit losses | | 4,458 | | 2,374 |
| Retained earnings before appropriation | | 1,624,029 | | 1,838,966 |
| | ₩ | 3,093,294 | ₩ | 3,213,556 |

With respect to the allocation of net profit earned in a fiscal term, the Company must set aside in its legal reserve an amount equal to at least 10% of its profit for the year after tax as reported in the separate statement of comprehensive income each time it pays dividends on its net profits earned until its legal reserve reaches at least the aggregate amount of its share capital in accordance with Article 53 of the Financial Holding Company Act. The reserve is not available for the payment of cash dividends, but may be transferred to share capital, or used to reduce accumulated deficit.

Appropriation of retained earnings

(Expected date of appropriation for 2019: March 20, 2020) (Date of appropriation for 2018: March 27, 2019)

(In millions of Korean won)

| | | 2019 | | 2018 |
|--|---|-----------|---|-----------|
| Unappropriated retained earnings | | | | |
| Balance at the beginning of the year | ₩ | 984,555 | ₩ | 913,061 |
| Profit for the year | | 745,987 | | 925,905 |
| Retirement of treasury shares | | (100,000) | | = |
| Dividends of hybrid securities | | (6,513) | | = |
| | | 1,624,029 | | 1,838,966 |
| Transfers such as discretionary reserves | | | | |
| Regulatory reserve for credit losses | | 283 | | = |
| | | 283 | | _ |
| Appropriation of retained earnings | | | | |
| Legal reserve | | 74,599 | | 92,591 |
| Regulatory reserve for credit losses | | - | | 2,084 |
| Cash dividends | | 861,092 | | 759,736 |
| (Dividends per common share: ₩ 2,210 (44.2%) in 2019) | | | | |
| (Dividends per common share: ₩ 1,920 (38.4%) in 2018) | | | | |
| | | 935,691 | | 854,411 |
| Unappropriated retained earnings to be carried forward | ₩ | 688,621 | ₩ | 984,555 |

Regulatory reserve for credit losses

Measurement and disclosure of regulatory reserve for credit losses are required in accordance with Articles 26 through 28 of the Supervisory Regulations on Financial Holding Companies.

Details of the regulatory reserve for credit losses as of December 31, 2019 and 2018, are as follows:

(In millions of Korean won)

| | 2019 | 2018 |
|--|--------|-----------|
| Beginning | ₩ 4,45 | 3 ₩ 2,374 |
| Estimated amounts subject to provision(reversal) | (283 | 2,084 |
| Ending | ₩ 4,17 | 5 ₩ 4,458 |

The adjustments to the regulatory reserve for credit losses for the years ended December 31, 2019 and 2018, are as follows:

(In millions of Korean won, except per share amounts)

| | | 2019 | | 2018 |
|--|---|---------|---|---------|
| Provision(reversal) of regulatory reserve for credit losses | ₩ | (283) | ₩ | 2,084 |
| Adjusted profit after provision(reversal) of regulatory reserve for credit losses ^{1,2} | | 739,757 | | 923,821 |
| Adjusted basic earnings per share after provision of | | | | 1 |
| regulatory reserve for credit losses ¹ | | 1,891 | | 2,330 |
| Adjusted diluted earnings per share after provision of | | | | |
| regulatory reserve for credit losses ¹ | ₩ | 1,877 | ₩ | 2,316 |

¹ Adjusted profit after provision(reversal) of regulatory reserve for credit losses is not in accordance with Korean IFRS and calculated on the assumption that provision(reversal) of regulatory reserve for credit losses before income tax is adjusted to the profit for the year.

² Amount after deducting dividends on hybrid securities.

18.6 Treasury Shares

Changes in treasury shares outstanding for the years ended December 31, 2019 and 2018, are as follows:

(In millions of Korean won and in number of shares)

| | | 2019 | | | | | | |
|--|---|------------|---|-------------|---|-------------|---|------------|
| | | Beginning | | Acquisition | | Retirement | | Ending |
| Number of treasury shares ¹ | | 22,560,240 | | 5,916,962 | | (2,303,617) | | 26,173,585 |
| Carrying amount ¹ | ₩ | 968,549 | ₩ | 267,639 | ₩ | (100,000) | ₩ | 1,136,188 |

¹ For the year ended December 31, 2019, the treasury stock trust agreement of ₩ 300,000 million with Samsung Securities Co., Ltd., which had been signed in 2018, was terminated.

(In millions of Korean won and in number of shares)

| | | 2018 | | | | | | | |
|--|---|------------|---|-------------|---|----------|---|---|------------|
| | | Beginning | | Acquisition | | Disposal | | | Ending |
| Number of treasury shares ¹ | | 19,073,954 | | 3,486,286 | | | _ | | 22,560,240 |
| Carrying amount ¹ | ₩ | 755,973 | ₩ | 212,576 | ₩ | | _ | ₩ | 968,549 |

¹ For the year ended December 31, 2018, the treasury stock trust agreement of ₩ 300,000 million with Samsung Securities Co., Ltd., which had been signed in 2017, was terminated. ¹ Granted shares represent the total number of shares initially granted to directors and employees that have residual shares at the end of reporting period (Deferred grants are residual shares at the end of the reporting period).

² Executives and employees were given the option of deferring payment of the granted shares (after the date of retirement), payment ratio, and payment period. Accordingly, a certain percentage of the granted amount is deferred for up to five years after the date of retirement when the deferred grant has been confirmed.

³ Relative TSR (Total Shareholders Return): [(Fair value at the end of the contract – Fair value at the beginning of the contract) + (Total amount of dividend per share paid during the contract period)] / Fair value at the beginning of the contract)

⁴ Accomplishment of corporates' and individuals' performance results

⁵ EPS, Asset Quality, HCROI, Non-banking sector profit

⁶ EPS, Asset Quality

The stock grant award program is an incentive plan that sets, on grant date, the maximum amount of shares that can be awarded. Actual stock granted at the end of the vesting period is determined in accordance with achievement of pre-specified targets over the vesting period.

Details of stock grants linked to short-term performances as of December 31, 2019, are as follows:

The Company used the volatility of the stock price over the previous year as the expected volatility, used the arithmetic mean of the dividend rate of one year before, two years before, and three years before the base year as the dividend yield, and used one-year risk-free interest rate in order to calculate fair value.

Share-based payment arrangement for subsidiaries and associate was transferred to the Company in 2010, and the related compensation cost paid to the executives and employees of subsidiaries and associate is reimbursed by these companies. The accrued expenses representing share-based payments as of December 31, 2019 and 2018, are \forall 124,853 million and \forall 111,058 million, respectively, and the receivables to be reimbursed by the subsidiaries for the compensation costs are \forall 112,997 million and \forall 100,434 million, respectively. In addition, the compensation costs from share-based payments that amount to \forall 4,259 million and \forall 551 million were recognized for the years ended December 31, 2019 and 2018, respectively.

25. Non-operating Income (Expense)

Details of non-operating income and expenses for the years ended December 31, 2019 and 2018, are as follows:

| | | 2019 | 201 | .8 |
|--|---|-------|-----|-------|
| Non-operating income | | | | |

| Average effective tax rate and tax benefit | 0.11 | ₩ | 854 | 0.30 | ₩ | 2,823 | |

¹ Applicable income tax rate for \$\psi\$ 200 million and below is \$11\psi\$, for \$\psi\$ 200 million to \$\psi\$ 200 billion is \$22\psi\$, for \$\psi\$ 20 billion to \$\psi\$ 300 billion is \$24.2\psi\$ and for over \$\psi\$ 300 billion is \$27.5\psi\$.

27. Earnings per Share

Calculations of basic earnings per share on the profit attributable to ordinary shares are as follows:

Weighted average number of ordinary shares outstanding:

(in number of shares)

| | 2 | 2019 ¹ | | 2018 |
|--|------------------|--------------------|------------------|--------------------|
| | Number of shares | Accumulated amount | Number of shares | Accumulated amount |
| Number of issued ordinary shares | 415,807,920 | 152,564,638,665 | 418,111,537 | 152,610,711,005 |
| Number of treasury shares | (26,173,585) | (9,801,574,522) | (22,560,240) | (7,888,226,378) |
| Average number of ordinary shares outstanding | 389,634,335 | 142,763,064,143 | 395,551,297 | 144,722,484,627 |
| Number of days | | 365 | | 365 |
| Weighted average number of ordinary shares outstanding | | 391,131,683 | | 396,499,958 |

¹ Initial date of treasury stock that was deducted by the retirement is December 12, 2019.

Basic earnings per share

(In Korean won and in number of shares)

| | | 2019 | | 2018 |
|--|---|-----------------|---|-----------------|
| Profit for the year | ₩ | 745,986,900,731 | ₩ | 925,904,728,413 |
| Deduction: Dividends on hybrid securities | | 6,512,500,000 | | - |
| Profit attributable to the ordinary equity holders (A) | | 739,474,400,731 | | 925,904,728,413 |
| Weighted average number of ordinary shares outstanding (B) | | 391,131,683 | | 396,499,958 |
| Basic earnings per share (A / B) | ₩ | 1,891 | ₩ | 2,335 |

Diluted earnings per share

Diluted earnings per share is calculated using the weighted average number of ordinary shares outstanding which is adjusted by the weighted average number of additional ordinary shares that would have been outstanding assuming the conversion of all dilutive potential ordinary shares. The Company's dilutive potential ordinary shares include stock grants.

A calculation is done to determine the number of shares that could have been acquired at fair value (determined as the average market share price of the Company's outstanding shares for the year) based on the monetary value of the subscription rights attached to the stock grants. The number of shares calculated above is compared with the number of shares that would have been issued assuming the exercise of stock grants.

309

Adjusted profit to calculate diluted earnings per share:

(In Korean won)

| | 2019 | | | 2018 |
|---|------|-----------------|---|-----------------|
| Profit attributable to the ordinary equity holders ¹ | ₩ | 739,474,400,731 | ₩ | 925,904,728,413 |
| Adjustment | | - | | - |
| Adjusted profit for diluted earnings per share | ₩ | 739,474,400,731 | ₩ | 925,904,728,413 |

¹ The amount is after deducting dividends on hybrid securities.

The Company paid ₩ 255 million to KB Securities Co., Ltd., a subsidiary, for the underwriting and arrangement of debentures and hybrid securities.

31. Changes in Accounting Policies – Implementation of Korean IFRS 1116 Leases

The Company applied Korean IFRS 1116 retrospectively as of January 1, 2019. However, the financial statements for the year ended 2018 was not restated using the method allowed by transitional provisions. Therefore reclassification and adjustments under the new IFRS were recognized in the financial statements beginning on January 1, 2019.

A lessee shall apply this standard to its leases either:

- retrospectively to each prior reporting period presented applying Korean IFRS 1008 Accounting Policies, Changes in Accounting Estimates and Errors (Full retrospective application); or
- retrospectively with the cumulative effect of initially applying the standard recognized at the date of initial application.

The Company applied Korean IFRS 1116 retrospectively with recognizing the cumulative effect of initial adoption of the standard as of January 1, 2019. The Company did not restate any comparative financial statements.

For leases previously classified as 'finance leases', the Company recognized the carrying amount of the lease asset and lease liability immediately before transition as the carrying amount of the right-of-use asset and the lease liability at the date of initial application. The measurement principles of Korean IFRS 1116 are only applied after that date. The remeasurements to the lease liabilities were recognized as adjustments to the related right-of-use assets immediately after the date of initial application.

(In millions of Korean won)

| | Janu | Jary 1, 2019 |
|---|------|--------------|
| Right-of-use asset | | |
| Discounts used lessee's incremental borrowing rate | | |
| at the date of current initial application | ₩ | 684 |
| Add: Financial leased asset recognized at December 31, 2018 | | - |
| Right-of use asset recognized as of the date of initial application | ₩ | 684 |
| Lease liability | | |
| Operating lease commitments disclosed at December 31, 2018 | ₩ | 468 |
| Discounted amount using the lessee's incremental borrowing rate ¹ at the date of initial application | | 460 |
| Add: Financial leased liability recognized at December 31, 2018 | | - |
| Lease liability recognized as of the date of initial application | ₩ | 460 |

¹ Incremental borrowing rate of interest is 1,88% to 2,21%

The difference between the amount of the right-of-use asset and the lease liability is adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognized in the statement of financial position immediately before the date of initial application.

The Company did not need to make any adjustments to the accounting for assets held as lessor as a result of the adoption of Korean IFRS 1116.

The amounts recognized in statement of financial position

The amounts related to lease recognized in statement of financial position as of December 31, 2019 and January 1, 2019, are as follows:

(In millions of Korean won)

Report on Independent Auditor's Audit of Internal Control over Financial Reporting

To the Board of Directors and Shareholders of KB Financial Group Inc.

Opinion on Internal Control over Financial Reporting

We have audited Internal Control over Financial Reporting of KB Financial Group Inc.(the Company) as of December 31, 2019, based on Conceptual Framework for Designing and Operating Internal Control over Financial Reporting.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2019, based on Conceptual Framework for Designing and Operating Internal Control over Financial Reporting.

We also have audited, in accordance with Korean Standards on Auditing, the financial statements of the Company, which comprise the statement of financial position as at December 31, 2019, and the statement of comprehensive income, statement of changes in equity and statement of cash flow for the year then ended, and notes to the financial statements including a summary of significant accounting policies, and our report dated March 5, 2020 expressed an unqualified opinion.

Basis for Opinion on Internal Control over Financial Reporting

We conducted our audit in accordance with Korean Standards on Auditing. Our responsibility under these standards are further described in the Auditor's Responsibilities for the Audit of the Internal Control over Financial Reporting section of our report. We are independent of the Company in accordance with the ethical requirements of the Republic of Korea that are relevant to our audit of internal control over financial reporting and we have fulfilled our other ethical responsibilities in accordance with the ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management and Those Charged with Governance for Internal Control over Financial Reporting

Management is responsible for designing, implementing and maintaining effective internal control over financial reporting, and for its assessment about the effectiveness of internal control over financial reporting, included in the accompanying Operating Status Report of the Internal Control over Financial Reporting. Those charged with governance have the responsibilities for overseeing internal control over financial reporting.

Auditor's Responsibilities for the Audit of Internal Control over Financial Reporting

Our responsibility is to express opinion on the Company's internal control over financial reporting based on our audit. We conducted the audit in accordance with Korean Standards on Auditing. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

An audit of internal control over financial reporting involves performing procedures to obtain audit evidence about whether a material weakness exists. The procedures selected depend on the auditor's judgment, including the assessment of the risks that a material weakness exists. An audit includes obtaining an understanding of internal control over financial reporting and testing and evaluating the design and operating effectiveness of internal control over financial reporting based on the assessed risk.

Definition and Inherent Limitations of Internal Control over Financial Reporting

An entity's internal control over financial reporting is a process effected by those charged with governance, management, and other personnel, designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with International Financial Reporting Standards as adopted by the Republic of Korea. An entity's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with International Financial Reporting Standards as adopted by the Republic of Korea, and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and those charged with governance; and (3) provide reasonable assurance regarding prevention, or timely detection and correction of unauthorized acquisition, use, or disposition of the entity's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct, misstatements. Also, projections of any assessment of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The engagement partner on the audit resulting in this independent auditor's report is Yeob Yu, Certified Public Accountant.

Operating Status Report of the Internal Control over Financial Reporting

To the Shareholders, Board of Directors and Audit Committee of KB Financial Group Inc.

We, as the Chief Executive Officer ("CEO") and the Internal Control over Financial Reporting ("ICFR") Officer of KB Financial Group Inc. ("the Company"), assessed operating status of the Company's Internal Control over Financial Reporting for the year ended December 31, 2019.

The Company's management, including ourselves, is responsible for designing and operating ICFR.

We assessed whether the Company effectively designed and operated its ICFR to prevent and detect errors or frauds which may cause a misstatement in financial statements to ensure preparation and disclosure of reliable financial information.

We used the 'Conceptual Framework for Designing and Operating Internal Control over Financial Reporting' established by the Operating Committee of Internal Control over Financial Reporting in Korea (the "ICFR Committee") as the criteria for design and operation of the Company's ICFR. We also conducted an assessment of ICFR based on the 'Management Guideline for Evaluating and Reporting Effectiveness of Internal Control over Financial Reporting' established by the ICFR Committee.

Based on our assessment, we concluded that the Company's ICFR is designed and operated effectively as of December 31, 2019, in all material respects, in accordance with the 'Conceptual Framework for Designing and Operating Internal Control over Financial Reporting'.

We certify that this report does not contain any untrue statement of a fact, or omit to state a fact necessary to be presented herein. We also certify that this report does not contain or present any statements which might cause material misunderstandings, and we have reviewed and verified this report with sufficient care.

February 24, 2020

Jong Kyoo Yoon, Chief Executive Officer

Ki Hwan Kim,

Internal Control over Financial Reporting Officer

Forward Looking Statements

This document contains forward-looking statements. Words and phrases such as "will," "aim," "will likely result," "will continue," "contemplate," "seek to," "future," "objective," "goal," "should," "will pursue," "anticipate," "estimate," "expect," "project," "intend," "plan," "believe" and words and terms of similar substance used in connection with any discussion of future operating or financial performance identify with forward-looking statements. All forward-looking statements are management's present expectations of future events and are subject to a number of factors and uncertainties that could cause actual results to differ materially from those described in the forward looking statements.

The factors that could cause actual results to differ include, but are not limited to, the following:

- · KB Financial Group's ability to successfully implement its strategy;
- · future levels of non-performing loans;
- · KB Financial Group's growth and expansion;
- · adequacy of allowance for credit and investment losses;
- · technological changes;
- · investment income;
- · availability of funding and liquidity;
- · cash flow projections;
- · KB Financial Group's exposure to market risks; and
- · adverse market and regulatory conditions.

By their nature, certain disclosures relating to these and other risks are only estimates and could be materially different from what actually occurs in the future. As a result, actual future gains, losses or impact on KB Financial Group's income or results of operations could materially differ from those that have been estimated.

In addition, other factors that could cause actual results to differ materially from those estimated by the forward-looking statements contained in this document could include, but are not limited to:

- · general economic and political conditions in Korea or other countries that have an impact on KB Financial Group's business activities or investments;
- · Korea's monetary and interest rate policies;
- · inflation or deflation;
- · foreign exchange rates;
- · prices and yields of equity and debt securities;
- · performance of the financial markets in Korea and internationally;
- · changes in domestic and foreign laws, regulations and taxes;
- · changes in competition and the pricing environments in Korea; and
- · regional or general changes in asset valuations.

KB Financial Group cautions the reader not to place undue reliance on the forward-looking statements, which speak only as of the date of this document.

Except as required by law, we are not under any obligation, and expressly disclaim any obligation, to update or alter any forward-looking statements, whether as a result of new information, future events or otherwise. All subsequent forwardlooking statements attributable to KB Financial Group or any person acting on its behalf are expressly qualified in their entirety by the cautionary statements contained or referred to in this document.
